You do not take, but breathe Catarrhozone. Catarrhozone is a fragrant healing compound that destroys germs. When you inhale Catarrhozone into the lungs from the Catarrhozone inhaler little drops of healing are carried to the remotest parts of the breathing apparatus. Wherever Catarrhozone goes it first destroys the germs, but its healing action goes right on until the tissues are made whole. Then conges-tion ceases, the formation of mucus ceases, hawking and spitting ceases, and of course droppings into the throat that poison the whole system cease. You get well. You see Catarrhozone think it is the right way to cure Catarrh? Can you think of any other way that would be as good?
