At the Assizes held here on the 15th At the Assize near new and the state, and the case of Miss Barbara McClegherty, 622 Bloor street west, against the Cale Manufacturing Company was tried. Miss McClegherty was employed in the Laundry department of the business, and while at McCogherty was emproyed partners that business, and while at work or, the 18th of last June had her hair sought in a shaft. It was some time before the machinery could be stopped, and her hair had to be cut before also could be free! She climed that the shock has rendered her liable to paralysis, and demanded \$2,000 compensation. The jury returned with a verdiet giving her \$024. A \$\text{milar suite-that-of-mobile property} \$\text{A \$\text{smiller suite-that-of-mobile property} \$\text{A \$\text{smiller suite-that-of-mobile property} \$\text{A \$\text{smiller smit-that-of-mobile property} \$\text{A \$\text{smiller smit-that-of-mobiler smith} \$\text{A \$\text{smiller smith} \$\text{smiller smith} \$\text{A \$\text{smiller smith} \$\tex A smitter outsettate-deal-phyribioghis-against the Ontario Rolling Mills, was settled by the payment to the plaintiff of 800 and cost. This case was also the result of an accident which happened to the planniff while in the defendant's compley. He was working at a fly wheel, when, through a mittake, steam was turned on, and bouglas, being caught by the wheel, had his leg broken.

Os Saturday afternoon, at 4 o'clock, Res. Principal Grant, of Kingston, dehered a lecture at Trinity University in enticism of Henry George's "Progress and Paverty." There was a large attend-ance Dr. Grant admitted that on first and roverty." There was a large attend-ance Dr. Girnt admitted that on first reading the book he was almost converted, but it had et him thinking and inquiring, and he had come to the conclusion that, Gorne was wrong from first to last. He contended that there was no truth in the fermisse of Mr. Gongo that poverty was increasing in proportion to material pro-graws and the accumulation of wealth. It was not true that rents generally were rung or wages falling. Mr. Georges theory that commediates tended to intheory that commedities tended to in-crease in price, a continually larger share going to the land owner was equally un-founded. Some land owners in cities were wealthier than ever before, but so were other classes. For the community to take the value of band without compen-sation, as proposed, would be simply steel-ing. If this were done it would be specially injurious to the working seconds. ing. If this were done it would be specially injurious to the working people, who would be huddled into temperate to asve the ground rent. The rich man who had only a small office would reach early attention, while poor men who required faul for productive purp was would be heavily bundlened. As to remedies, the speaker proposed tanig uninproved land at the state rate as improved land and exempting improvements. Society should not be considered as a more collection of distributed by the sain organism which dividuals, but as an organism which uffers by injury done to any member.

OPENINGS FOR AGENTS.

THE Cosmopolitan Life and Casualty sociations of Toronto are seeking reli-ble agenta. The public press is unani-ous in its praises of the Cosmopolitan.

A WISE man from Minneapolis has the betest and most ingenious thing in the believe in the best of machine on exhibition. It is a contrivance that "takes your preture for a nicel." In forty seconds it turns out a photograph on tin.—New York Times.
