The London & Windsor

(Continued From Page 3)

are flush with the table top. A very strong style of stool, doubly braced and bolted, is used and a sloping top to the supply cupboard seems to have overcome the dust nuisance.

All blackboards are of slate. In the Art and Drafting Rooms an additional board is made of cork carpet for attaching sketches etc. In rooms using "T" squares, one of a section near the centre of the slate board is squared and lapped to permit of the use of a "T" square. In Chemical and Physical Laboratories the work tables have heavy tops of Cypress wood stained dark with acid proof stain and are fitted with gas and direct and indirect current connections. The work tables in the Chemical Laboratories also have removable panels at ends and sides to facilitate repairs when needed.

In the Detroit High School Physical Laboratory a side table extends the full length of the room, top of soap stone, and fitted with water and gas connections. In the Windsor Collegiate a fume chamber subdivided and spaced for work in metallurgy as well as for the ordinary chemical processes is an important feature. It is ventilated by a local electric fan. The teacher's demonstration tables in the Physical and Chemical Laboratories have tops of soap stone, porcelain troughs, gas and electric connections and also connections for compressed air.

A very strong feature of the Windsor Collegiate Physical Laboratory is the very complete switch board which controls and delivers to any table either alternating or direct current of any voltage or amperage within certain limits. Another feature is a very convenient dark room for developing prints etc. Types of desks and chairs—very varied.

A separate chair of a good strong pattern seems to give the best satisfaction. In the Lecture rooms this chair is fitted with a fixed leaf or arm. Best type was noticed in Detroit High School where the chair was fitted with a lower shelf of slats about four inches from the floor.

The Notice Boards in the London Technical are placed at the end of the main corridors and are under locked glass doors.

In the London Technical the Millinery, Embroidery and Sewing Rooms are fitted with flat tables having a foot rest in the form of a strip running lengthwise. Also, with steel lockers, water supply and machines.

Courses:—The London Technical has in operation the following courses: Day Courses:—

1. Technical Course for Boys. This course is open to boys with High School Entrance standing and prepares them for the higher directive positions in the industries.

2. Technical Course for Girls. This course is open to girls with High School Entrance standing and prepares them for the home activities and such positions as nurses, dietitians etc.

3. Matriculation Course for Boys and Girls. This course is open to boys and girls with High School Entrance standing. It qualifies for the Applied Science and Household Science Department of the University.

4. General Industrial Course for Boys. This course is open to boys who have reached the 7th or 8th Grade of the Public or Separate School and prepares them for successful industrial careers and to become foremen.

5. General Industrial Course for Girls. This course is open to girls who have reached the 5th or 8th Grade of the Public or Separate School and provides them with a good general education and prepares them for the homemaking activities.

6. Special Part-Time Courses for Girls. Girls who are 14 years of age or over may take Special Days Classes in Dressmaking, Millinery, Embroidery and Cooking. Each subject takes two half days a week.

7. Special Day Co-Operative Classes offered.

Evening Classes for Men and Boys:—Machine Shop Practice, Tool-making, Welding, Automobile Mechanics, Plumbing and Steam Fitting, Cabinet Making, Carpentry and Joinery, Building, Construction Electric Wiring, Science of Electricity, Drafting and Blue Print Reading, Art, Industrial Design, Showcard Writing, Industrial Chemistry, Mathematics and English.

Evening Classes for Women and Girls:—Dressmaking, Millinery, Tailoring, Embroidery, Cooking, Home Economics, Automobile Mechanics, Wood Carving, Art, Showcard Writing, First Aid, Home Nursing, Science of Electricity, English and Mathematics.

Special Afternoon Classes for Women and Girls:—Dressmaking, Embroidery, Ladies' Tailoring, Woodcarving and Art. Fees: Fees for Evening are \$5.00 for a six months' course of two or three evenings per week.

Public Schools:—All the Public Schools of London provide complete Manual Training and Household Science courses for all 7th and 8th Grade pupils,—that is, each pupil has an opportunity to take this work during the last 3 years of the Public School Course. Each of the never schools—some 19 in all—has complete Manual Training and Household Science equipments and one instructor in each department takes charge of two schools.

Windsor Collegiate Evening Classes:—The School is open practically every evening of the week for instruction in subjects of Industrial value to persons employed either in their own home or in the trades and industries.

Highland Park High School, Detroit:—A stone structure designed to accommodate 2500 pupils, at present at present, 1800, with a staff of 120 teachers, about 1-3 being man. Estimated value of buildings and equipment is placed at two million dollars. A special feature to it was the two very fine gymnasiums, each large enough to permit of two basketball games occurring at the same time. The bacteriology department makes ten unit analyses of the water in the swimming pools in order to maintain a high degree of efficiency. Respectfully submitted, D. Forsyth, Principal.

BELGIAN RELIEF FUND
Ontario Branch: 95 King Street West, Toronto
CLOSING MARCH 31st.
The work hitherto performed by Relief Organization will be undertaken by the Belgian Government after March 31st. Contributions of money and clothing will be received at 95 King Street West, Toronto, until that date.
Fund For Belgian Orphans of the War
will, however, remain open, but contributions for this Fund must be sent to N. Coor, Consul-General for Belgium, Ottawa, Ontario. Monsieur E. Pollet, Consul-General for Belgium, London, England, makes the following appeal:
"The LIBERATION OF BELGIUM does not solve the problem of the future of the war orphans."
"Some idea can now be formed of the number for whom we shall have to provide. It can be stated that the orphans whose parents were deported and who died in Germany number more than those whose fathers have fallen on the battlefield."
MRS. ARTHUR PEPLER, Chairman.

A Good Reason
why the **ECONOMIC STORE** is always busy.
