SHERIFF AND 3 OTHERS ARE HELD FOR MAN'S DEATH

Texas County Primaries has Fatal Flareback at Corpus Christi — Ku Klux Klan Said to Figure in Affair.

Corpus Christi, Texas, Oct. 20—A fatal flareback to the Texas County July primary was staged here recently as a result of which Fred Roberts, prominent for many years in Corpus Christi affairs, is dead and four men are in the county jail. The men in custody are Frank Robinson, sheriff of Texas County; Lee Petzel, constable; Joe Aebco, a special officer; and Cleve Goff, a farmer. No charges had been filed late Saturday night.

Roberts was shot and instantly killed as he sat in his automobile in what is known as the "hill district" of Corpus Christi. The killing followed an extended argument in Warren's store, and was preceded, it was said, by promiscuous shooting, both inside and outside of the store. Three bullets pierced Roberts' body after he had leaped into his automobile, and he fell back dead without a word.

A short while afterward Chief of Police Fox arrested Petzel and Aebco at the scene of the shooting. Sheriff Robinson and Goff were taken into custody in the sheriff's office.

While the city is quiet two rangers are en route here. They were ordered out by Governor Neff at the request of County Judge Sutherland and Mayor Lovenskiold.

Ku Klux Figures in Case.
The Ku Klux issue figures in the case to the extent that Mr. Roberts, always a political leader in Corpus Christi, in the July primary was active for the candidate supported by the Klan, and Robinson and Petzel were renominated with anti-Klan votes. As to immediate happenings prior to the tragic affair, very little is known as none of the defendants will make a statement, and G. E. Warren likewise has refused to discuss the case.

Trouble began early in the day when Sheriff Robinson visited Warren's store. It is declared that Robinson said to Warren: "Are you a Kluxer?" and a few seconds later slapped Warren's face. A crowd gathered. Mrs. Warren put in a call for the police and Chief Fox responded. Fox talked to Robinson and left. Later, it is said, the controversy was renewed and Warren sent for Roberts at his home. Friends of Roberts says he went to the scene only as a peacemaker; they declare he was not armed.

When shooting began inside the store the crowd scattered. Shots were then fired on the outside. Roberts was seen to dash to his car. He sprang in, then threw up his hands and fell back dead. Three bullets had pierced his body. One passed through his right hand, pierced his chest, and emerged from the back. His right arm was broken just below the shoulder. No one could say who had done the shooting.

OFFERS TO BUY AND MOVE BENJAMIN FRANKLIN HOME

Philadelphia, Oct. 20—A citizen whose name is withheld has written to the Bridge Commission stating that if nothing else is done to preserve the old Benjamin Franklin house at 311 Spring street, which must be removed to make way for the Delaware River bridge between Philadelphia and Camden, N. J., he will purchase it and have it removed to some appropriate site.

"Let's Get Acquainted"

"Wait till she snows---
Wait till she blows"

Then you'll wish that you had some of that warm "comfy" underwear that you hardly realize that you have on. That's the kind we want you to come in and get today or tomorrow—we say that because tomorrow is your last chance to get the very best Underwear that is made at these "Get Acquainted" prices.

- It's the kind that you'll put away next Spring and save for next Winter. It has quality woven through every inch of it. You won't just get one when you see these combinations—you'll get two or three. The prices here will show you why.
- Penman's in Combinations or 2-piece \$1.40
- Mercury in Combinations 2.15
- Silk and Pure Wool Combinations \$5.25
- Wolsey \$11.00 Combinations \$9.00

JACK THE CLIPPER USES SCISSORS ON SCHOOL GIRL'S HAIR

Houston, Texas, Oct. 20—A "Jack the Clipper" is at large in Houston.

For the second time in the past two weeks a Houston school girl has lost her hair at the hands of a man who has successfully made his escape without his identity becoming known or leaving an accurate description behind him.

Pretty little Miss Leah Culpepper, the 12-year-old daughter of Mr. and Mrs. J. W. Culpepper, is the second victim of this fiend. Saturday night the girl was standing on the back porch

of her home calling to a negro servant in the rear when a hand crept out from the dark recesses of the porch and grasped her hair, which was hanging down her back. With one quick her assailant severed her beautiful, curling blonde hair and dashed for the street.

The horrified and frightened girl, with trembling hands clutching at the remaining straggling stumps of hair, fled screaming into the house. During the time of her attack the girl was in full view of her sister, who was sitting at the piano but had not been aware of anything amiss until she heard the frightened screams of her sister.

Investigation proved that the culprit in his haste to make good his escape had dropped a double handful

of the girl's beautiful curls as he fled. Short Call Officers Reed and Lewis hastened to the scene but could not discover the identity of the "clipper" and his whereabouts from the meagre evidence the terrified child was able to supply.

This episode is a sequel to the clipping of the hair from the head of beautiful Marie Houser while she slept in the room with her sisters two weeks ago.

