

## MARKET ENTRY STRATEGIES

Canadian companies most commonly enter the Mexican market by forming partnerships or joint ventures with Mexican firms. This might involve an exclusive agent or a distributor of complementary products. For many products, Mexican producers are also potential partners, because many of them lack the capacity to meet domestic demand. The Canadian mining companies now operating in Mexico could also act as agents for imported minerals.

Sales of some minerals can be arranged through Mexican industry associations. In addition to the *Cámara Minera de México (CAMIMEX)*, Mexican Mining Chamber, there are separate associations of copper processors, cement manufacturers, aluminum processors, iron and steel producers and jewellery manufacturers. Contact information is provided at the end of this market summary.
