

GREAT SUFFERING AND DEATH RESULT FROM COLD WEATHER

Passengers Icebound 15 Hours on Detroit River.

CHILDREN DIE FROM EXPOSURE

Blizzard in New York State Blocks the Railways—Hard Work for Section Men.

Queensport, N. S., Jan. 12. — Two children, named King, of Port Felix, were caught in a snowstorm and died of exposure. They were brother and sister, about ten years of age, and had been visiting friends near Queensport. On Saturday morning they started to walk home in company with Melbourne Jamieson, of Cole Harbour. One of the high barriers they were overtaken by the storm. Jamieson tried to get the children to go to Cole Harbour with him, but they would not go, and took a short cut through the barrens to Port Felix. Jamieson, finding the children obdurate, followed, and overtook them and tried to reach Port Felix. In the blinding snowstorm they lost their way. Jamieson put his overcoat and mitts on the children and carried first one and then the other through the deep snow until they were exhausted. At one point he killed a fire and tried to persuade the children to stay there while he secured help, but they would not stay. A second attempt was made to kindle a fire, without success. Finally, the boy got to the Port Felix road and gave the alarm. A search party went back and found the girl dead and Jamieson unable to speak. The boy died of exposure and exhaustion the same evening.

ICE-BOUND IN DETROIT RIVER.

Detroit, Mich., Jan. 12. — The passengers on the Wabash Railway's eastbound "Continental Limited" had the unique experience Sunday night and yesterday of being ice-bound for 15 hours in the Detroit River on board the transfer steamer Great Western. The train was backed on to the ferry here about midnight, four hours late, most of the passengers being asleep at the time. When they awoke in the morning they found the ferry had slipped in the midst of a great field of ice. It was 3 o'clock in the afternoon when the Great Western finally forced a passage into a landing slip on the Canadian side of the river, and the "Limited" was pulled off the boat. About 1 o'clock, however, the ferry had been near enough to the

JOTTINGS FROM NEARBY PLACES

DELAWARE.

Delaware, Jan. 12.—Mr. W. C. Harris and his mother have returned from New York, where they have been visiting Mr. Harris' brother. Mr. L. Mahler left for Chatham yesterday. The funeral of Miss M. Burt took place here on Sunday afternoon last. Miss F. Steel has returned to her duties as nurse at Hamilton. The Delaware Epworth League paid a visit to the Komoka League on Friday evening last, and a very enjoyable time was spent. Owing to the anniversary services at Kilworth the Sunday evening service was not held in the Methodist Church here. Rev. Mr. McVitty supplying at Belmont for Rev. Mr. Meyer, who preached for him at Kilworth. Three hockey teams are billed for this week at the rink here on Wednesday, Thursday and Saturday nights. Our boys are getting into good shape, and are expected to maintain their old reputation, having never lost a game on the home rink yet. Mr. Bert Trebilcock, of South Lon-

don, has returned from a short visit at his grandparents here.

Mr. John Fish is confined to his bed with pneumonia.

Mr. Fred Mahler is attending the F. C. B. C.

Large Shipments of Deer.

Ottawa, Jan. 12.—During the season of 1902 there were shipped from points along the Canada Atlantic Railway 507 deer, totaling 66,329 pounds of venison. This is the largest number ever shipped in one season, and shows an increase of 22 over 1901, when 455 were taken out. In 1900, 446 were shipped. It is estimated that as many more were killed during the season by the settlers along the line. The Dominion Express Company reports that there were shipped by express from points between Ottawa and Mattawa (both sides), and the Temiskaming branch, 49 deer and 57 moose.

Shipwrecked Crew Rescued.

New York, Jan. 13. — The Holland-American Line office here received details today of the rescue by the steamship Rotterdam (Captain G. J. Stenger), of the crew of the schooner Pioneer, in mid-ocean, on Dec. 17. The Pioneer (Capt. W. T. Kennedy), left Explot Harbor, Newfoundland, for St. Johns, Nfld., Dec. 4, with a

load so that some of the male passengers crawled across a ladder from the train and the passengers were a very hungry lot. Lunch was sent on board for the women and children, and the men passengers who had crawled ashore scurried something to eat. The train left for the east at 2:40 p.m.

West-bound train No. 9 on the same road, which was scheduled to leave here at 2:10 in the morning for Chicago, did not arrive here until after 2 o'clock in the afternoon. The train was held up in Windsor over night, and all the morning waiting for a steamer to carry it across the river. The passengers were kept warm and comfortable in the cars.

Following on the heels of the most severe snowstorm of the season came the coldest night of the winter in this city. Yesterday morning the thermometer registered below zero. Hundreds of persons who live in Windsor, just across the river, and are employed in this city, did not get to their work until nearly noon.

BLIZZARD IN NEW YORK.

Fonda, N. Y., Jan. 12. — A terrific blizzard raged in the Mohawk Valley yesterday and last night. The New York Central Railroad is badly handicapped. The section crews were working all night.

Charles Smith, Fonda, foreman of the section gang at Johnsville, was killed in a falling out of the way of an east-bound train he stepped in front of the Pacific express, west-bound.

