PANGS OF NEURALGIA

This Painful Trouble is Due to Poverty of the Blood

Neuralgia is one of the most painful maladies that afflicts humanity. The trouble is usually seated in the face or head, following the course of some nerve, but it attacks other parts of the body as well. It is characterized by acute pains sometimes steady at others spasmodic and darting. But whatever course it takes the pain is agonizing and almost unbearable. Medical authorities agree that neuralgia is due to poverty of the blood—that the nerves are actually being starved. It is further agreed that if the blood is purified and enriched the trouble will disappear. It is for this reason that Dr. Williams' Pink Pills have been so successful in treating neuralgia. They enrich the blood which feeds the starved, aching nerves and thus bring relief to the sufferer, whose general health is also improved. Proof of the value of these pills in cases of this kind is given by Mrs. M. Brown, R.R. No. 1, Watford, Ont., who says: "I have taken Dr. Williams' Pink Pills and can recommend them as being the best medicine I know of for neuralgia. Two years ago I had an attack of this trouble in the neck and shoulder. The repeated attacks of the pain were such a frightful intensity that my life was almost unbearable. I consulted two doctors and took their medicine, but without relief. I had taken Dr. Williams' Pink Pills years ago, when they helped me wonderfully, and I decided to try them again. Before I had taken more than a half dozen boxes the pain had disappeared, and I have since enjoyed the best of health, thanks to Dr. Williams' Pink Pills."

You can get these pills through any dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

MAKING IT CLEAR

"Can you expalin radio to me?" "To be sure. Take heterodyne action. Suppose that the frequency of oscillations in the receiving antennae is 100,000 cycles per second when that circuit is in resonance with passing electro-magnetic waves it would require a generator of undamped waves to be heard."

"I understand perfectly now."

ROBERT STEAD'S GREATEST BOOK

"Neighbors" is Nearer the Heart of Canada than Any Other of Famous Canadian Author's Books

You will never have to ask that question, "What is Canadian literature?" and when you have read Robert Stead's latest and, so far, his greatest novel, "Neighbors."

There are few Canadians who are not familiar with this author's former novels, "The Homesteader," "The Cowpuncher," and "The Emulsion Grant." This new book runs true to the Stead tradition of a good story, real humor, pure love and a real idea—even some real mystery, and it has more of the real atmosphere of life in it, than any other which has come to us in a long while. It is true writing, and will add fresh laurels to the fame of this already well-beloved author.

"Neighbors" relates how two families of young people, brother and sister, neighbors, in a little Ontario town; neighbors, fifteen years later on adjoining homesteads in the Saskatchewan country, find life and love. Their stories run smoothly until a young Englishman settles in the community and upsets all expectations, including the reader's. But the best part of "Neighbors" in my mind, and what makes it a great book, is the picture of the people who make up that far-scattered "Neighborhood" of homesteaders. Jake is the old villain who finds "locations" for the gruff newcomers; the "Snoozers" are a gaunt big-eyed Polak family, who live in a cave that the precious live-stock may have builded shelter—and the widow, and the Scotch family—and the wedding! All of that is writing of the finest type, and places this Canadian book in high order among the best literature of to-day.

"Neighbors," a happy novel of the Northwest, by Robert Stead, Hodder & Stoughton, Toronto, \$1.75.
