

YOU KNOW that a satisfactory cup-drawing result must of necessity depend upon the quality used.

CEYLON NATURAL GREEN TEA is absolutely pure and is as far ahead of Japan Tea as "SALADA" Black is ahead of all other black teas. Sold only in sealed lead packets. By all grocers.

Given the highest award and gold medal at St. Louis Exposition, 1904.

ALL FOR HER

"I should think so," returned the squire, with unusual heartiness. "You are not the stuff of which hermits are made, Mr. Faradane, and I am only afraid we shall trespass on your good nature. Hawkewood will get a novelty very often, and will, very properly, regard you as an acquisition. I understand my sister Amelia has already called you into assisting at one of her local enterprises. Take care! If you give an inch to one of these charitable ladies they will take an ell!"

"It is a very small inch," said Harold Faradane simply. "I am only going to recite at some penny readings." "And the next thing she will want you to do will be to take a tray at a tea-meeting," said the squire, with a laugh.

"Would that be very difficult?" inquired the younger man, with such quaint gravity that the squire burst into a laugh of keen appreciation. It happened that Olivia was passing through the hall at the moment, and the sound of her father's laughter, which had become so rare of late, almost startled her.

"Who is in the drawing-room?" she asked of the butler. "The squire, miss, and Mr. Faradane of The Dell," he replied. Olivia stopped short, with a sudden throb of her heart that sent the blood to her face, and she bent down and gathered the skirt of her habit—she had just come in from a gallop—to hide it.

"Mr. Faradane, the new gentleman, miss," said the butler, and he moved towards the door as if to open it for her, but Olivia shook her head.

"No, I am not going in," she said, and went quickly upstairs. "The squire and Mr. Faradane made their way round the grounds, and presently, as if unconsciously, the elder man linked his arm within that of the younger, an action very unusual with the squire, and one which indicated the favorable impression his visitor had made upon him."

"It is a very beautiful place," said Mr. Faradane, when they had made the round of the garden and the lawn, and looked in at the great wall garden with its hundreds of peach and nectarine trees, and at the long length of the greenhouse, in which the gardener grew the choice flowers which would, if he had entered them, have taken the first prize at the show, "a very beautiful place; I think it would be sinful not to be proud of it, Mr. Vanley."

The squire looked at him with a nod of appreciation, then suddenly his face clouded and he stifled a sigh. "There is plenty of room for improvement," he said, as if to account for the sigh.

"There always is," said Faradane. "Fortunately the place is perfect, and should there of it very soon if it were. Don't you think a plantation on that rise to the left of the lawn would be a good thing?"

The squire nodded. "Yes, but it would cost—very much," he said, and looked at the handsome face quickly. "I'm afraid you think I must be very niggardly to grudge a few hundreds for so evident an improvement, but—"

He paused, and Faradane, with the tact which seemed so easy when he chose to display it, said, as if to account for the sigh.

"That is true," assented the squire, as if glad of the opportunity so plentifully offered. "Quite true; these are hard times for my landlords everywhere."

"Indeed they are," acquiesced Faradane.

The squire looked at him. "Are you one of the unfortunate army of land-owners who are so plentifully offered?" "Quite true; these are hard times for my landlords everywhere."

"Indeed they are," acquiesced Faradane.

The squire looked at him. "Are you one of the unfortunate army of land-owners who are so plentifully offered?" "Quite true; these are hard times for my landlords everywhere."

"Indeed they are," acquiesced Faradane.

LONDON RAMBLERS LOST OPENING GAME OF SEASON—SCORE 6 TO 1

Paris Seven Too Much for Them—Lornes and L. C. I. Win in Junior City Series.

The Ramblers made a good showing at Paris last night, and although defeated, they gave the fast Parisians a hard run for their money. The game was fast and clean all through, and the right sort, according to a Paris dispatch, to set hockey going in that town. In the first half the score stood 1 to 1, and the London team showed marked ability at times. In the second half even more aggressive work was done. The work of Lawlor and McLennan was much admired by the spectators. Paris shot three more goals in the second half, leaving the score 6 to 2. The teams lined up as follows: London—Goal, Ledy; point, Smith; cover, Fleming; forwards, C. B. Jones, M. Underhill, T. McCallum and Lawlor.

