TO ARCHITECTS AND BUILDERS.

— IN PLACING MY —

MALCOLM'S PATENT DEMAREST VALVE.

DEMAREST CLOSET

on the market this season, I beg to draw your attention to the following improvements:

The VALVE, as shown in the cut, is of new design, and does away with the Brass Seat, which is always sure to wear.

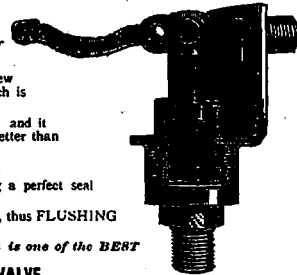

The Seat is of VULCANIZED RUBBER, and it has been tested and found to wear infinitely better than the brass.

It is easily replaced at a very small expense.

The TRAP is deeper than the original, having a perfect seal of 1½ inches, or twice the depth of the original.

The BOWL contains a large quantity of water, thus FLUSHING THE SOIL PIPE every time it is used.

With these Improvements you will see it is one of the BEST VALVE CLOSETS IN THE MARKET.

In specifying, mention

MALCOLM'S DEMAREST, WITH IMPROVED VALVE.

W. B. MALCOLM

89 & 91 Church Street, TORONTO.
