

OUR LATEST HEAVY MOULDER ON BASE

Built in 3 sizes 10, 12 and 13 in.

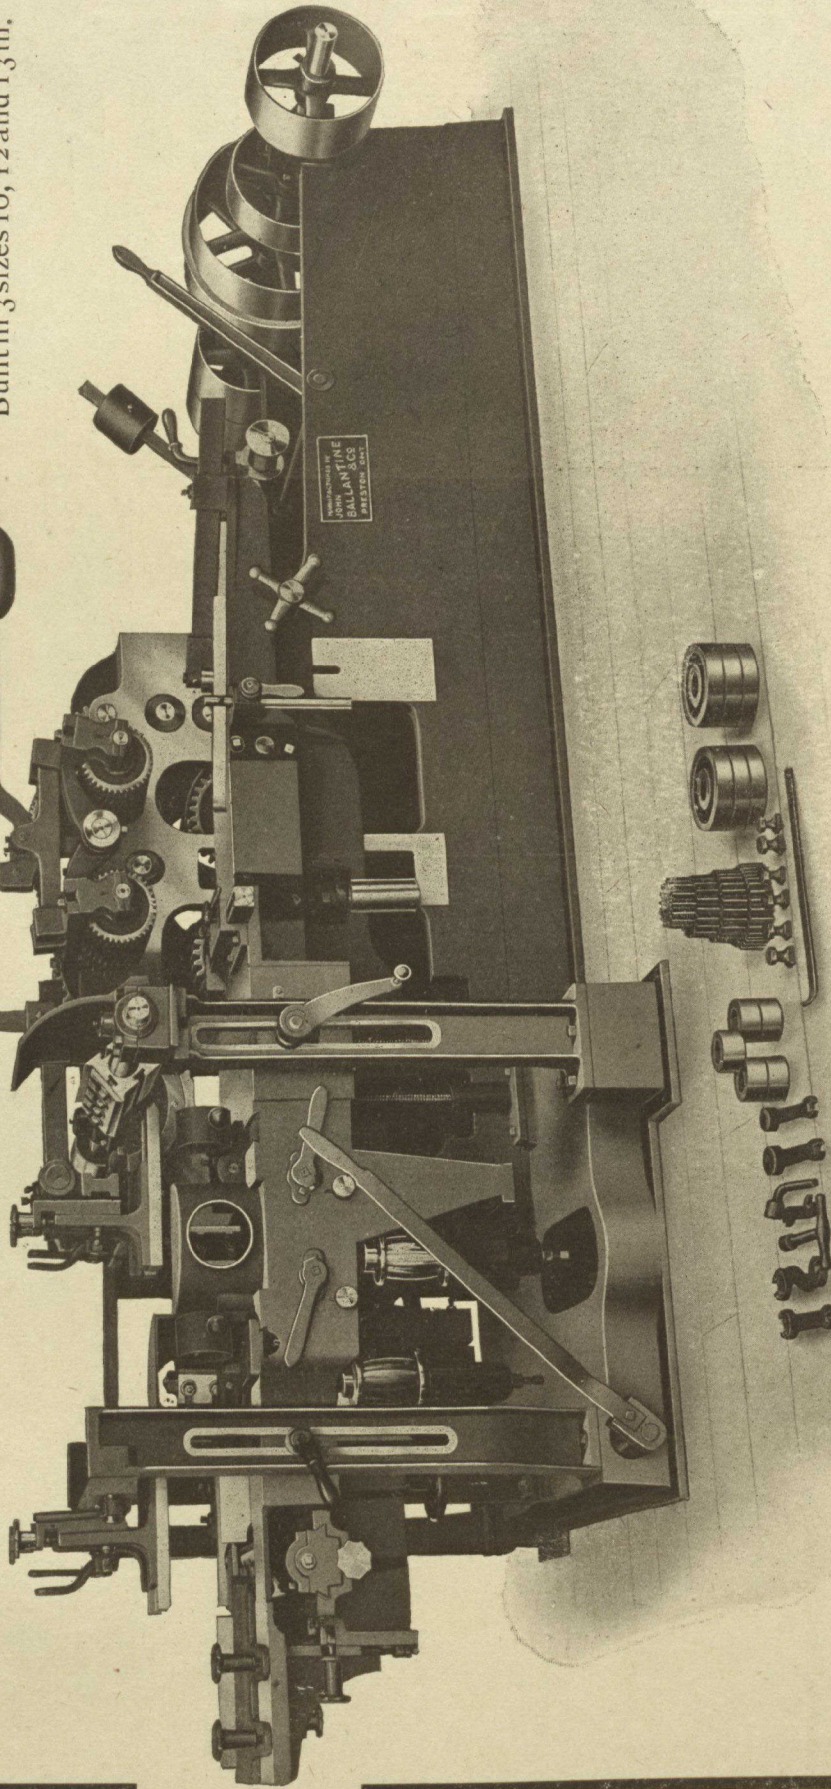

Messrs. J. Ballantine & Co.
Preston, Ont.

Dear Sirs,

The 10 inch Moulder which you put in for us a short time ago is giving splendid satisfaction. There are a number of improvements on it that we particularly like and at the same time it is one of the easiest running machines in our factory.

Yours truly

SANDERSON HAROLD CO. LIMITED.

The above cut represents the best moulder on the market to day. This may seem pretty strong talk but the machine backs it up with results. We have always made a specialty of moulders and think that this is the best yet, but don't take our word for it. Hear what the men who use them have to say. The best firms in Canada use our moulders. Write for a list.

John Ballantine & Co., Limited. **Preston, Ontario.**
