

Doctors

Good location for you to build, north side floor, near Walmer-road, only 100 per foot.

H. H. WILLIAMS & CO., 25 Victoria Street.

Senate Reading Room, 1910-2638, SENATE P O

PROBS: Southerly winds; warmer; partly fair, with thunderstorms.

TWELVE PAGES—THURSDAY MORNING JULY 22 1909—TWELVE PAGES

\$3100 ANNEX

Choice locality, near two car lines, lot 173 feet deep, side entrance 8 feet, practically new, just finished, expensive decorations, six large bedrooms, cross hall, gabled shingle roof, Terms easy.

H. H. WILLIAMS & CO., 25 Victoria Street.

29TH YEAR

NO PERSON IS DENIED AN APPEAL TO COURTS ON POWER LEGISLATION

Constitutionality of Act Can Easily Be Settled, Says Premier, in Referring to Petition for Disallowance.

NORTH YORKERS' PICNIC ATTENDED BY 12,000

JACKSON'S POINT, July 21.—(Special.)—Herb Lennox, "the hero of North York," as he was called by several of the speakers today, is still close to the hearts of his constituency.

The annual Conservative picnic was as great a success as the uncertain state of the weather would permit.

A tragedy marred the celebration towards the close. During the tug of war between East Gwillimbury and Georgetown, James Duff, well-known farmer of Ravenshoe, who was anchored for the Gwillimbury team, suddenly expired.

Shortly afterwards, Walter Draper, a liverman of Mount Albert, toppled over, and for a time it was thought he was going to die.

The occasion was graced by the presence of Sir James Whitney, Hon. Dr. Pyne, Hon. James Duff and several members of the legislature and house of commons.

The Premier was there. The occasion was graced by the presence of Sir James Whitney, Hon. Dr. Pyne, Hon. James Duff and several members of the legislature and house of commons.

Music and Games. On the flats games were contested, while a program of aquatic sports interested many on the waters.

Four bands meanwhile "discouraged sweet music." They were of the 12th York Rangers, Aurora, Newmarket, Allandale and Cannington.

Enter the Club.

Have you got a club together yet in The World's big \$15,000 Contest? Remember the chance you have.

This club offer only lasts until midnight, July 31. Don't you think it will pay to hustle while the opportunity is at your elbow?

MUSEUM ROBBED OF HISTORIC RELICS

Burglar Found Provincial Treasurer Easy Prey in Unguarded Hours, Removing Van Koughnet Gift to University.

Seven invaluable relics were stolen from the Normal School Museum on Monday night between nine and twelve o'clock, when no watch of the premises is kept.

The collection was presented to the University of Toronto by the late Captain Edward Barker Van Koughnet, a short time before his death at Gibraltar four years ago.

One Silver Trowel about eight inches long with wooden handle engraved with the following inscription on the blade of trowel: "Presented to the Hon. P. M. Van Koughnet, minister of agriculture, by the local committee of the Provincial Agricultural Association, Crystal Palace, Toronto, July 1883."

One Silver Snuff Box, about two inches long and one inch wide, engraved: "A present to P. M. Van Koughnet, December 23rd, 1892."

One Gold Tray, Diamond Pattern; with crest engraved on the seal and "P. M. V. K." on the handle.

The provincial museum has been located in the Normal school for many years. Dr. David Boyle, the superintendent. Since Dr. Boyle's illness Clarkson W. James, secretary to Hon. Dr. Pyne, has been in charge.

W. A. Poole is guard. Any schoolboy can tell you that his teacher guards his little treasure of colored chalks more carefully than the department of education of this province watch over the priceless relics placed under its care in the Normal School museum.

The traces left behind do not stamp the thief as that of an expert in the art of housebreaking, but with the tempting inducement held out to the amateur such accomplishments may have seemed, as they were, superfluous. Also the thief was modest in looting. There lay open to him \$300,000 worth of relics.

Anyone who knew the routine of the place would have been aware that there were three hours when a thief might work without danger. From 9 till midnight there was no watchman on the job. Two windows on the ground floor were found open next morning when the police examined the premises.

The seven relics were kept in a case on the second floor. To break open this the thief resorted to tools as antiquated as the methods used to guard the treasure which he sought. With hands exactly like those presented to Adam at creation) he forced another case and took from it an ancient stone tomahawk. With this he burst open the case containing the collection, and then, confident of not being disturbed, waited to commit silly acts of vandalism, but touched none of the other valuable articles which lay ready to his hand.

DINEEN'S IS THE PLACE. It Pays a Man to Be Particular Where He Buys His Hat.

The reason Dineen's Hat Store has acquired such an enviable reputation in the hat world is because patrons can get what suits them at a reasonable price and enjoy the confidence that they have in the quality of their purchases.

