

# CHAMPION WORKS,

HARRISTON, ONT.

## OUR 8-HORSE CHAMPION *Is a Cross-cut Sawing Machine.*

The saw cuts both ways and runs in guides at both ends. It is a self-gigging machine and can be driven by any threshing machine horse-power. The power can be attached either to the end or side of the machine. We warrant it to cut 18 cords of maple stove wood in one hour. It was awarded First Prizes at Provincial Fairs in 1863, 1868, 1870 and 1872.

We also manufacture

## THE YOUNG CHAMPION **WOOD SAWING MACHINE,**

And the Double-gear'd 4 or 6-horse Pitt's Power, which, we think, will supply a want long felt, for a good, durable horse power and saw rig for farmers' use. The power is the same principle as the 10-horse power in general use, only on a smaller scale. It has chairs for four arms and the horses travel over an iron rod same as the large powers.

The Saw Rig is so constructed that it can be driven by either small or large powers, and it has a combined Power and Hand-gigging Arrangement.

The Log Roller is on a square shaft and will hold any size of log, from 3 inches to 3 feet in diameter, without shifting.

The Log Way has a Roller on the back end, so that long logs can be sawed without moving the car back. By taking out two bolts, the saw and log way can be detached and a belt run from the wheel to drive straw cutter, grain crusher, circular saw, small threshing machine, or any machinery a farmer wants.

PRICE OF 8-HORSE CHAMPION, WITHOUT POWER, \$100  
" YOUNG CHAMPION, WITH LOGWAY COMPLETE 50  
" " " WITH SMALL PIT'S POWER 120