Buffalo, N. Y., Jan. 12. — A snowstorm, which began early yesterday morning, continued throughout last night, and today is accompanied by a brisk westerly wind, and the snow is drifting badly. Over a foot has fallen on the level. All mail trains are reported from two to three hours late.

Saratoga, N. Y., Jan. 12. — Sunday's heavy snowstorm was followed last night and today by a driving wind causing drifts, which have delayed north-bound trains.

IN OHIO.

Cleveland, Ohio, Jan. 12. — Four degrees below zero, the lowest temperature of the winter, was recorded here early today. At other points in northern Ohio the temperature fell 3 below. During the night the wind reached a velocity of 41 miles an hour from the west, and combined with the extremely low temperature and scarcity of fuel in many quarters, caused much suffering. Practically all trains on the trunk lines are running behind schedule time.

CONDENSED CABLEGRAMS

Inventor of Submarine Torpedo Boats Goes Crazy—Reports About Louise.

Goubet, the inventor of submarine torpedo boats, has developed insanity, and has been placed in an asylum in Paris.

A dispatch from Glasgow says: "Two new Cunard steamers have been ordered. Each will have three screws, and cost \$6,250,000. It is stipulated that they shall be ready for their maiden voyage in June, 1905."

The Pope signed a brief on Monday by which hereafter the Catholic University at Washington will be under the jurisdiction of the congregation of studies, presided over by Cardinal Sallusti. Mgr. Dennis O'Connell is appointed rector of the Catholic University at Washington.

Serious differences according to Die Zeitung, have arisen between the Count and Countess de Lonyay (formerly the Crown Princess Stephanie), during their stay in the south of France. The Count is reported to have suddenly left his wife, and to have given no intimation of his whereabouts.

The Mexican revolution reports are now current in the Mexican capital regarding the "Princess Louise, and the query, "Is the Princess under hypnotic influence?" is being propounded in professional and journalistic circles.

At a meeting of the Council of the London Chamber of Commerce the delegates who visited New York upon the occasion of the opening of the New York Chamber of Commerce last November, presented their preliminary report. Sir Albert Kaye Rollett explained the conditions in New York, which had been extended to the delegates in the United States and Canada.

Horace Avery, a leading criminal lawyer, will represent Capt. Lynch in his trial for treason. It will be remembered that Capt. Lynch served with the Boers during the war, and was elected member of Parliament for Galway.

The chiefs of the Macedonian revolutionary movement in Bulgaria have decided, according to a special dispatch from Sofia, to use the Voestische Zeitung, to begin an insurrection April 1.

It is noticeable at London parties that a new fashion, or rather revival of an old and pretty fashion, of hair dressing is spreading rapidly. This is the "Alexandra curl," which in earlier portraits of the Queen, when she was Princess of Wales, was gracefully falling over the shoulders. It was introduced immediately after her marriage by the Princess.

The Spanish ministry at Tangier reports uneasiness with regard to the situation in the interior of Morocco, and says that communication between Tangier, Enez and Mequinez has been interrupted. A Moorish courier, who left Fez Jan. 7, brings news of a battle between the Sultan's troops and the rebels, in which the former were defeated.

A lengthy communication, supposed to be in the nature of a reply to President Castro's last note, was handed to the United States embassy at London by the foreign office today. The negotiations are proceeding satisfactorily.

He Was Desperate.

In an especially crowded hour of a crowded shop a man had succeeded in working his way to the ribbon counter and in maintaining his place there until the saleswoman felt disposed to take note of his existence.

"I want five yards of broad white ribbon," he said.

"I do not keep white ribbon at this counter," was the disheartening response.

"Then give me five yards of anything else."

The surrounding women held their breath while the saleswoman dispassionately measured off five yards of light blue. Then as one woman they turned to watch with pitying eyes the man as, crumpling the paper bag into his pocket, he left the shop.

cargo of wood was disabled in a snowstorm and driven out of her course. On the night of Dec. 17 her signals of distress were sighted by the Rotterdam, which lowered a boat and the great risk took the captain and crew aboard the steamer. The schooner's crew had been drifting about nearly two weeks.

PROPOSAL TO LIFT THE BLOCKADE

The Embargo Causes Distress in Venezuela—Powers Discuss the Situation.

Berlin, Jan. 12.—The Foreign Office has been somewhat puzzled by President Castro's last note. He avoids specific acceptance of the powers' stipulations, and seemingly leaves the basis for a settlement as indefinite as in his preceding dispatch agreeing to arbitration. The President's reply has really not advanced the matter at all, but it is confidently supposed he has given Minister Bowen full power to negotiate. The State Department at Washington has advised the Foreign Office that Mr. Bowen has sailed from La Guayra. Nothing more will be done from this side until Mr. Bowen shall have reached Washington. It is hoped a full agreement will be attained without arbitration.

