You
Know....

GYNURA or Purple Passion Plant can be successfully grown in medium to low light. The secret is to keep the soil on the dry side and pinch out the growing tips frequently to encourage branching.

AR25

*Anniversary
Edition*

In celebration of our 25 years of success in the high fidelity industry, we at AR have designed the new AR25 Anniversary Edition loudspeaker. On a price vs performance basis, the AR25 offers you an unbeatable value.

The AR25 includes AR innovations found in the world-famous AR9. The AR25 is a two-way system with a vertical driver array to guarantee a crisp stereo image.

In addition, the liquid-cooled tweeter uses magnetic fluid to dissipate voice coil heat, permitting greater power handling in the speaker. A two-position crossover switch adjusts the highrange level.

The substantial 18 litre enclosure, coupled with our own AR-made woofer, provides a solid bass response.

Watch for the AR Speaker Show
November 7 & 8 in the Arts Court Lounge, HUB.