\$2,625 FOR A PIG.

Gulfport, Eng., Oct. 20—Hammonds Cobler, the famous Berkshire prize pig, has been sold for \$2,625.

WHY MOONSHINE'S KICK IS VICIOUS

Aldehyde Content Makes it Extra Poisonous, Says Official

Home-Made Liquor Contaminated by Zinc and Copper Salts, Health Congress is Told.

(Science Service.)

Cleveland, Oct. 20—That why "pure corn liquor" or "moonshine" has a more vicious kick than aged-in-the-wood whiskey was explained to the American Public Health Association meeting here by J. S. Duran, director of the industrial alcohol and chemical division of the Federal Promotion Commissioner's office.

Before and after prohibition analyses show that the only essential difference between the "aged-in-the-barrel" and "moonshine" whiskeys is in the aldehyde content. These aldehydes found in the local and home distilled article are very harmful to the human system, he said, and can only be eliminated by fractionating in an alcohol column or long aging in wooden barrels.

Salts of zinc and copper also contaminate many illicit liquors. The evidence at hand seems to indicate that the after effects in cases of alcoholism are worse than before prohibition, Mr. Duran warned.

Aside from the ghastly effects of the drinking of wood alcohol, redistilled denatured alcohol, tincture of ginger and other dangerous concoctions, he said, the minimum amount of vitamins required.

The body can store up vitamins for future use, Dr. H. C. Sherman of Columbia University told the delegates in an address this afternoon. He emphasized the importance of eating more than the minimum amount of vitamins required.

Laboratory animals fed on the minimum amount of vitamins required for growth and then deprived of them altogether fall rapidly, he said, while animals which have been given a large surplus of vitamins have continued to grow for some time after the vitamins have been taken away. Human beings fed on the minimum have not always been saved from the so-called deficiency diseases.

The amount of vitamins in meat will vary considerably, according to the diet upon which the animal has been fed. The same is true to a lesser degree of the nutrition afforded vegetables and fruits in different localities. Milk, eggs, fruits and vegetables in simple quantities were recommended by Dr. Sherman to supply these mysterious vitamins.

"Vitamins," said Dr. Sherman, "are like electricity. They can be handled and studied through their effects, but their exact nature is not yet known. Recent chemical experiments, however, seem to indicate that at least two substances may be involved in the effect hitherto attributed to vitamin A and the similar to vitamin B."

The increase in the mortality rate of infants under one month of age at Boston during the last winter is greater, among native born women than among the foreign born, Dr. Julius Levy of the Bureau of Child Hygiene of New Jersey told the association.

He quoted figures from all parts of the country in support of his contention that this increase presents one of the most alarming problems now confronting the public health authorities.

He said that the increase in the mortality rate of infants under one month of age at Boston during the last winter is greater, among native born women than among the foreign born, Dr. Julius Levy of the Bureau of Child Hygiene of New Jersey told the association.

FROM CATTLE KING TO OIL MAGNATE

Wichita Falls, Texas, Oct. 20—No history of the Electric field is complete without a story of the Waggoner interests. Twenty years ago the leading cattlemen of Texas were real kings of the range. W. T. Waggoner's yearly drive and transportation amounted to 40,000 head, and from June to October shipped two trains weekly, or 84 trains to market during the season.

For 10 years previous to 1918 a large oil company held leases on over 100,000 acres of his land and during that time there was little opportunity for the independent operator to gain a foothold, and it was not until the early part of this year that the ranch was definitely opened up for exploitation.

Waggoner has built a refinery with a capacity of 2,000 barrels daily, just across the line a few feet in Wilbarger County. At the present time his royalties and production is over 4,000 barrels daily. The over production he markets in tank cars, of which hundreds leave Electric daily. Not satisfied with branding his cattle with his three D's, each car bears the same brand as it leaves the plant.

Early last year a party of capitalists representing an English syndicate, made an offer to buy the entire holdings from Waggoner for a consideration amounting to \$75,000,000, which was refused.

On this ranch the Texas Company has 128 producing wells with a daily average of 30 barrels per well; 12 wells in the south field alone producing 68,000 barrels during September, the remaining 146 producing 67,000, making a grand total of 135,000 barrels of high grade oil for the month. Added to this production, hundreds of other wells are pouring their golden tributes to the coffers of the Waggoner estate, with over 200 derricks mark places in various places on this wonderful property.

NO MORE JAZZ CLOTHING FOR MEN, SAYS U. S. EXPORT.

Chicago, Oct. 20—The United States is through with jazz clothing for men, according to W. L. Mohr, general manager of the United National Clothing Co. "There are no freak models to speak of in the styles for next spring," said Mr. Mohr. "Conservative ideas predominate. Sport models and ruffolios will be the snappiest garments for men. Nifty knickers, with knitted cuffs to match the golfer's socks, will be a feature this

Why a woman's skin needs TWO creams

YOUR skin demands very different care at different times. To give it the proper care you need two entirely different creams—one for protection, one for cleansing.