Rome, Jan. 12.—Negotiations between the co-operating powers relative to raising the blockade of the Venezuelan coast are proceeding. The main point being the question of guarantees for the payment of claims should the warships be withdrawn. The Italian Foreign Office Presidentizes the correctness of the contention in Secretary Hay's last note, that a continuation of the blockade will only further impoverish Venezuela, and make the settlement of the claims more difficult, and is desirous of the cooperation of the United States. At the same time, it cannot act without an agreement with Germany and Great Britain. As the quickest solution the suggestion is again mooted whether the United States might not be asked to guarantee the payment of the sums awarded, now that the situation has so completely changed.

BLOCKADE IS CAUSING DISTRESS.

Washington, Jan. 12.—A cablegram received from Minister Bowen at the State Department conveys the information that considerable distress is being felt through the operation of the blockade in the cutting off of food supplies.

Berlin, Jan. 12.—A dispatch to the Lokal Anzeiger, from Caracas, says Minister Bowen's departure for Washington awakens fears among the members of the foreign colony at the Venezuelan capital lest acts of violence be committed against them during his absence.

Castro, it is added, has promised the foreign residents full protection.

37 TO 63

That's the proper proportion of animal and mineral matter in the bones of a healthy child—thirty-seven per cent. animal and sixty-three per cent. mineral. The bones of the average rickety child show about seventy-nine per cent. animal and twenty-one per cent. mineral matter.

It's this lack of sufficient mineral matter in the bones that makes a child have rickets. Deformities of the chest and head, bent legs and curved spine are some of the results of rickets.

The disease is one of early life, and the first symptoms are shown in the digestive organs. Usually the appetite is poor and the child grows dull and fretful. There are pains in the limbs and joints. The pulse beats quicker and the veins become slightly swollen; gradually the whole body becomes tender and the face shows signs of waste, depression and weariness. Then the action of the disease begins in the bones. The legs are first to show the effects when they fail to support the child properly. As a matter of fact, the bones cease to grow at this stage. Proper nourishment for the whole body, and particularly for the bones, is the best possible treatment; in fact, it is the only treatment.

Scott's Emulsion is therefore the natural remedy for rickets, as pure cod liver oil is the most effective of all remedies for this disease. The hypophosphites of lime and soda contained in Scott's Emulsion feed the bones and furnish them with the means to grow properly. It also helps the digestion and provides nourishment that cannot be secured so well in any other way. It quickly enables the rickety child to make up lost ground, and insures a healthy, natural growth. Being as palatable as cream and more nutritious, Scott's Emulsion is easily accepted by the most delicate stomach.

These claims are not made off-hand. We know from nearly thirty years contact with scores that Scott's Emulsion will do just what we say it will. We will be glad to send you a sample free so that you can judge for yourself.

SCOTT & BOWNE,
55 Front St., W., Toronto.

100,000 NEGATIVES GONE

Destructive Blaze in a Boston Photographic Gallery—Other Fires.

Boston, Jan. 12. — Fire in the photographic studio of Elmer Chickering, on the corner of State and Commercial streets, destroyed a loss estimated at \$70,000. One hundred thousand negatives were destroyed.

Livermore Falls, Maine, Jan. 12. — The fire in the lumber yard of the principal trade buildings here, was extinguished today. Loss, \$50,000.

Ottawa, Jan. 12. — Fire Saturday night broke out in the house of Sir Richard Cartwright on O'Connor street.

Frederickton, N. B., Jan. 13. — Fire broke out in O. S. O.'s office in the military building, a two-story wooden structure on Carlton street, and spread quickly to the officers' quarters and the mess hall. The O. S. O.'s papers were all lost. The loss is estimated to reach \$2,500.

The Bond-Hay Treaty.

St. John's, Nfld., Jan. 12.—The Newfoundland Legislature will meet Feb. 1.

I Will Cure You of Rheumatism

Else No Money Is Wanted.

Any honest person who suffers from Rheumatism is welcome to this offer. I am a specialist in Rheumatism, and have treated more cases than any other physician, I think. For 15 years I made 2,000 experiments with different drugs, testing all known remedies while searching the world for something better. Nine years ago I found a costly chemical in Germany, which, with my previous discoveries, gives me a certain cure.

I don't mean that it can turn bony joints into flesh again, but it can cure the disease at any stage, completely and forever. I have done it fully 10,000 times. I know this so well that I will write my remedy on trial. Simply write me a postal for my book on Rheumatism, and I will mail you an order on your druggist for six bottles Dr. Shoop's Rheumatic Cure. Take it for a month at my risk. If it succeeds, the cost is only \$5.00. If it fails, I will pay the druggist myself, and your mere word shall decide it.

I mean that exactly. If you say the results are not what I claim, I don't expect a penny from you.

I have no sample. Any mere sample that can affect chronic Rheumatism must be drugged to the verge of danger. I use no such drugs, and it is folly to take them. You must get the disease out of the blood.

My remedy does that even in the most difficult, obstinate cases. It has cured the oldest cases that I ever met. And in all my experience—in all my 2,000 tests—I never found another remedy that would cure one chronic case in ten.

I mean that exactly. If you say the results are not what I claim, I don't expect a penny from you.
