"MONEY THAT GOES UP IN SMOKE"
Every puff of smoke the engine sends up means money wasted in
freight transportation. This expense is eliminated when we buy better
goods for less money from our own home manufacturers.
When we buy an article produced from another section we have the
article and that section has our money. On the other hand, when we buy
an article of domestic production this section has both the article and the
money.
Money spent for merchandise made in some other city is lost forever,
as far as its value to this community is concerned.
Spend your money at home with home merchants and home manu-
facturers where its value stays with you and helps build up your interests.
Make the dollars you spend development dollars, building for you, your
neighbors and your children, making our community more prosperous and
more contented.
Remember that in confining your purchases to products of home manu-
facture you eliminate the expense of freight charges, otherwise tacked on
products of home manufacture you eliminate the expense of freight charges,
otherwise tacked on the price of the article you buy.
