

ESQUIMALT CHOSEN

Select Committee of the Council and Board of Trade Choose Smelter Site.

As No Available Site Can Be Secured in the City Limits They Select Esquimalt.

Power To Be Asked from Legislature to Grant a Bonus Outside the City Limits.

The regular meeting of the city council was held yesterday evening, when the following letter was received from Mr. Selover regarding the smelter proposition:

Dear Sir, Victoria, B.C., April 6, 1897. To His Worship the Mayor and Board of Aldermen of the City of Victoria: Gentlemen: Agreeable to and in conformity with the resolution passed by the joint committee appointed by His Worship the Mayor and Board of Aldermen to meet and agree upon some plan with us for the erection here of a smelter, we have the honor to advise you that we have agreed to operate for a period of 30 days or more, to demonstrate to you that our plant is what is known as a steam plant. Immediately thereafter the sum of fifty thousand dollars cash shall be paid to our trustees, one year from the date of said test a further sum of fifty thousand dollars shall be paid to said trustees, and two years from the date of said test a further and final payment of fifty thousand dollars shall be paid to the said trustees, making in all the sum of one hundred and fifty thousand dollars.

If this proposition meets with favor and is approved by the city council, we are ready to begin active operations and push the same to completion. Very respectfully submitted, W.M. SELOVER, JR.

The report of the special committee formed to consider the matter, which was then presented was as follows: "Your committee in conjunction with a committee from the Board of Trade held two meetings, at which Mr. Selover and Mr. Remington were present, and after considerable discussion the following resolution was adopted: "That the proposition of the Selover syndicate for the construction and equipment of a smelter to cost \$450,000 and to be capable of treating 400 tons of ore per day of 24 hours be adopted for submission to the council, the payment of the bonus to be made on the following terms, namely, \$50,000 within 30 days of completion of works and demonstration of the capacity of same as specified, a further sum of \$50,000 to be paid within twelve months from date of the first payment, and the balance of \$50,000 to be paid within two years from said date of first payment. This resolution was moved by Hon. B. W. Pearce and seconded by Ald. McGregor. Since the resolution was passed Mr. Selover, on behalf of his syndicate, has accepted the proposition set forth in the resolution.

"Mr. Remington informs us," the report said, "that the only available site in the city limits is the Indian reservation, and his opinion is that it would not be advisable to locate a smelter in the heart of the city, and would recommend that the legislature be requested to give the city power to bonus a smelter at Esquimalt where a suitable site can easily be had.

The following letter was also received from Mr. Selover: "I beg to advise having received a dispatch from my syndicate stating that the terms of payment of the bonus are accepted. I shall be glad to complete the negotiations as soon as possible, my syndicate being prepared to proceed with their undertaking at once."

Ald. McCandless moved that the report be adopted. The committee had, he said, searched the city for a site, but there was not a suitable location for a smelter inside the city limits. He thought the legislature should be asked to allow the council to bonus a smelter outside the city limits. Ald. McGregor, who seconded the motion, was of the same opinion. The resolution was then put and carried.

Among the other communications received was a letter from the office of Mr. Ritchie, acknowledging the receipt of \$150, the payment of that cashier for his inspection and report on the Beaver Lake water works. This was received and filed.

Munroe Miller, president of the Fruit-growers' Association of Victoria district, wrote asking for another interview with the city council in reference to the use of the city market stalls. The request was granted and a meeting with the fruit-growers will take place on Wednesday afternoon next at three o'clock.

D. F. Adams, who supplied the lumber to the city under contract with the last council, wrote "as a taxpayer," asking that the matters relating to the purchase of lumber be gone into and complaining of orders for the supply of lumber being given to other firms. All Stewart moved that the letter be received and filed.

"No," said Ald. McGregor, "it's not awarded Highest Honors—World's Fair, DR. ROBERTZ'S CREAM BAKING POWDER MOST PERFECT MADE. A pure Grape Cream of Tartar Powder. Free from Ammonia. Used on any other adulterant 40 YEARS THE STANDARD.

CITIZENS UNANIMOUS

Government Called Upon to Grant Aid to the Coast-Kootenay Railway.

They Do Not Want the Penticton Line Bonus Handed Over to Mr. Heinze.

Mr. Helmcken Falls in Line With Public Opinion and Favors the Scheme.

The people of Victoria at the public meeting held last evening again endorsed the Coast-Kootenay railway scheme and urged upon the provincial government the desirability of assisting the road.

