COMMERCIAL REVIEW. MONTREAL, Nov. 16, 1858. The winter appears to have set in, the sleighing having been tolerably good in this vicinity for three days.

There is something very anomalous in the pork trade of Canada, to which our attention is drawn by a valued correspondent. At the present time, and indeed very frequently, the price paid by packers in Chicago is relatively

The wholesale poisoning, at Bradford, by accidental admixture of argenic in logenges, had resulted in 27 deaths, and 100 more were suffering from eating them.

The Bank of England rates continued unconsiderably higher than the price paid in Montreal, and yet every year there is a considerable quantity of barrelled pork brought from Chicago to Montreal. If it be profitable to pack in Chicago, then it should be more profitable to pack in Montreal, and yet more profitable to pack in Montreal, and yet how little enterprise is put forth in this direc-tion here! If a few lots of hogs arrive to-gether, they go a begging for want of suf-icient enterprise and spirit to pack exten-

incient enterprise and spirit to pack extensively.

Our correspondent says:—

"Perhaps the cause of the difference is, that the packer in Canada is not in general the wholesale dealer in the article, while in the United States the largest packers are also the largest wholesale dealers. It must pay extremely well to pack pork in Toronto at \$4 to \$5 per 100 lbs. as lately quoted there or at \$5 to \$6 as quoted in Montreal, the Lower Canada Pork being fattened on Peas is superior to Pork fattened on Corn and commands a higher price. Could there not be more competition brought into the packing business in Canada? If a liberal house were to give the highest market price based on Chicago and Cincinnatti prices with addition of freight, it would, I think, pay them well and at the same time encourage the farmers.

The Daily News city article, dated Friday evening, says the funds to-day, upon the whole, were well supported. Prices closed the same as yesterday, notwithstanding several adverse features, meluding continued flatness of exchange—flow of gold from the Bank of England, and increased demand for money, In other departments of Stock Exchange much firmness was likewise displayed. Business in all quarters is still very limited. Less than a fortnight ago, the rate of loans on English Government securities in Stock to Exchange was about 1 per cent. This p. m. the loans on Government stock were in large demand, at \$2 to 3 per cent. In the discount market no increased movement is apparent this p. m.

The same remarks apply to beef and other things."

An experienced merchant informs us that one reason of the lower relative price pad for Hogs here than in the States is, that Canadian hogs cut to far less advantage. The improved breeds in the States have a very small portion of coarse pieces, and hogs of 200 to 250 lbs., will, it is said, make mess pork,—whereas, in Canada, the limbs, necks, heads, &c., are so large and long that it requires hogs of 300 to 400 to make mess pork, and even then there is a great deal of loss by coarse pieces. Will not our farmers see to this matter, and rear hogs that will be worth the highest price.

The Chicago Market has been fluctuating toward the close of the Navigation. Our last circulars quote Spring Wheat 66 cents

Cent and rates exhibit upward tendency. The applications at the Bank increased from day.

The Times city article says,—English funds opened at the slight decline experienced after the regular hours on Thursday evening, but the Market was totally withhout animation. Early in the day the rate for advances was 2 per cent, but subsequently were sought at 21 per cent. There was likewise more activity in discount, and 11 per cent was the lowest charge.

The Overland Mail from Bombay reached London at 5 o'clock, this morning.

The struck by a thought and knocked into the prices that the prices the control of the navigation for prime or prime. The business in Iowa and Min-

which latter continues in demand all winter, Dressed hogs are worth \$5 to \$5,50. Butter continues in moderate demand, both for the present and home consumption. The best price obtainable for good store packed lots to-day is 14 cents. Though anything equal to No. 1 would bring 17 cents or more readily.
