Germany has been the first nation to experiment with bicycle riflemen. It is not yet known whether the experiment will prove a success. Indeed it would be strange if it did. The man who can guide a bicycle, carry a rifle, take aim, fire and hit a mark while riding, and then turn and whirl away, would be a man too gifted to be a common soldier. The bicycle corps could, however, do effective work by dismounting quickly from their wheels and then firing and loading. MARRIED HER MODEL.

A New York Lady Artist Becomes the

Bride of a Handsome Indian. New York, Oct. 1 .- Just two years ago Miss Hattie Hashagan, whose de-corative paintings have delighted thousands at the art exhibitions, arranged with an Indian named Thundercloud to pose as her model for a picture of wild eastern life. Thundercloud, who is a big, strapping fellow, straight as an arrow, with piercing black eyes, a brighter face than most Indians, and altogether a noble representative of his race, fell in love with

the artist, and now they are married. Thundercloud was born in the Caughnawaga country in Canada, about 40 years ago. A few years later he was carried as a papoose to Northern Minnesota. His mother was a fullblood Sioux, and his father a half-breed Chippewa. When 20 years of age he was taken to Europe by Buffalo Bill, and was the most admired of the red skins who appeared with the Wild West show before the nobility. Since his return to New York he has earned a good living by posing and selling Indian curios. In the city directory Thundercloud's name appears as Dominick Plante, but to the friends the couple are known as Mr. and Mrs. Thundercloud.

Upon the motion to go into supply Mr. Davin moved in amendment that when the revision of the tariff is made the Government is bound in honor to place agricultural implements, binder twine and coal oil on the free list. Mr. Laurier said that he understood that there was a protest in Western Assiniboia, and that in the near future there would be an election. Whatever might be the merits of the proposition to put binder twine and agricultural implements on the free list, and it was a question that was debatable, upon which parties on either side of the House might have views, he wanted to ask Mr. Davin if he thought seriously that the House should give six months' notice of what should be done ers in binder twine and agricultural implements should have six months' Mr. Richardson declared that he was heartily in favor of putting binder twine, agricultural implements and coal oil on the free list, but he could see the object of Mr. Davin in bringing this proposition forward at the present time.
