

No. 2 barley shall be reasonably clean and sound, but not bright and plump enough to be graded as No. 1, and shall be reasonably free from other grain, and weigh not less than forty-eight pounds to the bushel.

No. 3 extra barley shall be in all respects the same as No. 2 barley, except in color, weight not less than forty-seven pounds to the bushel.

No. 3 barley shall include shrunken or otherwise slightly damaged barley, weighing not less than forty-five pounds to the bushel.

No. 4 barley shall include all barley equal to No. 3, weighing less than forty-five pounds to the bushel.

All barley which is damp, musty or from any cause badly damaged or largely mixed with other grain, shall be graded as "rejected."

PROVISIONS AS TO ALL GRAINS.

In the inspection of grain, inspectors are to be governed in their inspection of the foregoing classification by the standard samples selected by the Board appointed for that purpose. If, however, they are called upon to grade any wheat, which, as to weight, is not equal to the weight of such standard sample, they are not, if they deem it otherwise equal to the standard sample, to reduce the grade, provided the weight is equal to that required by the legal definition hereinbefore given.

Neither shall the inspectors decline to grade any wheat, other than No. 1 Manitoba hard, because it differs in its constituent parts from the standard sample, provided it is, in respect of soundness, cleanliness and the proportion of hard wheat contained therein, and its general milling qualities equal to the standard placed in their hands for their governance.

Nor shall the restrictions mentioned in grade one as to scoured or brushed wheat apply to any of the other grades fixed hereby.

No grain that is warm or in a heating condition shall be graded.

No grain that has been subjected to treatment by use of lime or sulphur shall be graded higher than No. 3.

All inspectors shall make their reasons for grading grain, when necessary, fully known by notation, on their books.

Samples furnished to inspectors shall be made to conform as strictly as possible to the conditions and terms specified in foregoing classification.
