EDISON

Diamond Disc Phonograph

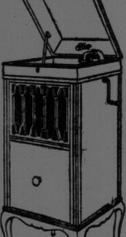

A Gift that Brings Pleasure to all

In this marvellous new creation of Mr. Thomas A. Edison there is more real pleasure, for folk of all ages, than in any gift one can bestow; and it is a new development in the realm of music, its rich, mellow voice growing out of a system of tone production on which its great inventor has spent the greater part of the past three years. With the permanent diamond as a producing point—eliminating the irksome changing of needles—the music possesses a sweetness that is unique.

The Edison Diamond Disc Phonograph stands alone in the production of all the overtones, on which music depends for sweetness, thus first opening to all the entire range of the world's music.

A few of the many styles we are showing are described below.

Model A 200 MAHOGANY Price, \$250.00

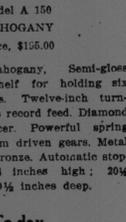

Cabinet, Mahogany, Semi-gloss Finish; has large drawer holding 36 Edison Disc Records. Twelve-inch turn-table. Automatic record feed. Diamond Point Reproducer. Powerful spring motor with worm driven gears. Metal parts gold plated. Automatic stop. Dimensions: 47 inches high; 20 1/2 inches wide; 20 1/2 inches deep.

Model A 80 MAHOGANY AND OAK Price, \$100.00

Cabinet, Mahogany, Semi-gloss Finish, or Quartered Oak, Golden Finish. Twelve-inch turn-table. Automatic record feed. Diamond Point Reproducer. Metal parts nickel plated, buffed and polished. Spring motor. Turn-table stop. Dimensions: 17 inches high; 18 1/2 inches wide; 23 1/2 inches deep.

Model A 150 MAHOGANY Price, \$135.00

Cabinet, Mahogany, Semi-gloss Finish; has shelf for holding six record portfolios. Twelve-inch turn-table. Automatic record feed. Diamond Point Reproducer. Powerful spring motor with worm driven gears. Metal parts oxidized bronze. Automatic stop. Dimensions: 44 inches high; 20 1/2 inches wide; 20 1/2 inches deep.

GERMAN IRON CROSS PINNED ON BRITISHER'S BREAST ON THE FIELD OF BATTLE

One of the noblest and, at the same time most dramatic stories of battlefield heroism that the war is likely to produce is as follows:—

During a recent combat German troops attacked the British trenches but were repulsed. They retired to their own trenches taking with them their wounded, but one of the latter was overlooked and left behind. A comrade, observing him, left the German trenches to effect a rescue, but was almost immediately killed by the British fire, a score of bullets piercing him.

A British officer, however, realized the situation and, having given the order "Cease fire," himself went out upon the open to pick up the wounded German.

He was struck by several bullets and badly wounded, but the Germans, as soon as they saw what his object was, also ordered the "Cease fire," hereupon the British officer staggered to the fallen man and carried him to the German line.

A German officer received him with a salute and, calling for cheers, pinned upon the breast of the British hero an Iron Cross, which he took from his own breast. Then the Britisher returned to his own trenches.

He was recommended for the Victoria Cross for this notable example of chivalry, but succumbed to his wounds.

ENGLAND THROWS 250,000 BOY SCOUTS ALONG COAST

HEAD OF BRITISH BOY SCOUTS TELLS MARY BOYLE O'REILLY HOW ENGLAND LEANS UPON ITS BOYS, WHILE OLDER DEFENDERS ARE RUSHED TO BELGIAN BATTLEFIELDS

(By Mary Boyle O'Reilly)

London, England, Dec. 2.—"England must expect to be attacked at home. She must not rest under the comfortable delusion that she will not be assailed," said the "Chief Scout," Lieutenant General Sir Robert Baden-Powell.

"We must be ready for the worst. A hostile raid on the Yorkshire coast, a rapid march straight across the country, the enforced flight of inhabitants, the demolition of their cities and towns by dynamite—and there are at once fourteen million people starving and on the hands of the little army of the south.

"It is the duty of every patriot to take up arms now with no feeling of aggression or bloodthirstiness, but solely for the protection of our country in the hour of danger.

"There are 250,000 Boy Scouts in England. Before war was declared 50,000 were mobilized. They have been at their duties ever since. Two thousand were drafted to assist the metropolitan police, 2,000 as orderlies in government departments, thousands to guard railway tunnels, telegraph lines, bridges, culverts against damage by agents of the enemy.

