

SOMETHING NEW IN JEWELERS' SAFES

J. & J. TAYLOR'S
NEW STYLE
JEWELERS' SAFE,

WITH
DOUBLE TONGUE AND GROOVE
FIRE-PROOF DOORS.

J. & J. TAYLOR, TORONTO SAFE WORKS.

IN ORDER to meet the wishes of the jewelry trade, we have at last succeeded in perfecting a new style of safe for jewelers' use, combining the advantages of first-class

FIRE AND BURGLAR PROOF SECURITY WITH MODERATE COST.

THE above cut represents our new style of Fire and Burglar Proof Safe for Jewelers, which has an entire lining inside of best five ply welded Chrome steel and iron, with heavy Burglar Proof door, made any thickness required, and which is securely attached to the Fire-proof door. The Burglar Proof Door is fitted with rubber tube packing to prevent the use of explosives, and is locked with four wheel Combination Lock having our patent Enlarged Centre Lock Spindle and Bolt Handle.

To the above improvements is also added our new patent

DOUBLE TONGUE AND GROOVE FIRE-PROOF DOORS,

this being the latest improvement in Fire Proof Safes, and PATENTED BY US JANUARY 14TH, 1886. This door is fitted with a TONGUE made of wrought iron, corresponding with and locking into a GROOVE, made of same material, on the door frame. To both of these is connected a SECOND TONGUE and GROOVE made of thin galvanized steel, which is filled with non-conducting material thus making

TWO COMPLETE TONGUES AND TWO GROOVES IN EACH DOOR,

and which we maintain is the best fire-proof safe now made.

Visitors to the coming Industrial Exhibition can see samples of these safes at our exhibit in the Main Building. Do not fail to examine them.

J. & J. TAYLOR,
