

LIGHT

Daylight costs nothing. Luxfer Prisms bring it into dark places.

The saving you make is worth the trouble of getting our booklet and learning how to discard artificial light.

The booklet is free.

BANDAND CIRCULAR RE-SAWS

are a necessity in a saw-mill. They increase the capacity of a mill one-third when logs are small, by slabbing heavy and re-cutting all slabs on re-saw, using a 19-gauge blade.

They make two plump boards out of a bad face deal.

Transfers supply them and not over four extra men required to run one

If some large mills can use three and four, you can surely find one profitable. Will be pleased to send you particulars and prices.

WATERLOO, BRANTFORD CAN.

11 Years of Progress

There is an old saying, but a good one: "You can't stand still—you must either progress or go backwards." Leaky Radiators are relics of an old-fashioned past—the Safford Radiator has screw nipple connections and CAN'T leak.

It is the result of progressive action on the part of the largest Radiator Manufacturers under the British Flag. It is the original invention in pipe-threaded connections for Radiators. Eleven years of progress mark its supremacy—its achievements. It has withstood the unequalled test of time.

Reasons: No bolts, rods or packing. Light, durable, perfect finish of castings. Stand a pressure of 140 pounds to the square inch. Free, positive, quick circulation of heat. Fit curves, circles, angles. You can't buy better than the "best" there is or can be.
