GRAIN MARKET GOSSIP

was in evidence, with offerings rather light.

The firmness in Liverpool at all times speaks volumes for the world's situation in wheat, and higher prices are indicated.

Leading traders who are bearish are disposed to regard the decline of 13c in wheat and 16½c to 18½c in rye as enough for the time being.

The recent declines in grains, due to liquidation, have put the market in a better position. For the present, however, the markets are two-sided, and a trading position is advocated by many.
