

The Results at the Kerwood Cheese Factory

EVERY week or so we receive letters from creameries and cheese and butter factories, reporting tests made with the Standard cream separator. For example, the Kerwood Cheese and Butter Factory reports as follows on tests made Oct. 29, 1912:

Test No.	Per Cent. of Butter Fat in Cream	In Skim Milk
1	36	.02
2	43.5	.02
3	45	.03

In each of the above tests the milk was fed to the machine at the rate of 634 lbs. per hour (machine listed at 600 lbs.), and the bowl was flushed, and when taken apart was free from cream and in good condition. The milk skimmed was not new milk, but had been kept over, some of it two days old. You will note by the above figures that the milk was fed to the machine nearly 100 lbs. per hour faster than its rated capacity and that the cream skimmed contained a high per cent. of butter fat, so that I consider the work done in this test exceptionally good.

(Signed)

W. WADDELL, Proprietor Kerwood Cheese and Butter Factory.

The above test again emphasizes the superiority of the Standard in close skimming. Even old milk, fast-skimming and heavy rich cream did not prevent the Standard from skimming closer than other separators "Standard" and do it now. There is no other that can give you equal results, and it's results that count. Send for descriptive catalog.

THE RENFREW MACHINERY CO., LIMITED.

Head Office and Works, Renfrew, Ontario.

(No. 17)

Agencies Everywhere in Canada.

The Spramotor Co. is the only Canadian firm in its line having an American branch, manufacturing in the United States, where they have been established for twelve years.

A Brass Spramotor costs little more than an iron machine.

With 16 years' experience in making Spramotors exclusively it would be a wonder if we did not make them better, as well as cheaper, than any other manufacturers who make sprayers as a side line. Our business life depends upon the success of the Spramotor. Our eggs are all in one basket, and you may be sure we watch that basket.

Having specialized on Spramotors, and having a larger trade than all others combined, we make them better and cheaper than others.

They are built to endure. There are some Canadians who prefer American machines and buy them, while the Spramotor is being bought by the best people in the United States.

Agents wanted.
