Dr. ARTHUR HILL HASSALL, M.D., the Inventor, recommends this as the most nourishing of all the Infants' and Invalids' Foods which have hitherto been brought out.

It is beyond all doubt that the lives of tens of thousands of infants and young children are annually sacrificed through the use of innutritious and improper articles of diet, prepared, as they so frequently are, with milk that has been largely diluted with water, and hence its nutritive qualities very greatly reduced. It is still a very common thing for infants to be fed upon different kinds of arrowroot and starch, including corn and potato flours and rice starch—substances destitute of nearly all the important elements which a food ought to contain, viz., nitrogenous compounds, sugar, fat, phosphates, etc., with the result that the children thus brought up are in some cases ill-nourished, in others half-starved and sometimes even starved to death.

Sold by Druggists, Grocers, Oilmen, etc., in Tins, 6d., 1s., 2s., 3s. 6d., 6s., 15s., and 28s. each.
