"Better, Dick! Your Mother never had a fine sugar like Lantic to make her cakes with. 'Fine feathers make fine birds,' you know, and it takes a fine sugar to make a fine cake. Wait till you taste it."

The quality of Lantic is always apparent. Its sweetness is the quick penetrating sweetness of purest tropical cane. Its fineness imparts fineness to everything it touches—cakes, puddings, pies, sauces, candies, preserves; the costliest product of the pastry-cook's art, the humblest cookie; milady's demitasse, the workman's morning cup of coffee.

Insist on original packages, to be sure of Lantic fineness, full weight, and cleanliness.

Plans for payment of the Anglo-French \$500,000,000 five per cent five year external loan, due next Friday, in New York, have been completed. The bonds will be accepted prior to maturity.

Find Substitute For Spruce Pulp

"It has become axiomatic in the paper industry that there are no substitutes for spruce wood in making paper pulp," writes Harry A. Mount, in Popular Mechanics. "Thousands of dollars have been spent by manufacturers in an effort to find some material to replace the rapidly diminishing supply of spruce without result. And so they have received with a great deal of skepticism the recent announcement that a satisfactory paper can be made from the sea grass of Florida, and that a practical method of production has been developed. Recently a company has been organized, however, and plans are going forward for building a pulp mill with an initial capacity of 25 tons per day in the sea grass belt.

"Engineers connected with the enterprise say that a preliminary survey reveals that there is in Florida nearly 5,000,000 acres of sea grass. It can be harvested twice a year, yielding 20 tons of paper per acre to each cutting. It would seem, therefore, that Florida might eventually furnish paper to the whole world, for it is claimed all grades of the commodity, from building papers and cardboard to the finest writing papers and vellums, can be made from the grass.

"It is not surprising in the light of past experiments, that relief to the present paper situation should come from such a source. Fibre suitable for paper making should come from such a source. Fibre suitable for paper making has been produced from a number of plants, among them corn and cotton stalks. The pulp from these sources has been made only on a laboratory scale, however, because two chief difficulties stood in the way of commercial exploitation of the process. In the first place there is not a sufficient supply of any one material, and it is too expensive to gather corn or cotton stalks from a wide area. The second, and perhaps the most important, difficulty is that, because the material is not compact, only a small amount can be placed in the pulp 'digester' at one time, making the production very expensive."

Commemoration of the Glorious Dead in the War

London, Oct. 25.—Lord Curzon, Minister for Foreign Affairs, and leader of the House of Lords, today gave the Canadian Associated Press some details of the arrangements which the Government purposes to follow in connection with the unveiling of the cenotaph commemorating the glorious dead in the war together with the burial of an unknown British soldier in Westminster Abbey, on Armistice Day.

The body of this soldier will arrive from France on Armistice Day and no attempt will be made to discover its identity. There will be a long processional route, the pallbearers being admirals, field marshals and generals. The procession will halt at the cenotaph for the unveiling ceremony by His Majesty the King, afterwards the procession will proceed to Westminster Abbey with the King as Chief Mourner and the Princes immediately following the gun carriage, on foot.

The burial will take place in the nave of the Abbey and it is also proposed that the grave shall be filled with soil from France.

Lord Curzon laid stress on the fact that troops from the dominions will be given every opportunity to share in the ceremonies with the home forces. It is proposed that two minutes silence during the armistice hour, shall again be observed throughout the Empire.

Prince of Wales A Prize Winner

CALGARY, Oct. 27.—The Prince of Wales took the championship and was first with his Shropshire sheep from his ranch south of here at the annual fall cattle show and sale yesterday.

The Earl of Minto took first with his Oxford animals. The Prince won first in all he showed.

Uncertainty of Cattle Export

Cattlemen on the Western Canadian ranches are reported to be seriously concerned about the uncertainty facing the export of cattle on the hoof to the United States. They fear that after the coming elections a tariff wall may be erected against the importation of stockers and feeders from the Dominion. Last year the value of the animals exported was roundly \$50,000,000. This has been a growing trade since 1910 when 155,000 cattle were shipped over the line. In 1919, the total had risen to 242,000 and for the fiscal year ending March last, the figure was 214,000.

But there is a reassurance forthcoming. Canadian producers believe

Middle Aged Women

Women should take warning from such symptoms as heat flashes, shortness of breath, excessive nervousness, irritability, and the blues—which indicate the approach of the inevitable "Change" that comes to all women nearing middle age. We have published volumes of proof that Lydia E. Pinkham's Vegetable Compound is the greatest aid women can have during this trying period.