One
Wind whips the natural moisture out of an unprotected skin and leaves it rough and dry. The burning effect of the sun is very similar. Unless you protect your skin it will become permanently rough and coarse.

The kind of cream you need for this is one that holds the natural moisture in the skin and acts as an invisible shield against exposure. This is Pond's Vanishing Cream. Delicate, soothing, it is absorbed the instant you smooth it on your face, and contains no oil to reappear in a shine.

Moreover, this cream gives your skin a smooth, velvety surface that

makes it look its best at a moment's notice and holds the powder on for hours.

The other
For thorough cleansing you need a very different cream—one made with oil. Nothing but an oil cream will reach deep into your pores and remove the fine particles of dirt that have bored deep.

The cream with just the right amount of oil for a thorough cleansing is Pond's Cold Cream. Smooth it on your face and neck every night and after every dusty trip. It removes the ground in dirt that ordinary washing cannot reach. It is so fine it cannot clog the pores.

These creams are sold in jars and tubes of convenient size at all drug and departmental stores at 50 cents each. They contain nothing that can promote the growth of hair. The Pond's Extract Co., 146 Brock Ave., Toronto, Canada.

PRINCE OF WALES TO STUDY SOCIETY OF OWN COUNTRY

London, Oct. 20—Putting aside foreign tours for the time being, the Prince of Wales will devote the year 1923 to personal investigation of England's social and industrial problems.

To achieve this he will make tours to many of the largest cities and manufacturing districts. His social engagements will be mainly fitted in with these trips. For instance, when he goes to stay with Lord Derby at Knowsley Hall next March in order to see the race for the grand national, the visit will be so arranged that he will be able to inspect the new dock extensions and other improvements at Liverpool and

also the present circumstances of the City of Manchester.

Already he has received numerous invitations from towns throughout Britain to call and make their acquaintance, and so far as he is able will do so.

While on his world cruise the prince carefully studied an extensive library of books devoted to social conditions and reforms, and he intends to obtain further enlightenment by attending the weekly meetings of the London County Council, the body which is responsible for the welfare of the 8,000,000 inhabitants of Greater London.

The period until Christmas, 1922, will be devoted to the prince's holiday, upon which the physicians have been insisting for the last three years. He will spend most of this time hunting

and has taken Easton Grey House, Malmesbury, for six months, where he will hunt regularly with the Duke of Beaufort's pack.

LOSS IS \$20,000 WHEN BRADSHAW GIN BURNS

Bradshaw, Texas, Oct. 20—Damage estimated Saturday night at \$20,000 was caused by the fire which swept the R. C. Malone gin here, destroying a large quantity of cotton seed.

The blaze was caused, authorities believe, by a box of matches that went through the suction from a wagonload of cotton.

This is the third cotton gin fire in Texas this week. The others occurred at Corsicana and Athens.

LOW PRICE SPECIALS

IN HIGH GRADE HEATING STOVES

A particularly favorable purchase of a limited number of the popular "OAK" style of Heating Stoves has enabled us to pass along to you AN EXCEPTIONAL SAVING opportunity, if you act at once. These powerful-heating, fuel-saving stoves BURN ANY KIND OF FUEL—hard or soft coal, coke, wood and even rubbish. They are made with rugged cast iron fire pots (some double lined), polished blue-steel body, cast base with roomy ash pan, and draw shaking grate. Removeable nicked trimming. A Limited Number Only. Act Quick.

No. 13 OAK Regular \$15.00
Special \$11.45

No. 15 OAK Regular \$19.00
Special \$14.25

That Regular Spoonful of Natural Bran.

THE daily use of natural Bran is the best way to keep fit, because Bran is a fine yet harmless corrective. It keeps the internal organs functioning regularly and naturally—it keeps the system cleansed—it promotes vigorous health.

Get the Bran Habit—and you will live longer and enjoy life better. Take three tablespoonfuls with the morning and evening meal every day. Take it with the foods you like best—it makes them taste better—at breakfast with milk, cereals, preserves, or fruit—at dinner with soup or in the form of bran gems, bread, bran muffins, cookies or biscuits. But be sure to take it regularly and be sure to get natural Bran.

MAKE BRAN COOKIES
½ cup Tillson's Health Bran; 2 cups flour; ¼ cup brown sugar; 1 heaping teaspoon baking powder; 1 level teaspoon baking soda; ¼ cup water; 1 egg; ½ cup butter; 1 heaping teaspoon ground cinnamon; ¼ cup raisins; ½ cup chopped walnut meats.

Beat sugar and butter to a cream; add egg and beat well; add water, mixed with baking soda and flour, stirred with baking powder; then add the other ingredients and mix thoroughly. Drop by teaspoonfuls on greased pan and bake in a moderate oven. Sufficient for 48 cookies.