"Early in the test a fool who thought he was funny suddenly appeared before three little scouts guarding a tunnel. He wanted to see if they were alert, so he assumed a German accent. The lads had only their staves, but he woke up under first aid. They were human boys on active service watching and waiting—for war.

"From the first day of danger seventy troops of sea scouts began coast patrol which will be permanent until the declaration of peace. Those who are under school age receive instruction in special classes during alternate weeks.

"Today 1,300 sea scouts are stationed from John o' Groat's to Dover keeping watch and ward along the East Coast. They are only boys, but they have been at their posts through daylight and dark.

"Their job is to do their duty, to keep their mouths shut and their eyes open. They have won official recognition, admiralty are paying for their subsistence; they serve as volunteers.

"Each patrol of six sea scouts is living with two coast guards in any handy shelter; tents, bathhouses, shacks furnish emergency stations. On duty patrols are building themselves winter huts, the handy "men" fashioning sleeping boards, locker and mess tables. The sea scouts cook for themselves.

"They are trained on the sands in swimming, rope climbing, the handling of boats, and taking bearings. The older ones grow proficient in flag hoist signaling and wireless telegraphy. Sea scouts are not playing now; some, expert with wireless apparatus, are on board steam trawlers today acting as guard boats against floating mines.

"A determined small boy in jolly looking knicker and khaki shirt gets about with amazing ease. A defence corps patrol holding "conversations" with flash lights can guard a score of back waters. Boy Scouts, land or sea, have a startling habit of turning up in the nick of time. Let a bare-kneed lad hold up his hand, wig-wag a flag, and, presto, other scouts spring from the ground to assist.

"Each sea scout on active service has his beat, four hours on, four off, systematically observed and vigorously kept, reports being made to the local coast guard.

"Armed with shaves they patrol in pairs along broken cliff tops, across leagues of dunes and desolate salt marshes. Through foggy days and cold nights they are always on watch.

"However dreary or monotonous the career, they are no longer any malle between England and Germany. Foreign seamen acting as messengers, suspicious flashlights or whistles, suspicious lurkers off shore, dead dealing mines washed up which must be guarded until a torpedo expert arrives to render them innocuous.

"And what do the sea scouts find? Enemy pigeons flying across channel. (Note: There are no longer any mails between England and Germany.) Foreign seamen acting as messengers, suspicious flashlights or whistles, suspicious lurkers off shore, dead dealing mines washed up which must be guarded until a torpedo expert arrives to render them innocuous.

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by systematic treatment. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed, it swells and shuts out the sound waves, and when it is entirely closed, deafness is the result. It is of vital importance, therefore, that this tube should be kept open and its mucous lining restored to its normal condition. We give One Hundred Dollars for any case of Deafness cured by Catarrhitis cannot be cured by local applications. Send for circular, free of charge.

Microbes in Your Scalp

Authorities say that a microbe causes baldness. If you are losing hair try our remedy at our risk.

Professor Unna, of Germany, and Dr. Sabouraud, of France, the great French Dermatologist, claim that a microbe causes baldness, and their theory has been verified by eminent scientists. This microbe destroys the hair follicles, in time causing the scalp pores to close and the scalp to become shiny. Then, it is believed, nothing will revive the growth. If treated before this occurs, baldness may be overcome.

We know of nothing that has given such universal satisfaction in treating the scalp and hair as Rexall's "93" Hair Tonic. It has been designed after long study to overcome the cause of falling hair as discovered by Prof. Unna, Dr. Sabouraud and other scalp and hair specialists, and we believe it will do more than anything else can to remove dandruff and stop falling hair; and if any human agency can promote a new growth of hair it will do that, too.

We want you to make us prove it. We will pay for a month's treatment of Rexall's "93" Hair Tonic used during a trial, if you will use it according to directions, and are not thoroughly satisfied. When we will do this, you surely should not hesitate at least try it.

Start the treatment today. Your money request will get you money back if you want it. Two sizes, 50c and \$1.00.

You can buy Rexall's "93" Hair Tonic in this community only at our store:

The Rexall Stores 100 King St., 473 Main St. and 599 Main St.

There is a Rexall Store in nearly every town and city in the United States, Canada and Mexico. There is no other Rexall Store except the one in your town. Rexall's "93" Hair Tonic is the only hair tonic specially designed for the particular ill of falling hair.

The Rexall Stores are America's Greatest Drug Stores

SEES GREAT FUTURE FOR THE SUBMARINE

German Officer Writes of Its Use in Warfare—Constantly Enlarging Under-sea Craft

The Norddeutsche Allgemeine Zeitung publishes an analysis of Germany's submarine policy from a prominent German naval officer who foresees the coming of vastly large submarine boats, or, rather, submarine ships.

