WATFORD, APRIL 12, 1918

NOTE AND COMMENT

No firm, person or corporation shall until on and after July 1st, 1918, remove or transport any flint or dent corn capable of being used for seed purposes from within the district comprising the counties touching or bordering on the River St. Clair or Lake St. Clair, River Detroit on Lake Erie, to any place outside the said district. It is also provided that flint or dent corn shall not be moved from the counties of Lambton, Essex, Kent and Elgin until on or after July 1st, without first having obtained a written permit from the District Representative of the Ontario Department of Agriculture.

The Alliston Herald sizes up the newspaper situation as below:—Twenty more newspapers in Canada have died because they couldn't live. Twenty more people, who have struggled to make both ends meet, have thrown up the sponge. You can't buy paper at present prices and give it away. Most likely those editors all begged their subscribers month after month to pay up. Everyone who reads a country paper knows the sad cry, "Drop in and pay your subscription." Well they're not asking any more. They just got tired and closed up. Everyone of these towns will miss their newspaper, and miss it sorely—take it from us.

An Amiable Husband

Ingeborge was the daughter of Waldemar, King of Denmark, and was born in 1175. In 1193 she was selected, from motives of policy, by Philip Augustus, King of France, as his wife. The King had been a widower. He early took an aversion to Ingeborge, and, on the pretext of just discovered relationship to his first wife, he assembled the nobles of Compeigne, who declared the marriage null and void. Ingeborge, knowing nothing of the language, was ignorant of the proceedings at which she was present. When informed of the decision of the nobles by an interpreter, she burst into tears. After appealing to Rome, she was confined in an abbey, a virtual prisoner. The Pope refused to sanction the divorce, but Philip paid no heed and married another princess. Philip was later excommunicated and his kingdom placed under an interdict. All churches were closed, baptism, marriage and burial ceremonies were suspended, and after eight months of this punishment Philip allowed Ingeborge to return to him. He again tried to rid himself of her but being unsuccessful, confined her in a tower, where she remained for twenty years, dying in the year 1263.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly falling to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo Ohio, is a constitutional remedy, is taken internally and acts thru the blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Cure fails to cure. Send for circulars and testimonials.

F. J. CHENEY & CO., Toledo, Ohio. Sold by Druggists, 75c. Hall's Family Pills for constipation.

How to Grow Potatoes

When three hundred and thirty-two years ago, Sir Walter Raleigh introduced the potato from this continent into Ireland, nobody could have foreseen or imagined the immense part it would come to play in feeding the world. It was nearly eighty years before the Royal Society of England took up the cultivation of the potato as a cheap food in case of famine. In another eighty years, famine in Scotland brought the potato into extensive notice as a cheap article of food. Another thirty years, saw France taking notice of its value. Mr. W. T. Macoun, the Dominion Horticulturist, briefly explains all this in a hundred page bulletin recently issued by the Department of Agriculture, Ottawa, in which is also given complete and comprehensive information as to the cultivation of the potato. Mr. Macoun goes fully into his subject, dealing with the preparation of the soil, of the varieties of seedlings, of the manner and method of planting, of protection against insect pests and diseases, of the time to plant, of the districts best suited to the different varieties of the care that should be taken during growth, and of garnering, storing and shipping. Particulars are also given of the results of experiments and tests made at the Experimental Farms and Stations throughout the Dominion. In short, pretty well everything in the shape of information that is of value to potato growers with many exact and interesting illustrations, is to be found in this bulletin that can be had free on addressing the Publications Branch, Department of Agriculture, Ottawa.

Direct Tax on Farmers

Plans for the taking of an agricultural census, which the Government contemplates in co-operation with the Provincial Departments of Agriculture, apparently have ultimately in view some measure of direct taxation on the farming community. So far all farmers are practically exempt from war taxation on incomes or other forms of direct Federal taxation. But, with the imperative need of increased revenues to meet the burden of the war and its aftermath, the Government realizes that increased direct taxation falling on everything must come. As yet there is no adequate or detailed information as to farmers' annual profits or wealth. To secure this and as a basis on which to determine any further measure of direct taxation as suggested, the agricultural census is to be made. It will be in the form of questionnaires sent out to each farmer asking for data as to his revenues and expenditures, the value of his land, stock, buildings, etc., the net return on his investment after allowing a reasonable amount for the labor of himself and family, and all other information tending to show as accurately as possible the financial status and yearly income of each farmer. Details as to the method and time of taking the census are still to be settled, but it is probable it will be made in connection with the coming registration next June.