NEW COLLEGE RECTOR. CHARLOTTETOWN, P.E.I., July 21.—(Special.)—A change is about to take place in the rectorship of St. Dunstan's College.

Rev. Thomas Curran, D.D., who has for years been the presiding officer, will assume the duties of parish priest at Kelly's Cross, and is being succeeded by Roy Torrance Campbell, who has been directing the parish.

DID CLEMENCEAU PLAN HIS OWN DEFEAT?

French Opinion Gives Ex-Premier Credit for Having Committed Political Suicide and Not of Blundering.

PARIS, July 21.—The entire political world remains completely stupefied at M. Clemenceau's action yesterday. No one can believe that an old campaigner like Clemenceau did not realize what he was doing, and for this reason many advance the theory that he deliberately planned his downfall.

The general opinion is picture-que-ly summed up by Henri Rochefort, editor of The Patrie, who says: "Clemenceau had overthrown so many ministers that he believed proper to overthrow himself."

President Taft Unable to Harmonize Report.

WASHINGTON, July 21.—The White House staff and conference, at which tariff conferees and the president's closest advisers were brought together to-night in the effort to settle differences regarding the tariff bill, ended at 11:30 o'clock, with the disputes over raw material no nearer adjustment than they were before the dinner.

STILL DIFFER ON TARIFF LOVE FEAST NOT SUCCESS

DARING DIAMOND BURGLARY Four Men Loot an Ottawa Jewelry Store.

OTTAWA, July 21.—A big diamond robbery occurred here between one and two o'clock yesterday, when four men entered McMillan's jewelry establishment on Sparks-street, right in the heart of the city.

U.M.W. MEN GO BACK Few Reported For Work Yesterday at the Reserve Mine.

GLACE BAY, N.S., July 21.—(Special.)—There is practically no change to report in the strike situation here. The point of fight and changes here are very closely noted.

SUES BANK FOR HER \$100 And Ex-President Roy Will Be Called as Witness.

MONTREAL, July 21.—(Special.)—Miss Odilia Saint-Denis has instituted procedure for the recovery of \$100 deposited in the branch of the Banque St. Jean at St. Remi.

DEATH OF AN M.P. M.P. for Strathcona, Alta., who died yesterday. He was born in Victoria County, a graduate of Toronto University, and was president of the Strathcona Board of Trade and president of the Northern Alberta Medical Association.

FIVE NATIONS, FIVE FLEETS, ONE NAVY. LONDON, July 21.—(C.A.P.)—The Standard, discussing the approaching naval conference, says that Lord Chas. Beresford's scheme alone will meet what are really very exigent requirements, and sets up his proposal in the words: "Five nations, five fleets, one navy."

PLACE FOR PAUPER CHILDREN. LONDON, July 21.—(C.A.P.)—The Morning Post says that surely the most hopeful method of dealing with pauper children is to board them out in Canada and other dominions as early as possible.

THE GREATER COBALT.

COBALT, July 21.—(Special.)—I spent the best of last week in again renewing acquaintance with Cobalt, and I hasten to say that it is much bigger and better than ever. It is the swiftest thing in Canada, on the American continent to-day. There is an untold amount of wealth in six square miles that include the central part of the camp.

Next the thing that strikes you on a return visit is the solidarity, the extent, the number of plants, the high-class quality of the various executives that are now in charge of them, the unstinted spending of money to get the best of plant, supplies, men, accommodation, to forsake the "gopher-hole" and open cut mining of the first days and to put in its place the most modern, the most scientific method and equipment.

Then take up details: for instance the question of trenching, which is the method of locating the veins and consists in digging a trench two feet or more wide down to the rock and then washing or brushing off the surface in search for veins.

Now take another instance, that of getting in supplies. There is a railway spur line from Cobalt to Kerr Lake and the mines in that vicinity, and this is of substantial assistance to all the camp east of the Temiskaming Railway.

Next take the question of concentrators. There are now at least seven first-class concentrators in the camp, with the early prospect of as many more.

But a concentrator is only part of the aim that the mine owners have in view. They feel themselves burdened more or less with freight rates to the smelters, even on high-grade ore, not to mention low-grade ore, some of which has to go as far as Nevada or California.

Now, however, there are mining mill men who have come forward with a proposition to modify the concentrators so as to use a cyanid and amalgam plant in connection with them.

For instance, a reliable firm in Reno, Nevada, has offered to put up a first-class concentrating and cyanid plant for the Nova Scotia and guarantee that it will extract 93 per cent. of all their silver values and deliver it right at the mine, not costing one dollar for freights.

But even more important than freight rates is the fact that this new system promises to remove the most unsatisfactory thing in the camp to-day, namely, that the mine owners are entirely at the mercy of the big smelting concerns in the States or Canada, who can charge what they like and make what returns they like in regard to the value of the ores.
