

- Hyaline degeneration in muscle bundles of myoma, 85
 of blood-vessel walls in myoma, 86
 of heart muscle with necrotic myoma, 423
 of myoma, 8, 12, 83-125
 relation to sarcomatous transformation, 93, 232
 with formation of large cysts in myoma, 90
 with liquefaction and cyst formation, 88, 89
- Hyaline material degenerated and containing cholesterol crystals, 92, 124, 125
 tissue, gradual liquefaction of, 103
- Hydatidiform mole resembling myomatous uterus, 480
- Hyronephrosis with myoma, 397
- Hydrosalpinx in myoma cases, 338, 396
- Hydroureter with uterine myoma, 381, 396, 399, 414
- Hypertrophy, cardiac, with myoma, 414
 of bladder wall, 370
 of cervical mucosa in myoma cases, 297
 of cervix in myoma cases, 441
 of round ligaments in myoma cases, 363
 of uterine glands with myoma, 316, 325
 of uterus, with myoma, 11
- Hysterectomy for myoma. *See Hysteromyomectomy.*
- Hysterical manifestations following abdominal myomectomy, 547
- Hysteromyomectomy, abdominal, 588, 626, 641
 accidental ligation of ureter during, 382
 acute mania after, 661
 adenocarcinoma of body of uterus overlooked at, 286
 after abdominal myomectomy, 559
 on account of development of other myoma, 561
 after-treatment, 627
 almost fatal bleeding from accessory branch of uterine artery in, 623
 anesthetic in, 590
 appearance of cervical stump after, 599
 bed-sore after, 662
 bisection of uterus in, 608, 683, 684, 685.
 See also Bisection of uterus.
 bronchitis after, 668
 bronchopneumonia after, 668
 cardiac complications after, 660
 clamping of cardinal vessels and application of ligatures, 600
 closure of cervix in, 596
 complications following, 654, 668
 constipation after, 659
 cystitis after, 657
- Hysteromyomectomy, abdominal, dark-brown vomitus after, 658
 death after, causes of, 672, 673, 681, 682, 683, 684, 685
 difficult, 58, 630
 edema of legs after, 658
 employment of round ligaments in suspension of cervical stump in, 603
 extensive removal of cervical mucosa during, 691
 fistula in ano after, 660
 from below upward, 612
 gangrene of ovary and, 222
 gradual absorption of adhesions after, 644
 hallucinations after, 661
 heart complications after, 660
 hematoma during, 623
 hemorrhage after, 654, 681
 during, 620-623
 local applications as means of checking, 588
 hot flushes after, 603
 immediate removal of appendages in, 607
 results from, 672
 in apparently inoperable myoma case, 636
 in constitutional bleeder, 625
 in intestinal adhesions, 633
 in kidney diseases, 625
 in myoma adherent to abdominal wall, 630
 associated with pelvic abscess, 635
 filling pelvis, 631
 in syphilis, 625
 indications for, 590
 infection of cervix after, 664
 injury of bladder during, 371, 374
 to rectum during, 387
 to ureter during, 382
 inspection of uterine cavity for cancer and myoma for sarcoma in, 594
 intestinal obstruction after, 659, 677
 worms after, 659
 irrigation of abdominal cavity after, 620
 left to right, with removal of appendages, 606
 location of ureters during, 385
 multiple abscesses after, 664
 myocarditis as cause of death after, 682
 nausea after, 658
 nephrectomy after, 384, 385
 nephritis after, 657
 nervous phenomena after, 661
 obstipation after, 659
 operative complications, 630
 partial suppression of urine after, 657
 passage of enema into abdominal cavity after, 391
