And practically every department
of the Dominion Government at
Ottawa.

The Dalton Adder

THE Dalton Adding Machine, with only ten keys, does more than the old style machines with eighty or one hundred keys---and does it quicker. In fact, it is the fastest adding machine ever touched by the fingers of an operator.

In its operation there is no jumping from column to column---you simply depress the keys in the order in which the figures occur in the amount. The machine automatically places units under units, tens under tens, etc., without the operator giving the matter a thought.

The DALTON adds, subtracts, multiplies, divides, figures fractions as well as whole numbers, cross-foots, computes interest; figures costs, payrolls, charge sheets; pro-rates, verifies invoices, foots trial balances, checks postings, figures percentages and discounts, makes out monthly statements. In fact, the DALTON takes care of anything that comes under the head of figure work with ease, accuracy and dispatch, rendering a physical audit slip of the work performed.

THE DALTON is sold through our offices in all Canadian cities. DALTON users anywhere in the Dominion are assured of the same efficient service that goes with the Underwood typewriter.

IF YOU are interested in an adding and calculating machine---simpler, faster, of broader scope, and more efficient than any other you have seen---we are ready to show it to you in your own office. A request for a demonstration, or for literature, will receive prompt attention.