"It is of vital importance," he writes, "for the future development of submarines (U boats) that torpedoes should be brought to the greatest possible perfection. Improvement should depend on the torpedo tubes and torpedoes with which the boats are furnished, on their speed and efficiency, as well as on their handling and management.

"The number of tubes and consequently of torpedoes has been constantly increasing. Thus English submarines have as many tubes as six and even more, so that we may soon be able to speak of submarine ships. One of the causes which led to the enlargement of submarines was the desire to provide them with more torpedoes so that they might take full advantage of a fortunate encounter with an enemy. At present U boats generally are the size of their sisters, the faster torpedo boats.

"At first U boats were merely intended to defend the home coasts, but soon their unexpected efficiency destined them to become independent rulers of the waves. They were able to remain under the water for some time and were fairly safe and secure. Undersea navigation, being comparatively smooth even in an agitated sea, pointed out the desirability of building boats which could be on the sea at least as long as torpedo boats. It is known from war reports that at present we are sufficiently advanced to send U boats independently to the North Sea and the Baltic.

"Our U boats are constantly enlarged so that they may surpass the enemy's boats in size and fighting value, but chiefly in order to make an even wider use of them.

"Previous submarine successes show that with some good fortune it is not so very difficult to attain good results. But the handling of U boats more than of others requires a great deal of perseverance, caution and courage. Of course it must be admitted that the prospect of a great success is a powerful impetus and stimulus for everyone who is engaged in submarine action. To hunt up the enemy is often left to chance, but it requires considerable time and experience to get within shot of a vessel and to succeed in eluding the pursuer. It is a recognized maxim for U boats not to withdraw from the water until they are very prospect of shooting at an object in sight, on the surface of the water, which serves to indicate what is in sight on the surface of the water, is exposed to sight no longer and often to absolute necessity. The periscope is the most valuable part of the diving boat and betrays its location. At the same time the wake left by the passage shows the boat's course; hence these submarines are at a great advantage which make ready for attack without exposing the periscope except rarely and for brief intervals. Any moment the enemy by successful shooting may spoil a submarine's good chance; hence it requires much skill on the submarine's part to fix the proper time for discharging the torpedo.

"If a menaced ship cannot escape from danger in time it will take the offensive

An Interesting Collection of Diamonds

"Our Diamonds" are all of unquestionable quality, are mounted in the newest designs of settings, either in gold or platinum. They constitute a special feature of our large stock of "Fine Jewelry."

The assortment to be found here is always full of interest. The high qualities, exceptional designs and reasonable prices have attributed much in making our stock so attractive to lovers of Fine Jewelry.

We cordially invite your inspection.

Frank Skinner

60 King Street

and try to ram the hostile boat, which must be prepared for the onslaught and attempt to evade the danger sideways or to dive deeply.

"Submarines are, relatively speaking, a greater source of strength to a feebler naval power than to a more powerful one. So we can quite understand that even the mightiest navies feel somewhat paralyzed if they are opposed by an enemy provided with a fair number of submarines. An efficient means of combating the U boats has not yet been invented, but might be looked for, in the first place, in the shape of some aircraft."

Constipation, Indigestion and Horrible Backaches

Searched for a Cure for Years—Advised to Try Dr. Chase's Kidney-Liver Pills and Was Cured.

Where there is poison there is pain. This is a provision of Nature to warn you against conditions that are likely to prove serious.

Constipation of the bowels is undoubtedly the greatest source of disease and suffering. By using one of Dr. Chase's Kidney-Liver Pills at bed-time as often as is necessary to keep the bowels regular you can cure constipation and the consequent indigestion, and remove the cause of backache, rheumatism and other painful diseases.

"Daily movement of the bowels" is the greatest law of health. Dr. Chase's Kidney-Liver Pills will help you to form this habit, add to your years and bring comfort in old age.

Professor A. T. Smith, 1 Mt. Charles street, Montreal, and formerly of Boston, Mass., writes:—"I suffered for many years from bad digestion, constipation and horrible backaches. I have been treated by many doctors, without any result. One day a friend in Boston advised the use of Dr. Chase's Kidney-Liver Pills. After using two boxes I noticed great improvement and after the fourth box I was completely cured. My digestion is good. I never feel any pain in the back. My head is clear, and I feel like a young man. I think Dr. Chase's Kidney-Liver Pills are one of the best medicines on earth."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, at all dealers or Edmondson, Bates & Co., Limited, Toronto.