Read About These Two Women:
Fremont, O.—"I was passing through the critical period of life, being forty-six years of age and had all the symptoms incident to that change—heat flashes, nervousness, and was in a general run-down condition, so it was hard for me to do my work. Lydia E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it, and the annoying symptoms have disappeared."—Mrs. M. Goddard, 222 Napoleon St., Fremont, Ohio.

Urbana, Ill.—"During Change of Life, in addition to the annoying symptoms I had an attack of grippe which lasted all winter and left me in a weakened condition. I felt at times that I would never be well again. I read of Lydia E. Pinkham's Vegetable Compound and what it did for women passing through the Change of Life, so I told my doctor I would try it. I soon began to gain in strength and the annoying symptoms disappeared and my Vegetable Compound made me a well, strong woman so I do all my own housework. I cannot recommend Lydia E. Pinkham's Vegetable Compound too highly to women passing through the Change of Life."—Mrs. FRANK HANSON, 1216 South Orchard Street, Urbana, Ill.

Women Everywhere Depend Upon

IF YOU HAVE Skin Trouble

DOES your skin get rough, rashy, and irritable? Are you troubled with outbreaks of pimples and blotches? If so, Zam-Buk will soothe your skin and clear away these annoying disfigurements. If afflicted with more obstinate troubles like dry or weeping eczema, ulceration, abscesses, ringworm or poisoned sores, Zam-Buk alone ensures speedy and thorough cure. Zam-Buk's soothing, healing and germicidal powers are derived from a scientific blending and concentration of nature's herbal oils and extracts. Zam-Buk has revolutionized the treatment of skin troubles. Where ordinary coarse ointments act merely on the surface, Zam-Buk's refined herbal juices penetrate to the underlying tissues, destroying disease at its very root. For quick, clean healing of everyday cuts, burns, scalds and wounds, or for ridding skin or scalp of eruptions and sores Zam-Buk is invaluable.

WEeping ECZEMA. Mrs. Carmichael, 72, 24 Avenue, Montreal, writes: "I suffered from wet eczema so bad that, when hospital treatment failed, I began to think my case incurable. Zam-Buk, however, ended the disease, and soothed my skin wonderfully. It drew out all inflammation and cleared every trace of disease."
BABY'S FACE SORES. Mrs. C. B. Ritchey, Riverport, N.S., says: "My baby had sores on her face caused by teething. Although I tried numerous salves and ointments nothing would heal them. On a friend's recommendation I got some Zam-Buk. This soothed the child, healed every sore, and effected a wonderful cure."

See box, 2 for full details. All Drugists and Stores, or Zam-Buk Co., Toronto. FREE SAMPLE BOX for 1c. stamp (return postage).

the seriousness of any threatened curtailment of livestock production and believe that if a tariff commission had to be met they could tally also care of all the cattle that can be raised if two conditions are fulfilled. The "scrub" bull must go so as to raise the general quality of our beef and stock-raisers must provide a steadier supply than in the past. These two factors are the main drawbacks to the development of an export trade in beef similar to that which has proved for 25 years the mainstay of our bacon industry.

During 1919, out of 698,849 cattle marketed at stockyards for home use, 139,431 graded "common." That is, 18.5 per cent graded "common."

With so much unsuitable material to hamper, an export market cannot yet be established to compete with the high class beef from Argentina and Australia. But if quality is improved and supply well regulated, packers emphatically assure stock-breeders—and this applies to east and west—of a readiness to aid in opening and building up a valuable market for all beef animals bred on Canadian farms.

Marketing Eggs Improving

Mr. J. F. Booth, Commissioner of Co-operation and Markets reports a market reduction in the percentage of bad eggs received by wholesale companies within the province in recent shipments as compared with the same in former years. The improvement is credited to the operation of the Egg Marketing Act, which came into force in the beginning of June this year. To meet the standards called for, it is necessary to candle all the eggs as received from producers. Two thousand retail egg merchants in the province are licensed by the Co-operation and Markets Branch. Two inspectors are visiting these merchants giving them personal assistance with respect to the egg trade. Later in the season inspectors will make a second tour to enforce the Act. Bulletins are sent out with diagrams explaining the candling of eggs, and the construction of a simple candling device. These various forms of assistance are clearing away much of the early misapprehensions that were evident when the Act was first made public.
