cerd of his baptism, but his name, and that of one of his brothers, has not

A GREAT YIELD OF GOLD.—The papers contained references a short time ago to the discovery of a remarkably rich gold lead in the Montague district by Mr. G. W. Stuart. Later reports from Montague indicate that the lead, which is called the "Rose Lead," is proving even richer than it was at first supposed to be. When discovered two generals ago it was siv inches thick. menths ago it was six inches thick. The first crushing of twenty tons of quartz yielded 2½ ounces to the ton. At a depth of 30 feet, the lead has increased to a thickness of 19 inches, and it is believed that the last quartz taken out of the shaft will yield 15 ounces to the ton. Mr. Stuart brought to town yesterday a bar of gold weighing 238½ ounces, worth nearly \$4,600. This is represented to be the result of the labor of ten men for one month, the quartz yielding an average of five ounces to the ton. It is said that there will be a profit of about \$4,000 learning the directors of the directors of the View of the view of the directors of the view of the view of the directors of the view of t The first crushing of twenty tons of there will be a profit of about \$4,000 Bank, at which it will be finally decided Queensland, there will be a profit of about \$4,000 and the month's work. The "brick' will be on exhibition in Messrs. M. S. Brown & Co.'s window, Granville Street. The owners of the mine are Messrs. D. Teuquoy, G. W. Stuart, B. Gladwin, John A. Matheson and B. M. Davison. Messrs. Stuart and Gladwin were the discoverers; the others afterwards purphsed interests. Hr. Chron. wards purchased interests .- Hx. Chron.

Caroline Clare. cial despatch from Fredericton to the St. John Sun, says:—On Wednesday morning a girl named Kearney, aged ten years, was picking berries about a mile from Carribou Village, when she was approached and outraged by a Frenchman named Jerry Boutillier. Her father, getting a description of the second concession of Rodney, was taken ill. Her disease could not be correctly diagnosed, and had many peculiar features. Her appetite fell off, and she lost flesh till and an assistant at once started in pur-Her appetite fell off, and she lost flesh till from a strapping girl of 130 pounds weight she barely weighed 87 pounds. There did not seem to be any organic complaint. The bodily functions were not impaired, and artifough she ate less than formerly, the falling off in this respect was not such as in itself would alarm her friends. After the lapse of a few months she took to her abed. Then it was that a change occurred in her mental condition. Formerly she about 5 p. m. he was seen to emerge mand clarke, Collins and Irvine was bade. Then it was that a change occurred in her mental condition. Formerly she was noted rather for lack of conversational powers, but now fits or spasms would come over her, on the passing away of which her eyes would become set and glazed, her body almost rigid, and while the that state she would discourse eloquently, and give vivid descriptions of far-ord scenes, far exceeding in their beauty anything which she had ever seen or presumably even read of. On the passing away of this state she eathly and the mount since, when an extraoder the continued till about a month since, when an extraodiancy change took place. The girl, almout a month since, when an extraodiancy change took place. The girl, almout a month since, when an extraodiancy change took place. The girl, almout a month since, when an extraodiancy change took place. The girl, almout a month since, when an extraodiancy change took place. The girl, almout a month since, when an extraodiancy change took place. The girl, almout a month since, when an extraodiancy change took place. The girl, almout a month since, when an extraodiancy change took place. The girl, almout a month since, when an extraodiancy change took place. The girl, almout a month since on the passing and her friends anticipated an early release far her from the room to which she had been confined so long. Their expectations were received from Atlanta, in Georgia; Cardiff, in Wales; St. Helier's, Now York; Eelfast, Ireland; Jacksonville, Jacks been confined so long. Their expectations were not in vain, for she is now it search of him, he would undoubted about the house, apparently as well bodily as ever. But another remarkable development has taken place. She is constantly giving off electrical charges, and seems to be a pertect battery. A person, unless possessed of the very strongest nerves cannot stake hands with her, nor can any one place his hand in a pail of water with hers. By joining hands also promose in a harp shock through 20 persons in a room any seed of the very strongest nerves cannot release from her touch any article of steel she may have taken up. The only method yet found is for a second party to take hold of the article and pull, while the gifl strokes her own arm vigorously from the wrist upward. On her entering a room a perceptable influence seizes hold of all others, and while soom are affected to sleepiness, others are ill and fidgety tilt they leave, and even for a considerable time afterward. A sleeping babe will wake up with a strat at her approach, but with a stroke of her hand she can at one coax it to slumber again. Animals are also subject to her influence, and a dog of the household will life for hours at her feet men and she can at one coax it to slumber again. Animals are also subject to her influence, and a dog of the household will life for hours at her feet men and she can at one coax it to slumber again. Animals are also subject to her influence, and a dog of the household will life for hours at her feet many her she had a subject to her influence, and a dog of the household will life for hours at her feet many her she had a subject to her influence, and a dog of the household will life for hours at her feet many her she had a subject to her influence, and a dog of the household will life for hours at her feet many her she had a subject to her influence, and a dog of the household will life for hours at her feet many her she had a subject to her influence, and a dog of the household will life for hours at her feet

with a stroke of her hand she can at once coax it to slumber again. Animals are also subject to her influence, and a dog of the household will lie for hours at her feet as motionless as in death. A curious part of the phenomena is the fact that the ectisity can be imparted by her to any article with which she habitually comes in centact. The other day a younger sistence that the ectisity can be imparted by her to any article with which she habitually comes in centact. The other day a younger sistence that the entire to retain or to get into power, and to be beyond the exigencies of the next pair of corsets belonging to Caroline, and on her hand touching the steel she was compelled to drop them with a lond cry and an exclamation to the effect that she had run a needle into her finger. Wooden spoons have had to be made for her, as she cannot touch metal. Altogether the case is a most remarkable one and attracts scores of visitors to the house of Mr. Clare Medical men are especially interesting themselves, and it has been stated that Dr. Tye of Thamesville will read a paper on the subject at the meeting of the Provincial Medical Association, which is to be held in London in the course of this summer. Mr. Clare is the father of a family of seven children, none of whom except Caroline shows any abnormal qualities.

Went of its foundation and broken to pieces, Many farmers have lost their dwellings, barns and crops, and are left penniless. They are obliged to seek refuge in what is left of their barns. The situation is truly terrible, and assistance is required immediately. Such a storm was never experious to be done than the mere effort. The number of killed men are especially interesting to retain or to get into power, and the exigencies of the next look beyond the exigencies of the next whole evaluation to exige in the properties. The whole country is suffering from England are of a family of seven children.

Many farmers lost feet of the smooth of the most dense than the mere effort. The number of killed of the e