Paris—Goal, Peebles; point, Stewart; cover, Kuhlmann; forwards, Carnie, Kempthorne, Flanagan and Lowe. Referee, P. Laydon, Paris, Timers, London, C. Simmons; Paris, G. B. S. Jones.

Splendid games marked the opening of the Junior City League at the Jubilee Rink last night. The game was in fine condition and the players all showed up well, considering it was the opening of the season.

The first game between the Lornes and Waterloos, the best teams of last year, was an excellent one, and for quality could not be surpassed. Both the Lornes and Waterloos went at their work hammer and tongs, and the whole first half was a fierce struggle.

Both defenses showed up splendidly. The Lornes spread a first goal on Wilson and Smith doing excellent work. The Waterloos forwards shot many times on the Lornes goal, but the Lornes prevented them scoring. Wood and Waud did good work for the Waterloos. The score at half time was 2 to 2, and the finish 3 to 1. The line-up:

Lornes: Goal, Waterloos; Carrothers, Point, Fraser, Knott, Cover, Woods, Smith, Rover, Spittal, Balfour, Forward, Ward, Johnston, Forward, Nicholls, Wilson, Forward, Taggie, Kennedy, Forward, Taggie.

The second game saw an unexpected turning when the L. C. I. team, defeated the St. John's Juniors by a score of 3 to 1. The St. John's were looked upon as victors, but the L. C. I. team went out to win and win it did.

The games in the Junior League yesterday afternoon were very fast, and the young players showed a knowledge of the game that was very creditable.

The Shamrock won by a score of 1 to 0 against the Junior Horntons, and the Dufferins defeated the Waterloos by a score of 4 to 0.

17,268,000; production, 219,464,171; farm value Dec. 1, 1904, \$184,878,501. Oats—Acreage, 27,842,669; production, 894,586,552; farm value Dec. 1, 1904, \$278,900,013. Barley—Acreage, 3,145,787; production, 139,748,958; farm value Dec. 1, 1904, \$58,651,807.

It has been found impracticable to make a definite estimate of the amount of wheat fit for milling, owing to the difficulty of drawing a hard and fast line between the millable and the non-millable. Reports, however, have been made on the average weight of wheat per bushel in the three principal spring wheat states, and such average has been found to be 52 pounds in Minnesota, 51 pounds in North Dakota, and 56 pounds in South Dakota.

WEATHER PROBS FOR NEXT MONTH

The Year Is to Start in With Storm About the Fourth.

REV. IRL HICKS PREDICTIONS

He Promises Five Periods of Storm in Four Weeks—January Ends in Blizzards.

St. Louis, Mo., Dec. 29. — Rev. Irl Hicks has issued his weather predictions for January, 1905, which will be found appended.

First Storm Period—(Reactionary)—This period is central on the 4th and 5th. The indications are that the storm period reaching into January from December, 1904, will cause unsettled weather up to this reactionary period. The causes at this period will be at a minimum, the secondary cause influence and the moon in conjunction with sun being the main factors.

Probable Results — By the 4th changes in weather will be the order of the barometer will attend the rising temperatures, and rain and snow will visit widely. The weather reaching north and south, as the general storm conditions advance eastward to the Atlantic about the 4th to 5th. A prompt change to rising barometer, northwesterly winds and much colder will set in behind the storm areas to the west and north and push the west side of storm to the Atlantic.

The Second Storm Period—(Regular)—This period includes the 8th to 13th, being central on the 10th. The regular Vulcan period, with moon on the equator, in apogee and at first quarter, are the causes at this time.

Probable Results — Dried change to warmer, winds shifting to southerly and falling barometer, will appear to the eastward about the 10th. During the 11th, 12th and 13th rains will visit southern and central states, turning to snow in the north and as storms reach sections east of the Mississippi River, on the 11th, winter lightning and thunder are likely toward the south. Blizzards conditions and very cold will appear with the rising barometer out of the northwest progressively behind these storms. If barometer is low in the south at this time, severe cold will be induced possibly to the north. Watch barometer and indications.

