Sock Social in Knights of Columbus Hall—Other Events in Connection With Object

The handsome quarters of the St. John Council, Knights of Columbus, in Coburg street, given over to the members of the Royal Standard Chapter, I. O. O. F., for their Soldiers' Sock Social today, never appeared in greater attractiveness. For originality of design and wealth and beauty of decorations, it would have been difficult to surpass the scene. Undoubtedly the centre of chief interest was a "Prize Garden" in which was displayed a rich growth of tulips with souvenir packages attached, substantial and well worth having, all donated by local residents and merchants. The other features were of interest as well, a fancy table, home cooking booth, handkerchief booth, tea tables, and others being prettily decorated. The colors of the allies were a predominant feature.

Throughout the day there were numerous generous donations of socks. Since early this morning Mrs. E. A. Smith, regent of the chapter, and her corps of able co-workers have been engaged about the rooms of the Knights and all was in readiness when the crowd began to arrive this afternoon. Besides the sale of home-made candy, prizes, handkerchiefs, aprons and other articles, luncheon will be served in the main hall. The tea and sale will be continued this evening with the admission for ladies being a pair of socks, for gentlemen twenty-five cents and for children ten cents.

At the local headquarters of the Red Cross Society yesterday some 4,000 pairs of socks were received. From Lancaster centre came 1,200 pairs. The total from New Brunswick for the dominion sock day will be a most worthy contribution. THE GERMANS IN RETREAT?

London, April 21—German troops have been compelled to evacuate several hamlets near the Labasse railway, says a news agency despatch from Amsterdam.

"These have not yet been occupied by the British, the enemy's artillery maintains a destructive fire. The Germans are preparing for a partial retreat. The War Office refused to confirm the report that the Germans were preparing to retreat, but the censor permitted its publication. General French's detailed report on the battle that resulted in the capture of Hill No. 80 is anxiously awaited as the British losses were heavy."

PLEBISCITE BUT NOT TILL APRIL, 1916

(Official Report)

Frederick, April 21—In the corporation committee today the Northwest Broom Company's bill was withdrawn. The municipalities committee is taking consideration for a plebiscite in St. John in the ward system to take place at the election in April, 1916. The tax exemption bill is amended to provide for appointment by the common council of a commission to take up assessment. If the council does not make the appointment within three months the lieutenant governor in council will appoint a commission. The office of recorder is abolished.

The bill to confirm the St. John assessment for 1915 was agreed to with amendments.

THE STREET RAILWAY

A group of experts from the United States have been in the city recently and some of them still are here, making a study of the street railway and its allied utilities. The investigation is thorough one, and is covering not only the physical characteristics of the present street railway, but also the possibilities of development and expansion, both in the city and the suburbs, including also some attention to hydro-electric possibilities. Photographs have been taken, surveys made and plans drawn, and when the work of the experts is completed, the result will be a most comprehensive report on the subject. It was reported that the study of the local situation was being made on behalf of a group of outside capitalists who had their eyes on the local company.

When asked about this report, Colonel H. H. McLean, president of the company, said that this was incorrect, and that the employment of the experts was part of the progressive policy of the company. He said that the company was desirous of bringing the plant and equipment up to the highest standard of efficiency, and for this purpose had secured the services of some of the best qualified experts in the United States to prepare a report by which they could be guided in their plans for the improvements of the plant.

He added that the work was being done on behalf of the company, and that there was no prospect of any change in the ownership or control, as the chief stockholders had no intention of disposing of their interests, and the road was not for sale.

DEEPLY MOURN DEATH OF COL. FARQUHAR

Ottawa, Ont., April 21—An interesting letter from Major Hamilton Gault referring to the death of Col. Farquhar and to the work of the Princess Patricia, has been received by Major General Hughes, Major Gault says: "Just a few typewritten lines—I have not yet got the use of my right arm—to thank you again most warmly on behalf of myself and the Princess Patricia for your very kind cablegram of sympathy in the great loss we sustained in the death of our commanding officer. Farquhar to dominated us by his military genius and wonderful capacity, besides being universally beloved by officers and men, that his loss to the battalion is one that never can be replaced. We all felt that he was an indispensable part to the battalion that nothing could ever be allowed to happen to him, and yet you have doubtless heard how he fell by a stray bullet at night, while inspecting some new earth."

Major Gault adds: "Although Farquhar can never be replaced, Captain Buller will make a splendid commanding officer. He has, as of course you know, the absolute confidence of us all, and is eminently qualified for the arduous duties which lie before him."

The writer refers to Donald Cameron's death. Writing from London, he expresses the hope of being back with his battalion in a few days.

THE WAR

(Continued from page 1) from Verdun toward Metz." He says that the strength of the German positions in the Argonne region of France is now more apparent than real. "It seems to be certain," he adds, "that the German army will not draw their heavy guns from Camp des Romains. Confirmation of this would be important, because the British are in the position to occupy St. Mihiel even if the rumors that the Germans have evacuated an offensive to the westward are correct. The German army has quit Camp des Romains."

NEW FIRE APPARATUS ANSWERS DEMANDS

The new motor fire apparatus was given the first test this morning and stood up under severe trials in street work and hill climbing.

The machine is a rather impressive-looking piece of mechanism, gorgeous with red paint, gilt and brass work, and crowded with pipes and valves. It is motor driven and operated, and combines the functions of a pumping engine, chemical wagon and hose reel and, in addition, carried a few ladders and other minor equipment. The engine is 100 h. p.

With the demonstrator at the wheel and Mayor Frink, Commissioner McLean, Commissioner Wigmore, and Commissioner Potts along as spectators, the machine was made to show what she could do, and every demand was declared to be to the satisfaction of the commissioners.

On each hill as Princess and Garden streets, the machine climbed without even going into the low gear, using the second gear for the steepest hills. It is found, and in Waterloo street it traveled right up on the high gear.

One Child Out of Every Five Ought to Wear Glasses

Inspection of thousands of children by competent eye specialists show that almost one-fifth of children of school age should be wearing glasses.

This does not mean life-long use of glasses. On the contrary, in the great majority of cases use of glasses for a few years—in many instances for close work only—will protect the eyes, developing strong sight so that glasses need no longer be worn.

The crisis is right now. Being your child to Sharpe's and have a careful scientific examination of the eyes made. Such an examination is the only means of telling the condition of the child's eyes, and you can hardly rely on the advice of Sharpe's optometrists as to whether or not glasses are needed.
