

Have "a roof that's proof"

Proof against rain, snow, sun, wind, heat, cold, sparks, alkalis, acids—everything that harms ordinary roofs. Get the roofing made of Nature's perfect weather-proofer—

Genasco
THE TRINIDAD-LAKE-ASPHALT
Ready Roofing

Trinidad Lake asphalt contains natural oils that keep Genasco "alive" and defensive. Manufactured asphalts won't do that—they dry out; and roofings made of them crack and leak. Real economy prompts you to get Genasco.

Mineral or smooth surface. Comes ready and easy for you to lay. Ask your dealer for Genasco. Write us for samples and the Good Roof Guide Book—free. The Kant-leak Kleet, for smooth-surface roofings, makes seams tight without cement, and prevents nail-leaks.

The Barber Asphalt Paving Company
Largest producers of asphalt, and largest manufacturers of ready roofing in the world.

SYNOPSIS OF DOMINION LAND REGULATIONS.

ANY PERSON who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-agency of the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price, \$3.00 per acre.

Duties—Must reside upon the homestead or pre-emption six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a purchased homestead in certain districts. Price, \$3.00 per acre. Duties.—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.00.

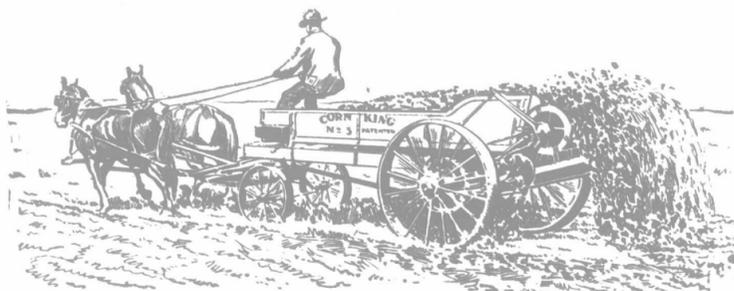

W. W. CORY,
Deputy of the Minister of the Interior.

Export orders necessary. Sample outfit 35c, post-paid. Particulars FREE. **Great White Light**
60 Dept. 302 Windsor, Ont.

**What Is Soil Fertility?
How Does It Interest You?**

WHAT is soil fertility? Why is its lack considered so serious a matter? Why is it that authorities on better farming agree in considering it one of the most important questions requiring solution by farmers today? The answer is found in the small average yield of farms in this country as compared with those of other countries where correct fertilizing is practiced, and in the rapidly decreasing quantity of available new land. There are two things that every farmer can do, both of which will make his farm more productive. One is to practice a proper rotation of crops; the other to buy and use an

**IHC Manure Spreader
Corn King or Cloverleaf**

Every farm can be benefited by the use of an IHC manure spreader. It will distribute the manure in an even coat, light or heavy, as may be required. Manure spread in this manner does the most good to the soil at about half the expense and much less than half the work of hand spreading.

An IHC manure spreader is a scientific machine, built to accomplish a definite purpose in the most economical manner. It is constructed according to a well-thought-out plan, which insures the best work in the field with the least strain on machine or horses. To take one example of the thoroughness in detail, all IHC spreaders are so constructed that a reach is unnecessary. This construction allows the spreader to be managed handily in small feed lots, backed up to barn doors opening into narrow yards, or turned completely in its own length. Yet the absence of a reach in no way interferes with the strength or field efficiency of the machines.

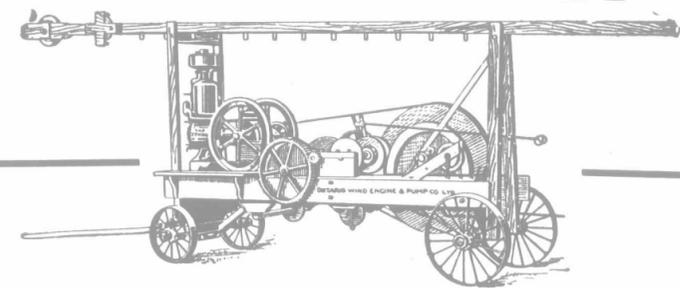

See the IHC local agent or write the nearest branch house for catalogues and information.

WRITE TODAY. See our illustrated, descriptive literature. Agents wanted.
GILSON MFG. CO., Ltd. 100 York Street
Winnipeg, Ontario "60 SPEED" ENGINE

"Baker" Wind Engines

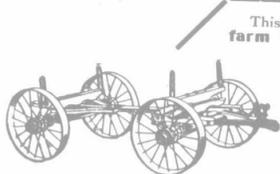

Are built for hard, steady work, and keep at it year in and year out.

It is the reputation which "BAKER" Wind Engines have fairly won and steadily held ever since their first appearance on the market, 30 years ago, that should be considered. They are famous for their durability, simplicity of construction and easy running. "BAKER" Wind Engines are so designed that the gears cannot wear out of mesh. The wheel is built on a hub revolved on a long stationary steel spindle, requiring no babbiting. It has a large number of small sails which develop the full power of the wind and enable them to pump in the lightest breezes. Has ball-bearing turn-table and self-regulating device, and all the working parts are covered with a cast shield, protecting same from ice and sleet. The above is only a few of the many features that have placed "BAKER" Mills in the lead. Let the H.-A. Co. agent give you complete information, or write direct for booklet.

We make a full line of Steel Towers, Galvanized Steel Tanks, Pumps, Pneumatic Water Systems, Spray Pumps and Gas and Gasoline Engines.

THE HELLER-ALLER COMPANY
Windsor, Ontario
