Market, Hearter &

OTIETNESS continues to be the noticeable feature in this branch of tests. in this branch of trade. Some few orders are being received from country customers, but they are small in amount, and only of importance as indicating that the she'ves of the retailers are being somewhat lightened and that later on, larger orders may be looked for. The winter roads in many localities are now in toterably good cond tion, but in some places, owing to the high winds which prevailed when the snow was filling, the roads are left completely bare, or b'ocked up with drifts.

The English markets both for the raw material and for manufactured goods, are unchanged since our last. Sales of cotton in Liverpool have continued large, and chiefly for consumption, it being now pretty well understood that the stock in hand and affort for Europe will if anything, fall short of the requirements of the trade.

The New York dry goods market is reported as showing somewhat more admartion than previously. but there is still very little being done. In woollen goods, more especially, the demand is very light, and holders find it very diffcult to make sales even at concessions from current prices.

DUSINESS still continues very quiet with little or nothing did ig. For a few special articles, of which there is a scarcity, orders are being received. but generally speaking, mactivity prevails everywhere

The depression in the English Iron Trade previously noticed, still continues. We give elsewhere a letter from two gentlemen who have been visiting the Continental coal and from fields for the purpose of drawing comparisons between them and those of England. with a view to the discovery of the causes which are enabling the French and Be'glan iron and iron mannfactures to take the place of English in many of the European markets. This is the second of a series of letters which these gentlemen are addressing to the

Satte of F. C. F. C. I. C. C. C. C. V. H.

E have to report a more active market with an improved demand for stock reeded for the spring trade, but though the supply is by no means excessive prices remain entire's unchanged

SPANISH SOLE-Has been in rather better request at unaltered rates, but no very large sales are reported as having 1-cen made.

SLAUGHTER SOLE -The supply of this stock continues low, with prespects of a deficiency for the early trade, and higher prices than at present exist.

HARMAN -Steady, with no particular inquiry.

WAXED UPPER-Has been in its inquired for, but buters are uswicing to par present rates and the stock in market being small holders are not disposed to make cor cossions

BUTF AND PEBBL'D -Are in better demand, and rales have been effected to a considerable extent at prices varying according to quality best class of stock being most sought after

PATENT AND ENAMELIED - Sales are being mad-In moderate quantities at previous quotations, and the stock c numu- light.

CALTERIA - Are in better request, and less difficulty has been found in effecting sales at quotations

SPLITS-Have more inquire, and prices are firm, the demand exceeding recepts

Surregias -Tiestock on hand is not heavy, nor is there much demand.

HIDES,-The secent importations have been taken off the market, and the stock on hand is sgain quite

FLOUR-We have to note liberal, although smaller receipts than previously. The stock of the higher grades being now in small compass, prices have advanced, transactions however are of a purely retail character. The local demand for supers is small, and the speculative enquiry, though on the whole active, has been more fitful, but confidence being strong in some quarters, the advancing pretensions of holders have been largely acceded to, and prices forced up, closing firm, and moderately active at \$7.31 to \$7.40 for choice brands. Much dirersity of opinion in respect to prospects exists, many regarding the present rates as extremely hazardous, and avoiding operations altogether except for the supply of daily wants. The lower grades are in small supply, but engage little atention except the better samples of fine or No 2, which are taken a their relative value. Bag Flour. The arrivals from abroad have been trifling, and the trade has been mainly supplied by the local millers the few parcels offered on Upper Canada account have been freely taken at full rates.

OATMEAL-Following on the reported decline in Britain, shippers retired for a time from the market. or only offered about \$4.5), but confidence has again been in a great measure restored, and there are buvers for spring delivery as well as for present shipment, via. Portland; the rates on the spot being about \$5.00 for good samples, or at a proportionate figure fo,b. at the various points along the lines of rallway.

Whear -As hitherto, the bulk of receipts have been direct to millers; some few cars have however been sold from store, and on the track. Rates have intter's been in sympathy with flour, we quote \$1.50 to \$1 65 as c' ng rates for U. C. Spring.

PEAS -There is little doing on the spot, but some inquiry begins to be made for spring delivery, the ideas of value being about 9 ic. per 63 lbs. for good 48BID'04.

OATH -The few cars coming in are sold in store at 31c. to 32c., according to quality. There is, however, little animation, and the expense of storing. &c . forhids offering much encouragement to consign in car toads.

BARLEY.-We hear of no transactions of note, and rates must be regarded as nominal.

PORK -The demand is of the merest retail character, and re-tricted to an occasional small parcel of Mess at about \$19 Other grades are entirely nominal, and no temptation in price would induce an offer or a contract for a wholesale purchase. Dressed Hogs, until the last few days, were not arriving in excess of the demand from the packers and the local trade; but, latterly, receipts have been excessive, and several packers have retired from the market in expectation of lower prices, which seem likely to rule should the stock begin to accumulate. Prices remain nominally unchanged, being still within the range of \$5.50 to 45.75, but the extreme quotations are not to be realised, except for choice and unusually heavy averages,-the bulk of the sales made during the past week ranging from \$5.55 to \$5.65 for weights of 22 lbs to 250 lbs. Prices have been gradually creeping up in the princi-pal markets in C. W. from local competition; but the Montreat packers finding those in Upper Canada paying more than they deem a safe figure to secure the Hogs, prefer retiring altogether from the market, deeming it immaterial by whom the Hogs are packed. as the bulk of the Pork must come to this market for sale in the spring, when they can supply all their wants at fair current rates.

Land, Hans, &c -The market is fully sapplied by the packers, who are freely selling at lower prices than the article can be laid down from Upper Canada. The demand is therefore almost nominal, and until Lent is over no improvement can be looked for

BUTTER-Remains in the same neglected state.-Stocks continue considerably beyond what is required for any probable recal consumption or export demand for any probable accil consumption or export demand for some time to come, notwith-standing the adjument to Britain of several considerable parcels on Upper Causala account. Arrivals are moderate, and it is possible that the low rates ruling may tempt shippers to the Lower ports to clear the market in the spring. A-mas—Pots—have declined both here and in Bettain and are nominally quoted at \$5.70 to \$75, with a weak market. Pearls are likewise unsettled and drooping—latest sales in the vicinity of \$7.