The meeting was unanimous and consequently harmonious. Mayor Redfern was voted to the chair and read the requisition, already published, on which the meeting was called. The requisition was signed by 112 resident ratepayers of the city. Without adding anything to the requisition the mayor called on Ald. McCandless, who explained that he was not interested in the Victoria and Eastern railway, nor had he been asked by any member of the company to work for the line. He supported it because he had been through the Kootenay country and believed the road would pay for the start, which was more than could be said of some roads now running. The line, he believed, was more necessary than other lines for which aid was being asked. Some roads proposed to lead population into the country which they were to pass through, while this line had a population at each end. When Marcus Smith explained the country through which the Coast-Kootenay railway would pass he was looking for a one per cent. grade. Things which were not thought impossible are now quite practicable. A three or four per cent. grade is not a matter with Mr. Heinze. The line would not be as hard to build as had been other lines through the mountains. He believed the problem of British Columbia's prospect was about to be solved. He moved as follows:

That in the opinion of this meeting, while not detracting from the importance of the Victoria and Eastern railway, section by rail with the developed mines of the Kootenay country would be far more profitable and a more direct and unobstructed connection with the coast cities. Therefore he resolved that the citizens of Victoria, in meeting assembled, urge upon the provincial government, through the aid of the Hon. Mr. Turner, the immediate government aid as will guarantee the commencement within three months of the construction of a coast line to Kootenay within two years.

That the information already obtained as to the feasibility of a road through the Hope mountains justify the government in guaranteeing the construction of the same to Kootenay within two years.

Be it resolved that the continued business depression and other causes of value in British Columbia justify the government should urge upon the provincial government, through the aid of the Hon. Mr. Turner, the immediate government aid as will guarantee the commencement within three months of the construction of a coast line to Kootenay within two years.

That the information already obtained as to the feasibility of a road through the Hope mountains justify the government in guaranteeing the construction of the same to Kootenay within two years.

That the information already obtained as to the feasibility of a road through the Hope mountains justify the government in guaranteeing the construction of the same to Kootenay within two years.

THE LOAN BY-LAWS

Very Little Interest Taken in the Voting To-Day.

Little or no interest was taken to-day in the voting on the by-laws to borrow \$17,000 for improving the Boys' Central and High Schools and to increase the grant for the public library.

In Centre Ward the vote was: School by-law, for, 11; against, 86; Library, for, 34; against, 66.

In North Ward the vote polled was 259. The School by-law was defeated by about four to one, and the Library by-law by 2 to 1.

CONVINCED THE SCEPTIC

The Merits of the Great South American Nervine Withstand All the Assaults of the Creditors and Sceptics—When They Are Converted into Its Use in Their Personal Aliments They Become Its Best Friend—For It Never Fails Them.

Mr. Dinwoode, of Campbellford, Ont., says: "I recommend South American Nervine to everybody. I consider it would be true to the best interests of humanity were I not to do so. In one instance I was convinced an avowed sceptic to all remedies of his curative powers; he procured a bottle, and it has been of such benefit to him that he continues to urge upon our members, Messrs. Turner, Mr. O. David, which deals with their influence towards the securing of such immediate government aid as will guarantee the commencement within three months and the completion of a road to Kootenay within two years."

QUITE A SENSATION

Important Statement by the Rev. Father Pichon at Montreal.

Montreal, April 14.—Quite a sensation was caused by the remarks of the Rev. Father Pichon, during one of his sermons to the Society of the Daughters of Mary yesterday afternoon. In the course of his remarks he stated that Catholics should suspend their judgment about the actions of the Liberal government and about the book of Mr. L. O. David, which deals with the clergy in politics, till they found out what action the papal legate was to take about these things. The preacher is a Jesuit father.

COMMITTED FOR TRIAL

Harry Burns Guilty of Attempting to Poison His Wife.

Montreal, April 14.—Harry Burns, of Sherbrooke, formerly a conductor on the Boston & Maine Railway, and lately a tenniser, was committed for trial on the charge of attempting to poison his wife, by means of iodine. He was indicted with a woman named Sanbury, and suspicion was aroused by the character of a ten-page letter which he wrote to her, and which was accidentally discovered. High Constable Moet testified that the prisoner had admitted that the iodine was procured by the prisoner in his medicine his wife was taking, not, he said, with a view to poison her.

DR. CHASE CURES FATHER AND CHILD

Both afflicted with Eczema of a very troublesome type and cured in a remarkably short while by Dr. Chase's Ointment.

"I was troubled for ten years with eczema on one leg; the itching was something terrible; would scratch until the blood came. How I came to know the value of DR. CHASE'S OINTMENT, I have a little girl two years; when she was one year old the same disease began to show upon her face. It was long before her face became liberally covered with it. In order to keep her from scratching it I had to bandage her hands up. I tried several doctors, but got no relief. Seeing DR. CHASE'S OINTMENT highly advertised I made up my mind to purchase a box, which I did from one of our druggists. The first application I noticed a change. It was then I began to think about myself. With four or five applications to my face, I am completely cured, no sign of the disease, and my little girl's face is clear of all the scabs. I am only too glad to inform any person what a blessing DR. CHASE'S OINTMENT has proved itself."

"H. R. WHELAN, 'Narwood, Ont.'"
