# MARKETS DEMORALIZED

Wall St. Panicky Thruout the Day
—Canadian Markets Depressed Under Liquidation.

World Office.

Thursday Evening March 14.

By far the worst day since the depression in local securities started several weeks ago mas witnessed to-day, and the only remerhable circumstances of the trading was the comparatively small amount of Bankaton that occurred. Whether this is a favorable condition or not later developments will dictate, but in the meantime it severes to show that a large body of holders are not yet embarrassed by the extensive diclines which have occurred in the market. Sentiment was thorely demogralized by the panicky conditions of Wall-street, and the influence of this was more prominent during the afternoon session of the fartenonent during the afternoonent during the afternoonent during the afternoonent during the afternoonen

urday evenings. Article by a Lady.

What a lady thinks of a man's wear ing apparel, and the impression which it carries, is shown in the little book-86 1/2 let called "Dress and Address," copies 11516 of which are being given away in this 3116 city. Mrs. Bessie Connor, a London 93 social leader, tells the story with some verve.

"Dress and Address" deals with the ethics of correct dress for men on all occasions, and also shows the styles in vogue this spring and those which 21% will be popular later in the summer Particular attention is given to the frock and dress suits which are made in larger volume each year by Semi-ready Company. The publishers have omitted from this book the usual exposition of the physique type system, and also the special made-to-order department, as it is their intention to print separate books later in the sea-

The manager of the Semi-ready store said he sent in all the names of his customers, and that each one should get a copy of "Dress and Address" by mail direct from Montreal, and that he will be pleased to give one to anybody who may send or call for a copy.

## 'WAY OFF IN HIS FIGURES SAYS BECK OF AYLESWORTH

Ontario is Already Prepared to Use 200,000 h. p. of Niagara Energy. "

Hon. Adam Beck takes issue with Hon. A. B. Aylesworth's views on the

export of electric power. "I think a minister dealing with a matter of such international importance-one on which a treaty is pending-should be better informed," he said yesterday, referring to the roported statement that the demand in Canada was for only one-tenth of the 400,000 horse power being developed at

Niagara, "The hydro-electric power commison Niagara Falls for the supply of their electrical energy for over 100,000 horse power," said Mr. Beck, "and I firmly believe that the City of Toronto alone, within the price of the price of the supply of their electrical energy for over 100,000 horse power," said Mr. Beck, "and I firmly believe that the City of Toronto alone, within the price of the pr within five years, providing the price is reasonable, will require the whole of the amount mentioned by Mr. Aylesworth as covering the present demand in Canada, viz., of 40,000 horse power. According to present agreements the companies must have available for use in Ontario when requested 200,000 horse

The question, he said, hinged on thether the Dominion Government adopted the recommendation of the in-ternational waterways commission and entered into a treaty to limit the amount of water taken for power purposes. Unless the companies were restricted he feared that the United States consumers would get the benefit of the power generated.

"The proposed treaty," concluded Mr. Beck, "should provide that all the power exported should be available in Ontario upon demand."

THE SCIENCE OF OPTICS.

Advances Made in Treatment Defective Eyes in Recent Years. There are many people who have al-

lowed what was at first a slight defect of the eyes to develop into something serious through an aversion to consulting an eye specialist. The fear of an operation is the great stumbling block in the average mind, especially when it has to do with anything so sensitive as the human eye. Dr. W. J. Harvey, principal of the Empire College of Ophthalmology, 388 West to uproot this prejudice by his new method, under which an operation is not required, the treatment being entirely painless and non-surgical.

Dr. Harvey has been a foremost figure in Canada in advancing the science of optics and he is held in the highest esteem and regard by the graduates of the Empire College of Ophthalmology.
