London, Jan. 22.-The British destroyer Lizard was about two miles from the northeasterly point of the Island of Imbros on patrol duty at 5.20 o'clock Sunday morning when it sighted the warships, Goeben and Breslau (Sultan Selim and Midullu), says an official statement from the admiralty, giving a detailed report of the engagement which resulted in the loss of the Breslau and the beaching of the damaged Goeben.

The Breslau was steaming in northerly direction to the south and east of Cape Cephalo, followed shortly by the Goeben, which was about a mile astern. The Lizard at once gave the alarm and opening fire it proceeded to keep in as close touch as possible with the enemy ships. Mr. Haanel expressed the belief that

Canada need not be dependent upon the United States for its fuel, as there are large lignite and peat resources in this country which can be developed and converted into satisfactory fuel. He said the principal fuel resources of the Dominion are bituminous and anthracite coal, lignite and peat. The coals are in the extreme east and west, and large fields of lignite and peat are in Alberta and Saskatchewan. He claimed that peat could be economically converted fuel, and seven bogs conveniently situated with reference to Toronto and seven near Montreal could be made to supply from 23,000,000 to 26,000,000 tons of fuel. It was agreed that a committee of engineers should study the develop-ment of Canada's water power.

TWO MILLION FARMERS APPEAL TO PRESIDENT

Lord Rhondda Specifies Two Unless the Existing Conditions Are Radically Changed, They Say Last Year's Production in the U.S. Cannot Be Equaled.

> ASHINGTON, Jan. 22.—An appeal to President Wilson to speed up governmental machinery in aid of production, so as to relieve the anxiety of farmers as to labor supply, credit facilities and seed shortage, was made today in a memorial from the federal board of farm organizations in behalf of more than two million organized farmers.

"If food is to win the war, as we are assured on every side, the farmers of America must produce more food in 1918 than they did in 1917. But unless present conditions are radically changed, increased crops next year are impossible. Under existing conditions we cannot equal the production of 1917, much less surpass it, and this for reasons over which the farmers have no control.

. . . "The chief causes which will in-evitably bring about a smaller crop next year, unless promptly removed by national action, are six in num-

1. The shortage of farm labor. 2. Shortage of seed. 3. Prices often below the cost of production.

4. Lack of reasonable credit. 5. Exclusion of the farmer from his right and necessary share in the conduct of the war, and
6. Deep-seated doubt whether he can raise the increased crops demanded of him and still support his family and pay his debts.

"Many thousands of acres were left unharvested last fall because the necessary hands had left the farms. Already great numbers of farms near excellent markets lie idle for lack of a living return. Millions of acres will be wholly or partly idle next summer, because the money to buy seed and subsistence will be lacking. Many of the farmers thus affected are tenants whom misfortune will compel to abandon the farm.

"Comparing their own small earnings with the huge war profits they see on every hand, the farmers have lost confidence that the government understands the needs and difficulties of the farmer. Unless that confidence can be restored, it is useless to hope that we can maintain the food production of last year and meaningless to talk of increasing it."

The interest alone on Quebec's share of Canada's debt would amount to fifteen million dollars, and would be ruinous.
