PRESS OWES DEBT **TO MECHANICAL** DEVICES

While great credit can be given c distinguished editors from time of Horace Greeley, Henry Watterson and others of their class, for the developmat of the profession, one must not forget how much is due to the inventive genius and mechanical skill of such men as Hoe, Scott Potter, Cottrell, Goss, Mergenthaler and others, stated James Martin Miller, newspaper man and author " Washington, D.C., in a talk at the school of journalism of the Unviersity of Michigan last week. Mr. Miller spoke on the development and progress of the newspape profession.

he marvelous Porth West machines and the stereotyping inventions, photo engraving etchings, and other processes that have dereloped within a few generations." b. said, "made possible the production of the great journals of the country. We owe everything to those great inventors. "Whenever I have heard the

clicking of the typesetting machines and the whirl of the great moder: appliances in Europe, in 'Australia and other countries, I knew that I was reminded of the inventive genius and the mechanical skill as developed in the United States of America. We must not forget the progress in chemistry, as applied to the development of the manufactur:

of newsprint paper. "In talking about journalism we are apt to have in mind only the circulation forces on a great newspaper. The newspaper institution has as many men employed in the mechanical departments of the newspaper as are engaged in the

more professional departments. "The compensation of such m and women often averages greater than in the writing and reporting end of the profession. That is particularly true in more recent years "The only school of journalism in Horace Greeley's day and since was the hand typesetting case and the hand printing press. Most editor. of those days were practical printer, pressmen, etc. Few editors of the present day are experienced men in the mechanical branches of the newspaper business.

"Schools of journalism in great institutions like this have bes organized in very recent years They seek to establish the calling as profession: to standardize it.

"In the old days a prospective awyer studied law in a law office prospective physician

wishing

Citizens along the American border are not taking a much interest in the possible emban go on the export of pulpwood as in the question of the exportation of Christmas /trees. In Vermont and Maine and other states it is againthe law to cut down young spruce trees. To fill the demand for Xmas trees it has become necessary to cut down the young growth in Canada. Gangs of men cross the border every year about this time and cut down thousands of young spruce trees. which they send to the States. As many as eight car loads of trees have passed through Magog in one typesetting

day. The trees have an average life of from five to ten years, although in many cases the cutters trim a small strip from the top of an older spruce In the one case potential pulpwood i robbed of its future: in the other full grown tree is damaged in such way that its growth is impaired,

## Awarded \$2,500 For Pint of Blood

San Francisco, Nov. 28-A jury has awarded Miss Leona P. Stan ford \$2,500 for a pint of blood she gave in an unsuccessful effort to save the life of Mrs. G. F. Hilliard. ct Santa Rosa, Calif.

Although the patient promised she would be well paid, Miss Standiford editorial, reportorial, advertising and said, Mr. Hilliard had given her only \$5
