\$100 REWARD, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and this is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment Hall's Catarrh Medicine is taken internally Catarth Medicine is taken internally and acts through the Blood on the Mucous Surfaces of the System thereby destroying the foundation of the desease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarth Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

WATFORD, FEBRUARY 27, 1920.

NOTE AND COMMENT

Speaking of the shoe situation, Philadephia shoe merchant said recently: "The producer sets the prices The lowest priced women's shoes we have are sold for \$10. We sell no men's shoes for less than \$8. But if our customers did not want these shoes, and would not pay the price for them, we certainly would not stock up on them. If we back up on the jobber, he will in turn back up on the manufacturer, and the price of shoes would come down. What is true of the shoe situation is also true in other lines of manufacture. So long as people will buy the high priced articles, just so long will the price remain high, or even go higher. But let the public, generally, refuse to buy the high priced articles and it will only be a short time before prices will start on the toboggan

In Ohio and Michigan drastic cuts have been made in the size of the newspapers, and advertising and circular rates have been increased. In New Jersey all advertising rates are advanced 25 to 30 per cent., with higher rates in prospect. The three Birmingham dailies have gone to \$9 and \$10 a year. Publishers are filled with anxiety for the future. The most rigid conversation, the elimination of all unnecessary features and increased advertising and circulation rates are regarded as the only means of meeting existing conditions. The problem is not one of the publishers' making, but they must bear its result and work along the best lines available to solve it.

Over \$4,000,000 was spent on county road systems during the past year, according to reports from county councils throughout the province, which have just reached the Department of Highways. Although con struction and maintenance costs during the year were decidedly higher than during 1918, the actual work accomplished was nearly double that for the previous year. In 1918 the counties spent \$2,227,000 on their roads, of which the province contributed \$851,500, while last year \$5, 085,000 was spent. When the checks are made out shortly by the Provincial Treasurer, \$2,338,000 will go to counties, representing a 40 per cent grant on county roads and 50 per cent on provincial county roads.

No one need endure the agony of corn with Holloway's Corn Cure at hand to remove them.

Sugar Crop Reducers. It is estimated that rats destroy every year at least a twentieth part of the sugar canes in Jamaica, amounting in value to little short of two hundred thousand pounds. The sugar cane is their favorite food; but they also enjoy Indian corn, all the fruits that are accessible to them, fruits that are accessible to them, and many of the roots. Some idea can be formed of the immense swarms of these destructive animals that infest this island from the fact that on a single plantation thirty thousand were destroyed in one year. Traps of various kinds are set to catch them, poison is resorted to, and terriers and sometimes ferrets are employed. They are of a much larger size than the European rat.—Family Herald.

Hardly a Compliment.

"The school mistress is interested in you, dad."
"How's that?"
"Why, to-day, after she'd told me six times to sit down and behave myself she said she wondered what tind of a father I had."

Herald.

SAM BROWNE.

The Soldier After Whom the Belts Were Called.

Who was Sam Browne?
Thousands of Canadian enlisted
men in France who did not have to wear one in France to look like an officer, and many officers over there who were glad to buckle one around the waist and over the shoulder to distinguish them from some enlisted men, have possibly thought he was some great leather magnate oversome great leather magnate over-loaded with war orders. According to an authority, the original Sam Browne was a most gal-

lant British officer and gentleman, who won the Victoria Cross fighting for the Empire in India during the autumn of 1858.

autumn of 1858.

Lord Roberts, field marshal and advocate of preparedness in Britain, who was a friend of the dashing cavalry officer, gives this account of the dead hero who received so much publicity in the late war because he was careless enough to have his arm cut off and therefore forced to devise some means whereby he could be present at parade without his trusty saber dragging on the ground: "This popular and gallant officer, well known to every native in upper In-dia as 'Sam Brun Sahib,' and to the officers of the whole of His Majesty's army as the inventor of the sword belt universally adopted on service, distinguished himself greatly in the autumn of 1858. With 230 sabers of his own regiment and 350 native infantry he attacked a party of rebels who had taken up a position at Nural, about ten miles from Philibhit. Browne managed to get to the rear of the enemy without being discovered. A hand-to-hand fight then ensued, in which he got two severe wounds, one on the knee, from which through the arm. The enemy were completely routed and fied, leaving their four guns and 300 dead on the

ground. Browne was deservedly re-warded with the Victoria Cross." Sam Browne died at the Wood, Ryde, Isle of Wight, on March 14, 1901, and after cremation was buried there. A memorial tablet has been put up for him in St. Paul's Cathedral in London. There are memorials to the tough old cavalry officer in every community of Canada. Wherever a community of second-hand clothing stores there will be found on the counters discarded Sam Browne belts, linking the reconstruction period with a hand-to-hand fight in far away India many, many years ago.

A Privy Councillor.

New Year's honors in Canada are New Year's honors in Canada are this year few, but of a highly exclusive character. The apointment of Sir Thomas White, Hon. C. J. Doherty, and Hon. A. L. Sifton to the position of members of His Majesty's Most Honorable Privy Council, with the right to use the title of "Right Honorable" before their names, brings the list of those who bear that title in Canada up to the inconsidertitle in Canada up to the inconsiderable number of eight, as follows: Sir Charles Fitzpatrick (198), Sir Robert Borden (1912), Sir George Foster (1916), Chief Justice Sir Louis H. Davies (1919), Mr. Justice Lyman P. Duff (1919), Sir Thomas White (1920), Charles J. Doherty (1920), and Arthur L. Sifton (1920). The office is an honorary one, involving no duties.

