# GOOD CHEER RANGES

The Christmas baking is, perhaps, the most important of the whole year. Into it is thrown all the skill and knowledge of the good housekeeper. Without the proper Range, however, these go for naught and there is nothing but exasperation and grief. THE GOOD CHEER RANGE is designed to eliminate all such troubles. \*

#### UTILITY

In the purchasing of a Range for your kitchen there is one outstanding feature that must be considered before you make a decision. That feature is the oven. The Range you decide on should be the best baker posible. Its utility in this respect should be proven and fully guaranteed. The success of the "Good Cheer Range" has been so pronounced, we have no hesitancy in giving our absolute guarantee. The "Good Cheer Rang" is supplied with water front or reservoir as required. Built to buin bush coal and wood.

#### DURABILITY

If a Range has not good lasting qualities it is expensive at any price. The Range to prove satisfactory must be of good material, well put together The "Good Cheer Range" is built on thoroughly practical lines, strong, steel body-heavy fire box lining. The metal is so distributed that where the greatest strain is, the "Good Cheer Range" is strongest. Durability-like Utility-is well considered in the making of the "Good Cheer Kitchen Range."

#### APPEARANCE

The wife and maid will both take pride in a "Good Cheer Range." There is just sufficient nickel work to give that brilliancy so essential to appearance in a good range, without causing extra labor in the polishing. The design and general appearance stamps it as high class. Appearance is worth a great deal in a range, but it must be accompanied by the other necessary features. These are combined to an exceptional degree in the "Good Cheer Range."

#### THE PRICE

Naturally the price will have a great deal to do in your decision. In the "Good Cheer" this will be no barrier to your purchase. The price is lower than usual for this class of range.

No. 9, with high closet and water front
