UNION CLOTHING COMPANY

26-28 Charlotte St. - Opp City Market - Alex Corbet Mgr.

SETTLED OUT OF COURT.

By FORREST ORISSEY.

(Continued.)

"Yes, it is at home." "Get it when you go to dinner and meet me here at eight this evening. That will give me time to clear the decks and do a little studying on this case. We have only three and a half days in which to do our work—not a long time, for, as you say, we must not fail."

When Edens returned to the lawyer's office there was an eagerness in the way in which the lawyer reached out for the letter which seemed to set all proportion to its possibility of value in the crisis which he was approaching. Could it be that this young prosecutor, who had been a mere dreamer who had risen to sudden reputation by luck and accident, but who now stood before him as a man of affairs, attaching importance to trifles and significance to things wholly insignificant to the lawyer, had called the spark of hope that had been to burn within him?

Standing in front of the grate his shadow sprawling across the room—he had not turned on the incandescent bulbs—Dole read the letter by the flickering of the open fire. "Vile!" he exclaimed as his eye followed the lines. When he had reached the bottom of the page he became silent and meditative for a few minutes and then remarked:

"Somehow I had a vague feeling the disturbing incident was connected with your present trouble. This letter does not prove it in the least. However, it strengthens that feeling into a conviction. I can hardly tell you why, but for one thing, the turn of a single phrase leads me to believe that the man who wrote this stuff is a lawyer."

Again the lawyer dropped into silence as he gazed fixedly at a steel engraving by Chief Justice Marshall, which showed only at the far end of the room. Edens was impatient to hear the lawyer tell what course was to be followed, upon what line of action he hoped of liberation from the clutches of a secret trust was to be based. Twice he asked the lawyer to speak, but he was not to be moved.

"Well, I do!" almost impatiently interrupted the lawyer. "I have had fallen before his eyes. 'It means that we will then have him in a tighter grip than we have now. But the first thing is to get to the bottom of this work and see what we can find. If there is any way in which you can assist me I will call on you, but I shall make an experiment on my own account first. Do not be alarmed by this. I shall be in touch with him two most expert operators."

"Now, gentlemen," said Dole, "as the results of the day's work we have before him that evening—before we can do the work in hand I must explain to you my purpose in having a sample of work taken from each machine in the Ashworth Building and the theory on the whole. I think they are more valuable than the probability—since he has no machine of his own—of his having one. To establish that suggestion is of importance to a case in which I am employed and in which I am greatly interested."

"Now for the theory: It is that each machine has its own individualities which show in its work. Am I right?" "Certainly!" the expert answered. "They are just as distinct as the individualities of human beings—and, in the whole, I think they are more valuable than the probability—since he has no machine of his own—of his having one. To establish that suggestion is of importance to a case in which I am employed and in which I am greatly interested."

"Now for the theory: It is that each machine has its own individualities which show in its work. Am I right?" "Certainly!" the expert answered. 79 Germain Street

An old millionaire refused point blank to lend \$10 to a young friend. "Well, I did not expect that of you," said the would-be borrower, rising and preparing to leave indignantly. "I will never forgive you for this refusal." "Of course you won't, my dear fellow," replied the old millionaire, with the utmost calmness, "but if I'd lent you the \$10 you wouldn't have paid me, and so it's as well to get the row over at once. Good morning."

addressed the right clerk as "Old Man" and the two disappeared behind the prescription-case. Quickly following them, he said to the clerk:

"Excuse me—but I'd like to get some Simple Cerium. Have you any made up? And I'm anxious to catch the next down-town car if I can."

As the clerk scanned the array of small blocks of prescription blanks he inserted it in the machine and wrote the sentence which he had read earlier in the evening on the samples from the machine in the Ashworth Block. He held the paper in his hand, after removing it from the machine, and seemed to be unconsciously unfolding and creasing it for sheer employment of his fingers. When he reached into his pocket for the money with which to settle for his purchase the paper remained there.

Quickly stripping a sheet from a small block of prescription blanks he inserted it in the machine and wrote the sentence which he had read earlier in the evening on the samples from the machine in the Ashworth Block. He held the paper in his hand, after removing it from the machine, and seemed to be unconsciously unfolding and creasing it for sheer employment of his fingers. When he reached into his pocket for the money with which to settle for his purchase the paper remained there.