His Majesty's Most Honorable Privy Council—commonly called the Imperial Privy Council—is a council of state appointed periodically by the sovereign to concert matters for the public welfare. In the table of prepublic welfare. In the table of pre-cedence, Privy Councillors stand above all knights, except Knights of the Garter, and, like barons, vis-counts, and earls, the style "Right Honorable" is prefixed to their names. In Great Britain, all the political heads of departments must be sworn in as Privy Councillors before being placed in charge of their department, just as in Ontario, the members of the Drury Government were sworn in as members of the Executive Council before being appointed Ministers. The Cabinet in the United Kingdom is a committee of the Privy Council and the theory. of the Privy Council, and the theory is the same at Ottawa. There is leg-ally no such body as the Cabinet, either in Great Britain or Canada. There are, it is stated, about 350 Imperial Privy Councillors in the whole Empire, of whom only about 25 are resident outside of Great Britain.

A "Nailless" Village. In Alberta there exists a village where no nails have been used in the construction of the houses. These were built by Ruthenian immigrants, and are of the typical Ruthenian style—long, pitch-roofed, thatched, and wide in the eaves. Even the door, and wide in the eaves. Even the door, and the construction of sleader twice woren and and wide in the eaves. Even the door, an affair of slender twigs, woven and laced together, swings on home-made hinges, and is latched with a wooden hasp. The floor is of hewn logs unnailed. The roof is a wonderful fabric of poles and cross-woven wheat straw ten inches thick, packed tightly and solidly, and laid with such care that it will endure any weather for twenty years.

Whale 2,000 Miles Inland.

Dawson, Yukon Territory, is exercised by a report that a whale was seen in the Yukon river at the mouth of Sixty Mile river, a little south of that city and 2,000 miles inland. An-gus Cameron, a prospector, arrived in a small boat and vows he saw the big_fellow_playing_beside the boat.

the mouth of the Tanana river two years ago after traveling 1,000 miles inland.

Many Questions.

An assistant station master at Pad-dington, London, Eng., took, by means of a number-recording watch, a record of the number of questions asked by the public during a single week. The total was 2,188. Some of the questions were extremely foolish.

The little Republic of San Marino has the longest national anthem af-ter China. To hear it from begin-ning to end would take several hours.

Passed the Test.

A young man from our town had gone into a training school as an automobile mechanic. In one of their tests an automobile was taken apart and it was his duty to assemble each part to its respective place. He had done this with the exception of piece, which was missing and which he could not find. The C. O. told this young fellow that it was up to him to get this piece, so, taking his superior officer at his word, he proceeded to take the missing part from the commanding officer's own car and he was one of four out of a class of 190 who passed the test.—Chicago Tribune.

Triumph of Modern Ingenuity.

A common nail is an excellent illustration of the difference between old and new methods. Formerly the metal was cut into strips and then forged into shape with hammers. Today they are made of steel and are lighter and stronger. Strips are cut with steam

Cleaning Brass and Copper. For cleaning and polishing brass and copper, nothing is better than oil and rotten stone, and most of the good polishes on the market are made from these materials, with alcohol, turpentine, or soup.

Small but Potent.—Parmelee's Vegetable Pills are small, but they are effective in action. Their fine qualities as a corrector of stomach troubles are known to thousands and they are in contant demand everywhere by those who know what a sate and simple remedy they are. They need no introduction to those ac-quainted with them, but to those who may not know them they are presented as the best preparation on the market for disorders of the stomach.

What Prominent Ontario Women Say

Tillsonburg, Ont.:—"I found Dr. Pierce's

has always been so. I consider Prescription' a great help to the mother and am glad to recomm MRS. AMOS MILLS, Box 238.

A HAMILTON WITNESS

Hamilton, Ont.:—"A few months ago I was stricken down and was confined to bed about ten days. My strength all left me. It was my first illness since a child. I lost five pounds and felt awfully weak afterward. I could hardly do my work. I was advised to try Dr. Pierce's Favorite Prescription in tablet form. I tried a couple of bottles and before I knew it, I was well and strong and had gained 91/2 pounds. I can recomme Dr. Pierce's Favorite Prescription to build one up."—MRS. E. MARTIN, 397 Dundurn St.

After suffering pain, feeling nervous dizzy, weak and dragged down by weak-nesses of her sex—with eyes sunken, black circles and pale cheeks—such a woman is quickly restored to health by the Favorite Prescription of Dr. Pierce. Changed, too; in looks, for after taking Dr. Pierce's Favorite Prescription the skin becomes clear, the eyes brighter, the cheeks plump. It is purely vegetable, contains no alcohol.

re-ordering in ever-increasing quantities. They remain a conomical Cane Mola is.

Use Cane Mola with old hay, straw, shredded corn stover, fodder, ensilage, screenings, etc. Also with grains in the feed box. Dry untempting feeds become palatable and digestible, because of the sugar and natural salts. Your animals will be in prime condition always. Roughage is eaten up to the last atom. No waste. Cane Mola is the best conditioner you could possibly have. Use it for cows, hogs, horses, sheep, etc.

You save the cost of expensive prepared feeds, thus pracing real conservation. You will experience a rapid, health-growth of stock. Cows yield 15% to 25% more milk.

Car load of "Cane Mola" is now en route. Place your orders with our distributor.