A CURE FOR RHEUMATISM.—A painful and persistent form of rheumatism is caused by impurities in the blood, the result of defective action of the liver and kidneys. The blood becomes tainted by the introduction of uric acid, which causes much pain, in the tissues and in the joints. Parmelee's Vegetable Pills are known to have effected many remarkable cures, and their use is strongly recommended. A trial of them will convince anyone of their value.

A Sheep Instead of a Dog

In many parts of Canada there are hundreds of useless dogs which not only necessitate a waste of food, but are a deterrent to the keeping of sheep. It has been estimated that the food consumed by these dogs is worth about \$34 per dog per year. The food consumed by six dogs would be enough to feed one Belgian orphan. A sheep can be purchased for the cost of a dog. It is just as good to pet and, in addition, will yield \$5 worth of wool yearly, and \$10 worth of meat when killed, as against a merely nominal killing value on dogs in case their hides are turned into gloves. The replacement of dogs with sheep would prevent wastage of a large amount of food, and would add greatly to the food supply.

The Ford Saves the Hay and Oats the Horses Eat

IT HAS been estimated that five acres of land are required to maintain one horse for a year, and that the same five acres would produce nearly enough food for two people. If 50,000 Canadian farmers each replaced one horse with a Ford, 250,000 acres would be added to the Nation's source of food supply and enough extra food made available to feed 100,000 people.

Just think what a great service this means to the country at the present time and the benefit to the farmers from the sale of food produced on this acreage.

A Ford car also saves the farmer a week or more of valuable time each year, which can be used for further productive work. The Ford travels three times as fast as a horse and rig—costs less to run and keep, and is far easier to take care of. With labor so scarce and high priced, time means money, so do not delay in getting your Ford.

A Dime Novel Hero

Through the assiduous reading of dime novels, Kingsville developed an automobile bandit who created more excitement than is customary in that town, Tuesday, and it will be some time before events settle down to their usual routine. The hero of the escapade is Evert Davey, the 18-year-old son of William Davey, and the fact that he was captured without bloodshed and now is repenting his actions in Castle Wanless, Sandwich, is certainly good luck. The holdup occurred just west of town, Tuesday afternoon. Edward Voakes, owner of the Kingsville garage, picked the lad up when returning in his auto from Harrow, little dreaming of the events that were to follow. As they neared the town the boy made some excuse to get out, and in a twinkling drew a bead on Mr. Voakes, with a small repeating rifle he was carrying, commanding him to deposit his money on the seat and vacate the machine, which Mr. Voakes certainly did. With the quickness of a movie actor, the boy leaped into the car, threw her into high speed, and was off. Mr. Voakes also developed speed towards the nearest phone, and by the time the auto thief neared Kingsville an alarm had gone out, and he thought to double on his tracks by turning at the English church corner. This flooded his engine, stalled the car, and gave Thomas Hooper a chance to jump on the rail, but he got right out and got under the car when he found himself face to face with a rifle. Davey, gun in hand, left the car and made tracks across a field, where he was bluffed into submission by Roy Voakes, arrested, lodged in the local gaol, came up before P. M. Smart, Wednesday morning, and after a preliminary hearing was sent to the county gaol to await trial.

A safe and sure medicine for a child troubled with worms is Mother Grave's Worm Extremator.

If Your Motor Needs It—We Have It

We have everything for the motorist. By stocking only those high-grade brands of automobile accessories which we know to be leaders in their respective lines, we have established for this store a real reputation as "headquarters for motoring sundries."

- O-Cedar Polish, long established as the leading cleanser and polisher for the household, is now equally popular as a polish for motor cars. It gives a hard, dry surface that gleams like glass. It cleans without hard rubbing—it leaves a polish that does not catch the dust. 25c to \$3.00 sizes.
- Maltose Cross Paragon Tires.....\$21.95
- pure rubber tubes... 3.60
