Questions and Answers ----All About' Canada-

CANADA'S EARLY HISTORY
Q—What are the chief features of
Canada's early history?
A—In 1497 Cabot discovered and
explored portions of the eastern coast of
Canada, and 1534, 36 years later, Jacques
Cartier sailed from St. Malo, France,
landed at Gaspe, now in the province
of Quebec, and took possession of the
country in the name of the king of France.
A year later, having returned to France
in the meantime, he again set sail for
Canada. Entering the Gulf-of St. Lawrence, he sailed up the River as far as
the present sites of Montreal and Quebec.
De Montes, a French noblemen, sailed
with another expedition in 1605 for
Acadia, and in 1608 yet another expedition, this time in charge of Champlain, sailed up the St. Lawrence and
laid the foundations of the present city
of Quebec and established a tradingpost on Mount Royale, the original site
of the present-city of Montreal, which
was founded properly by Maisonneuve
in 1642. This was the real beginning of
the Dominion of Canada.

ELK ISLAND NATIONAL PARK

A—Elk Island Park, a large game reserve 26 miles east of Edmonton, was greatly enlarged last year and will now be completely fenced. This is one of the Canadian Government's national parks and will serve as a public playground as well as a game reserve. It embraces several small lakes.

as well as a game reserve. It embraces several small lakes.

THE LAKE OF EPSOM SALTS Q—Where in Canada is there a Lake of Epsom Salts?

A—A Lake of Epsom salts exists at Bisque, British Columbia. It is at least 41 leet deep and perhaps more. The miners who discovered it drilled to that depth and were then obliged to cease for lack of drilling facilities. The lake is said to cover an area of seven acres and to have hard crystal surface. When the snow melts from the mountains the surface is covered with six inches of water, which quickly becomes brine. The sun evaporates it, and all that is then necessary is to score and lift off the thick crust that has formed.

EXPLORING THE CANADIAN ARCTICS

Q—What is being done to explore the Canadian Arctics?

A—The Canadian Government has purchased a new steamship to continue exploration work in Canadian Arctic Territories. In the opinion of those qualified to judge, these northern districts are only awaiting an opportunity to prove themselves, both by land and sea, a wonderful storehouse of natural wealth, and the commissioning of the new ship which has been named the "Franklin" in honor of the celebrated British Arctic explorer, is another step towards their development.

THE HORSE-SHOE FALL

towards their development.

THE HORSE-SHOE FALL

Q-What are the demension
the Horse-Shoe Fall?

ONTHE COUNTRY

A—The horse-shoe fall on the Canadian side of the Niagara frontier is claimed to be the second largest Fall in the world. Its height is 150 feet and the perimiter approximately 2,500 feet. Theoretically the Fall and its rapids should develope 8,800,000 horse-power but the actual horse-power capable of development at present is 5,000,000. FORT NIAGARA

—When and by whom was Fort Niagara taken?

A—On July 24, 1759 while Wolfe was fighting at Quebec, Sir William Johnson was doing more than any other one mand to keep the French from the interior, and their Indian allies from going to Montcalm's help. On this date he deday took Fort Niagara. Johnson was an Irish boy of Dutch descent, who came to America, settling in the Mohawk valleys as a store-keeper; and so winning the friendship of the Indians by his absolute honesty as well as business smartness that the Mohawks adopted him; and he married Molly Brant, sister of the famous Chief Joseph.

DRUNKENNESS IN CANADA

Q—To what extent does drunkenness exist in Canada based on convictions for offences against liquor acts fell from 10,460 in 1921 to 8579 in 1922 although convictions for illicit stills rose from 220 in 1921 to 643 in 1922.

MOTOR CARS IN CANADA

Q—How many motor cars are there in Canada?

A—Motor vehicles registered in Canada during 1922 averaged 5.7 to every 100 people. The total registration was 513, 221 and 125,048 in, 1922. In 1922 and 1923 and 1924 and 25,048 in, 1922. Also, convictions for offences against liquor acts fell from 10,460 in 1921 to 8579 in 1922 although convictions for illicit stills rose from 220 in 1921 to 643 in 1922.

MOTOR CARS IN CANADA

Q—How many motor cars are there in Canada?

A—Motor vehicles registered in Canada during 1922 averaged 5.7 to every 100 people. The total registration was 513, 221 and increase of 6 per cent. over 1921, 235 and manufacturers amounted to 4,561. The last named cover all styles of cars. In addition to the 462,275 passenger cars in Canada tourist cars entered canada to the number of 818,374 for a per

Find a good thing and stick to it," said the Glue.

Everyone who uses a vacuum bottle will be interested to know that the inventor of it, Sir James Dewar, one of the most eminent British men of science, lied on one of the last days of March. Sir James was one of the men who reduced to liquid and then to solid form

such so-called permanent gases as hydrogen, nitrogen and oxygen. The vacuum bave a person ask your opinion and then bottle might be called an accidental invention, for the idea originated from his contrivance for transporting without loss from place to place the liquefied gases produced in his laboratory.

Nothing is quite so irritating as to have a person ask your opinion and then try and argue you out of it.

A bright girl doesn't think herself an angel j st because some man tells her she is.

In our own home towns and villages, hosts of satisfied friends buy RED ROSE TEA today, as they did 28 years ago—because it is still the same good Tea.

Buy a can of RED ROSE COFFEE—its flavour will surely please you.

UDEBAKER

The Verdict of 81,880 Buyers

During the first six months of this year, 81,880 buyers named STUDEBAKER as their choice of motor cars. This volume of business was the largest ever accomplished during any six months' period in Studebaker's history of 71 years.

Sentiment did not influence the preference of these eightyone thousand buyers. It was simply a case of selecting the car that offered the highest quality and value.

Thousands of buyers are daily turning to the Studebaker Light-Six, for example. At its price of \$1395, this car offers the greatest motor car value on the market and a type of six-cylinder performance that was formerly confined to the very highest priced cars. Extensive manufacturing facilities, large scale production and the elimination of middlemen's profits through complete manufacture in Studebaker's own plants, make possible in the Light-Six, the combination of high quality and low price.

To be able to buy a Six, practically free from vibration, for less than \$1400 is an opportunity not duplicated anywhere in the world. Elimination of vibration adds immeasurably to the life of the motor. It is one of the reasons for the universal high resale value of the Light-Six.

The Light-Six is durable, powerful, flexible, affords smooth, quiet operation and can be throttled down to a walking pace in high gear. It is easy to drive, convenient to park, takes the hills on high and holds sustained speed over long stretches hour after hour.

Stop in and let us prove what a vast difference there is between the Light-Six and other cars at about the same price—or between the Light-Six and cars of other makes costing several hundred dollars more. There's a reason for that difference. It's worth knowing.
