WEDNESDAY, JUNE 24TH, 1925.

JOSEPH HOWE'S PROPHECY FILLED.

As an instance in the trend of the economic situation in the Maritime Provinces, the St. John Globe states that a local manufacturer has been given an order by the C. P. R. for supplies for the Algonquin Hotel, a striking proof that the plant indicated in the Globe's forecast of the effect that a large Upper Canadian organization has acquired a plant and is endeavoring to undersell the St. John manufacturer in their home market.

This is only one of the many straws for years back which show how the wind is blowing and gives a pointer to Upper Canadian manufacturers as to why there is down here a demand for Maritime Rights and for regional tariffs for Canada.

During the years following Confederation many a Maritime industry has been forced out by competition from provinces which are nearer to a larger population. Many industries have been bought up by Upper Province interests which for economic reasons have closed these out and confined their manufacturing to Ontario and Quebec. The trend of financial institutions has had their birth in the Maritime Provinces has been to ward the western Provinces.

We are quite familiar with Banks moving their head offices from say Halifax to Montreal. This is a matter that is economically inevitable and in industrial matters we see the place of local factories gradually taken by the sales agent and the distribution houses. These conditions make for less employment and drive more and more good sterling citizens to the United States in order to gain a livelihood, and business generally languishes. It appears clearly enough that the fiscal system which suits Ontario and Quebec very well is not adapted to the Maritimes nor indeed to the Provinces of the West.

Press Comment

ALIENS IN NEW ZEALAND.
Auckland (N. Z.) Weekly News: While in New Zealand there can be found indifference, to sometimes definite hostility, to systematic migration from Britain; aliens are drifting in at an increasing rate. There is evidence proving that beyond question, if Britain is accused of falling to discriminate in favor of Empire produce, what could be more crushing.

ing a report that the Dominions are equally to give preference to British settlers? What is lacking at each end of the chain is a proper appreciation that reciprocal action is necessary if the best possible results are to be obtained.

YORKSHIRE PIDDING AND LIFE.
Westminster Gazette: Miss Margaret Bonfield, who speaks from long experience, told the girls of a London school that she "would sooner see them have an ambition to be a good cook than see them short-handled." Our educational system has undoubtedly encouraged young women to neglect those things which afford women much greater security in the event of unhappy marriage or unemployment than does any other profession. Any modern young woman who is able to make a Yorkshire pudding in fact starts life with an incomparable advantage over the millions who cannot do so.

COMMERCIAL FLYING AND AIR STRENGTH.

London Daily Mail: Just as a large Mercantile Marine seems necessary for the existence of a vigorous and efficient Navy, so a large civil air fleet seems essential for the maintenance of a good Air Force. As yet, no one can expect civil flying to pay its way. It must be kept as a public utility, and we trust that every employer will be made to see for his Air Force machines which are in fact, both in the air and on the ground, and that, in particular, special attention will be paid to developing the all-metal types, which alone in emergency could be turned out rapidly in great numbers.

IRAQ AND MOSUL OIL.

Times of India: The Iraq Government has at last done the sensible thing in signing a convention with the Turkish Petroleum Company for the exploitation of the oil which is present, though its extent is not yet known, in the Mosul area. Iraq has started on its career as a bankrupt country. It cannot balance its budget or pay its share of the Ottoman debt; still less can it finance the irrigation works and schemes for wheat and cotton growing whereby the country might in a few years have become another Egypt. The only asset through which it can raise money to develop its resources is the Mosul oil, and, but for blackmail in the Cabinet and the hesitation of some Nationalists to sign an agreement of which they could not altogether foresee the effects, the convention would have been signed long since.

LYDIA LANGUISH AND HER SONS.

London Daily Express: Those who are old enough to comprise the state of womanhood thirty or forty years ago will be present time are struck by the great difference between the girls of the Victoria era and our own. Then they were light-skinned and tightly-shod. They seldom walked and seldom danced. They did not play golf and their tennis was more not ball. They had charms of course, in that they blushed prettily, they were no vanity boys and no lip-sticks, and they were wonderful housekeepers. The white faces and languid looks of the 'twenties had certain allurements, but they were not to be compared with the fine, sturdy, rosy-cheeked.

NERVOUS BREAK-DOWN

Pains in Back and Legs Relieved by Lydia E. Pinkham's Vegetable Compound

Ford, Ontario.—"I had a nervous break-down, as it is called, with severe pains in my back and legs, and with fainting spells which left me very weak. I was nervous and could not sleep nor eat as I should and spent much time in bed. I was in this state, more or less, for over two years before Lydia E. Pinkham's Vegetable Compound was recommended to me by my neighbor. I have taken Lydia E. Pinkham's Blood Purifier in turn with the Vegetable Compound, and I certainly recommend these medicines to any one who is not enjoying good health. I am quite willing for you to use these facts as a testimonial."—Mrs. J. Suggard, 130 Jos. Janisse Avenue, Ford, Ontario.

