NATURAL GAS DEVELOPMENT

The first discovery of natural gas in the Province of Alberta of which we have record, took place in May, 1884, at Alderson, a station on the main line of the C.P.R., 35 miles west of Medicine Hat. The railway construction gang, boring for water, struck a heavy pocket of gas at a depth of 1,300 feet. A little later in the same year, gas was also discovered at Cassils, 6 miles further west, but while this well soon choked, that at Alderson continued to flow for many years.
In 1890, Medicine Hat, then but a small town, sank a well and found a small supply at 700 feet; four years later another attempt was made, and history tells how at the eleventh hour, with money all spent—facing bankruptcy—and despair, and gloom in the hearts of the mayor and city council, a sensational flow was uncovered at a depth of twelve to thirteen hundred feet. This cheap, apparently unlimited fuel supply, both for commercial and domestic purposes, is largely accountable for that city's growth and present prosperous condition.
There are several known gas fields in the Province of Alberta, but as yet only two have been utilized for commercial purposes to any considerable extent, namely, the Medicine Hat and Bow Island fields. Bow Island lies on the railway line about half way between Medicine Hat and Lethbridge, 180 miles south-east of Calgary.
In 1912 the supply was piped into the city of Calgary, as well as distributed en route to the city of Lethbridge, Macleod and other towns, where it is used for both domestic and commercial purposes.
In the neighborhood of Pelican Rapids, Athabasca River, gas springs were known at least a century ago, and travellers going up and down the river, into the Peace River Country have cooked their meals there. Further well-known gas reserves are the Foremost Field, south of Bow Island, the Barwell Field, midway between Bow Island and Lethbridge and the Viking Field, 83 miles east of Edmonton, and were it not for the difficulty of obtaining adequate piping, it is probable that this supply would have been utilized two or three years ago to furnish light, heat and power to Alberta's capital.
Prospecting is now going on in the Monarch Field, 40 miles southwest of Calgary, and at the Okotoks Field, 27 miles south. Along the foothills of the Rocky Mountains, in the vicinity of the apex of a well defined anticline similar to that one in the Okotoks Field, there are many pronounced gas seepages, and it seems probable that as in the former field, which had also a gas seepage, it will be a commercial producer.
The Imperial Oil Co. has commenced prospecting for petroleum along the last mentioned anticline, and it is stated, intends to carry vigorous prospecting from the International Boundary northwards to Hudson Hope on the Peace River. The production of both petroleum and natural gas seems favorable. This company also proposes further prospecting at other parts away from the mountains, where it has selected grounds for operation. In many parts of the province in drilling for petroleum, gas has been found; and

Gas Well at Medicine Hat, Alberta.

indications are that there is an immense gas field remaining yet to be tapped, the exact location, size and probable capacity of which can only be proven by testing.
According to the report of the Canadian Bureau of Mines, in 1915, there was produced 4,378,947,000 cubic feet valued at \$1,037,919, which is equivalent to 23.7c per thousand cubic feet—the heat that could be obtained from upwards of two hundred thousand tons of coal.

The Natural Gases of Alberta are known as "wet" and "dry." The former is a profitable source of gas line, and already a considerable amount of that fluid has been produced, with a probable greatly increased production in the near future. The Medicine Hat and Bow Island fields are "dry," but there is no reason to conclude that much of the gas yet to be found will be "dry" rather the reverse.
Helium, a non-combustible gas, very nearly as light as hydrogen and invaluable for balloons, has been extracted in considerable quantity from the Bow Island gas at Calgary, and shipped to Great Britain for war purposes. The termination of the war, has stopped the manufacture, probably, however, only temporarily.

WHEN YOU WAKE UP DRINK GLASS OF HOT WATER
Wash poisons and toxins from system before putting food into stomach.
Wash yourself on the inside before breakfast like you do on the outside. This is vastly more important because the skin pores do not absorb impurities in to the blood causing ailments while the bowel pores do.
For every ounce of food taken into the stomach, nearly an ounce of waste material must be carried out of the body. If this waste is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream through the lymph ducts which should suck only nourishment.
A splendid health measure is to drink, before breakfast each day, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless way to wash these poisons from the stomach, liver, kidneys and bowels, thus cleansing, sweetening and freshening the alimentary canal before eating more food.
A quarter pound of limestone phosphate costs but very little at the drug store, but is sufficient to make anyone an enthusiast on inside bathing.

Are Your Tires in Good Condition?

to stand up against the wet and mud? Insure yourself from being held up at this time of the year. Goodrich Silvertown Cord Tires are the strongest constructed cable cord tires with the toughest black rubber and safety treads on the road today. Ask the man that is using them!

Goodrich Tires in actual use on road and pavement are to-day unfolding such matchless mileage, regularly in excess of previous adjustment basis, that Goodrich knows it has the strongest, most durable tire the rubber industry has produced.

Safety Treads 6,000 Miles
Silvertown Cords 8,000 Miles

RECONSTRUCTION REORGANIZATION REHABILITATION

The Globe.

Coming Events Cast Their Shadows Before

Not since the pre-Confederation days has the political life of Canada been surcharged with so much uncertainty. Great events in Canadian politics are about to take place. The reorganizing and rehabilitating of great political parties is in progress. New leaders are appearing. The order is changing. All things are becoming new.

THE next two years will be a momentous period in the political life of the country. Reconstruction is a greater task than Confederation.

How will you take your place in the affairs of the nation? What opinions will you form? How will you cast your ballot intelligently if you do not keep in touch and inform yourself on the great questions of the day by reading a daily newspaper national in viewpoint and international in scope?

public opinion and an advocate of reform. It is the servant of the people from whose needs it draws its inspiration.

To be informed of the progress of events, you should avail yourself of The Globe's great news gathering organization. For an analysis of these developments, and clear, sober thought upon them, read its editorial discussions from day to day. They are written by close students of economics, politics, industry, commerce, social reform and religion.

And further, what The Globe has been in the past is a sure guarantee of what it will be in the future. The personality and ambitions of its founder ever dominate the activities of its publishers.

Therefore, nothing will be left undone to make The Globe the newspaper that George Brown would have it be and to earn a place for it in every Canadian home.

It is not a party organ, but a medium for the development of