Third Storm Period—(Reactionary)—This period is central on the 16th, 17th and 18th, and is almost sure to bring a spell of threatening, stormy weather that will run into the storm period following. Hence, we shall consider it in connection with, and as a part of, the Fourth Storm Period—(Regular)—This period is central on the 22nd, extending from the 20th to the 25th. The causes disturbing this period are the regular Vulcan influence, the Mercury equinox central on the same day with the Vulcan period, with full moon on the 21st, in perigee on the 23rd, and on the equator on the 25th.

Probable results—In all reasonable probability this period will bring the worst storms and weather of the month. It will come in with rising temperature, falling barometer, quickly increasing general cloudiness and rain. The barometer will fall phenomenally low, generally, the rains will turn to destructive sleet over vast regions, and the culmination of the period will bring dangerous blizzards out of the northwest, attended by rising barometer and extreme cold wave. Let nothing deter your attention from the possibilities of this period, and the very great cold to follow. This is one of the times when severe cold will penetrate far into the south and east.

The Fifth Storm Period—(Reactionary)—This period is central on the 28th and 29th. The Mercury perturbation continues into this period, there being only one other cause of disturbance—the Vulcan reactionary.

Probable Results — Cloudy, stormy, blizzards conditions will lead up to this period; about the 28th and 29th the general cold will relax, the barometer fall and renewed storms of rain and snow return to most parts. The month promises to go out with high barometer and clearing, cold weather prevailing in most parts.

A GOOD BREAKFAST. There is no disputing the excellence of "SWISS FOOD." Its enormously increasing sales prove its quality. P. McIntosh & Son, Millers, Toronto.

The Australian detectives find football useful. Criminals will hide six days in the week, but they have to come out on Saturday to see the football game, and the police are on hand.

"BY MEDICINE LIFE MAY BE PROLONGED." So wrote Shakespeare nearly three hundred years ago. It is so today. Medicine will prolong life, but be sure of the qualities of the medicine. Life is prolonged by keeping the body free from disease. Dr. Thomas' Electric Oil, used internally, will cure coughs and colds, eradicate asthma, overcome crop and give strength to the respiratory organs. Give it a trial.

THE TURF. YESTERDAY'S TURF WINNERS. At New Orleans—Lampoon, 3 to 1; Lady Ponso, 2 to 1; Bierre, 5 to 1; L. Light, 13 to 1; Janette, 4 to 1; Midshipman, 9 to 1.

PACING STALLION SOLD. San Francisco, Cal., Dec. 28. — The pacing stallion Nervito (2:04½), has been sold by Scott Hudson to W. B. Lockwood, of Sharon, Mass., for \$16,000.

THE RING. SEILOFF BEAT COFFEY. Detroit, Mich., Dec. 28. — Otto Seiloff won a decision last night over Charles Coffey, of Brooklyn. They fought ten rounds.

MIKE WARD MATCHED. Port Huron, Mich., Dec. 28. — "Mike" Ward, of Sarnia, has signed articles to fight Willie Lewis at Grand Rapids on the night Jan. 12. Lewis knocked out Martin Canole, the other night at Portland, Me. Canole is considered the light-weight champion of the east. It is Ward's intention if he gets the decision over Lewis to tackle Jimmy Gardner.

UNCLE SAM'S CROPS. Acreage, Production and Values for the Year 1904.

Washington, Dec. 28.—The agricultural department today made public the following bulletin showing the acreage, production and value of the principal farm crops of the United States in 1904: Corn—Acreage, 92,321,581; production, 2,467,480,934; farm value Dec. 1, 1904, \$2,967,461,160. Winter wheat—Acreage, 26,865,855; production, 232,935,346; farm value Dec. 1, 1904, \$325,611,373. Spring wheat—Acreage,

17,268,000; production, 219,464,171; farm value Dec. 1, 1904, \$184,878,501. Oats—Acreage, 27,842,669; production, 894,586,552; farm value Dec. 1, 1904, \$278,900,013. Barley—Acreage, 3,145,787; production, 139,748,958; farm value Dec. 1, 1904, \$58,651,807.