Neurosis, irritability, painful times, run-down feelings and weakness are symptoms to be noted. Women suffering from these troubles, which they so often have, should give Lydia E. Pinkham's Vegetable Compound a fair trial. All druggists sell this medicine.

GENERAL STRIKES ARE INEFFECTIVE.
President Tom Moore Says Men Can Do Better by Remaining at Work.

Ottawa.—General strikes are considered ineffective by the Trades and Labor Congress of Canada and are against the policy of the Congress declared Tom Moore, President of the Congress, when shown a despatch from Sidney Tuesday morning stating that Victoria local United Mine Workers of America, had struck a general strike of affiliated trades.

THE PACE TRAIL MILLS.

Family Herald: eminent Doctors in the U.S.A. physician in arguing with the pace of the present and past for life. It is an effort to return in some degree to the simple life. Dr. Mayo and Dr. Peck, of ILLINOIS, are both in accord that the existing strenuous life is accountable for a very large proportion of modern ills and that the death-rate is materially enhanced thereby.

PLAY THE GAME.

There's a beautiful game in the Chase to-night—
Ten to make and the match to win—
A running pitch and a blinding light.
An hour to play and the light man in
And it's good for the sake of a ribboned coat.
Or the selfish hope of a season's fame.
But his Captain's hand on his shoulder says
"Play up and play the game!"

MAN ON CRIBBLES GIVEN NO CHANCE.

Knocked Down by the Auto and Run Over and Killed by Another.

Can't Do Without MINARD'S

When you go to England we recommend you to take with you a tin of Minard's. It will save you a great deal of trouble and let you know how much it would cost to buy 100 bottles sent over.

LOYD'S SURPRISED AT AMERICAN MOVE.

Business It Receives Is Sent by U. S. Brokers Who Pay Taxes.

London.—The announcement made by the superintendent of the New York state department of insurance that an effort is to be made to exclude Lloyd's from operating in New York State has aroused surprise in insurance circles here, because Lloyd's considers it does pay taxation on the considerable amount of American business that it writes. Superintendent Boha's estimate of £10,000,000 is considered altogether too high, but whatever the figure business reaches it comes to Lloyd's through American brokers. They pay taxes in New York State of course, and reimburse themselves from Lloyd's.

A member of Lloyd's prominent in the American business, said today: "I don't understand how an American broker can be prevented from offering us business. The Supreme Court has upheld the right of a man to place his insurance wherever he pleases. We get American business here for two main reasons. In the first place we are willing to underwrite any risk, however unusual, and secondly, we do it with a minimum of red tape. American legislation has hampered American companies with all sorts of restrictions and forms while we can work in much simpler fashion. There is a considerable advantage in the international insurance business.

"Not only does it prevent companies in any one country forming a combine and forcing up rates, but also provides much increased security. This we write a good deal of 'reinsurance' business for American fire companies for what is known as 'confederation risks.' They are insubstantial, of course, but such have great advantage in it is any such catastrophe as the Chicago fire occurred again. American concerns overwhelmed with claims would be delighted to think they could turn over a proportion to us."

PEOPLE DELIGHT IN GOVERNORS AND LEGISLATORS, SAYS DR. ROSS.

—Emigration.

Toronto.—"What is patent to every open-eyed Canadian is the fact that the Maritime Provinces are over-governed," is a statement made in a report by Rev. Dr. James Ross, superintendent of home missions for the Presbyterian Church in the Maritimes which will be presented to the General Assembly this week.

MARTIMES ARE OVER-GOVERNED.

—Emigration.

"There are three governors and three legislatures," he declares "where one governor and one legislature could govern with more economy, with more intelligence, and with more regard to the welfare of the people." "The people seem to delight in getting regular legislatures, and while they are not in session they delight in it is able to protest."

AN UNFORTUNATE COMPARISON.

A man and his wife were having a quarrel.

"How could such a lovely creature have a temper?" asked the woman.

"My dear, that is exactly what puzzled me until I married you," answered the man and he has not heard the last of it yet.

SLIGHT REDUCTION IN OCEAN RATES.

Improvement in Sterling Results in Cut in Passenger Fares.

London.—As a consequence mainly of the recent improvement in sterling exchange, slight reductions have been made in trans-Atlantic passenger rates to the United States and Canada by British shipping companies. One of the principal changes is a reduction of minimum fares by 25 per cent. The minimum first class rate by the largest liners in the New York service has been reduced for the winter season which extends from November 1st to June 30th, from £59 12s. 6d. to £54 12s. 6d. The minimum second class rate by the largest liners has been lowered from £24 to £21 10s.
