How Japanese Tea

Almost everybody drinks tea, but very few people know how it is acually "made."

The tea plant belongs to the same amily of evergreens as the camelle. and has small white flowers, slightly fragrant. As a rule the seeds are planted on terraces on gentle hill slopes, but level ground may also be used provided it is kept drained. The

It is ready for picking in its third rear, but is at its best from the fifth to the tenth year. The first picking takes place at the end of April, and lasts three or four weeks There is a second picking in June or July. This work is generally done by girls.

As soon as possible after being picked, the leaves are placed on a disappointments and round tray, with a brass wire bottom, over boiling water. This process of
