visit his daughter. Mrs Richard Hen-Though nearly 80 years of age, Mr Chamberlin viewed with delight his trip to the West and was very optimistic as to the future. Though far from being a strong man, it was telt that with this hopeful spirit would make the trip alright, but he was taken ill on the train and reached Moose Jaw in an exhausled condition on March 11. He was met there by Mr and Mrs Henderson and was given every possible attention. He grew steadily weaker and lapsed into an unconscious condition on March 18, pass ing away on the 21st. Interment was mad at Moose Jaw.

Mr Chamberlain spent his whole life in this section and was highly esteemed as a citizen, neighbor and friend. In their sorrow his two daughters have the heartfelt sympathy of a wide circle of friends in this district.

#### LICENSE LAW CHANGES

Among the admendments to the Liquor License Act made by the Untario legislature at its recent session was the addition of a clause which provides that the question of license raduction shall be taken out of the hands of municipal Councils and left with the electors. Ten per cent of the electors may petition the Council any time before the first of November, asking for a reduction of so many of the licenses. The question must be voted on at the next municipal election, and submitted to a fifty per cent vote (in this respect following the liquor license reading shall be compulsory on the bylaw being adopted. A license reduction by-law being submitted and passed upon by the people, the question of fixing the number of licenses shall not be submitted again for a te m of three years.

It is provided also that a local op-

And yet how many there are who pride themselves upon being first-class dairymen who fail in this one e-sential. They go on in the same old hap hazard way every year and are seemingly content with receiving the monthly cheque from the ter factory. One must get down to profit there is in the undertaking. A dairyman may send the milk of twenty cows to a cheese factory or creamery and not make a cent on the undertaking. In fact he may lose as has so often been demonstrated. In a herd of twenty cows there are likely to be a

#### FOR PROHIBITION

The Dominion Alliance is the force that promotes, guides and in large measure controls all efforts made in Canada in the direction of prohibition or temperance reform. The Ontario branch has been most active in encouraging, instructing and helping in the local option and license reduc tion campaigns that have achieved such a large measure of success in Ontario. Of course, the Alliance is not content with the present piecemeal method of destroying the liquor traffic, out is looking forward to county and

later to provincial prohibition. In order to bring the work promin ently before the people, the Alliance has adopted a policy of holding county field days, on which, as far as possible, every pulpit in a particular county is

filled by representatives of the Alliance. Last Sunday was field day in Leeds nd Grenville and to this village three Anglican church here and at Delta, Mr F. W. Duggan spoke in the Presbyterian church in the morning and in the Methodist church in the evening and Mr McNivens spoke Baptist church here and at Plum Hollow. All very ably presented the merits of the work of the Alliance and very favorably impressed their bearers with its importance and the need of temperance people uniting in the work of holding all that had been gained and of effectually fighting for further conquests.

#### CHEESE PROSPECTS

Montreal Trade Bulletin: Now that about all the cheese held here has been disposed of for English account, shippers and dealers are already directing their attention to the new make, a tew fodders having already been turned out in the West, but not in sufficient

quantity to establish values. The first half of April cheese was sold at Belleville last year at 12 3-8c. ; but dealers say they do not expect to pay that figure this coming the prediction amongst dealers is that the make of cheese during the coming season will be large and prices lower than in 1910.
