Quarantine Removed

Owing to the outbreak of Foot and Mouth Disease in Great Britain having been traced to Dominion Live Stock Commissioner, J. G. Rutherford, has removed the restrictions on the importation of pure bred stock from Great Britain to Canada that have been enforced for some little time back.

There is nothing now to prevent Canadian breeders who desire to import stock from Great Britain without restriction. Some consignments of stock are on the water and will reach Canada shortly.

Horse Breeding Legislation

(Continued from page 1)

In view of the tremendous demand for horses for farm and railroad work in all three prairie provinces, every encouragement should be given to horse breeding. Provincial aid might well be given to the industry through the carrying out of a strict inspection under some such Act as above outlined, by offering a bonus to all pure bred stallions that passed a rigid inspection provided by the Government.

All legislation of this kind should be considered first of all from an educational standpoint, and not as specially calculated to protect or assist any one class of people. Few people can tell a bogus from a genuine pedigree certificate and fewer still, it would appear, can tell whether a stallion is or is not free from even the most glaring hereditary unsoundnesses. Legislation calculated to open the eyes of the blind is surely good legislation.

County License for the Automobile.

—There should be a County license taken out for every automobile that travels on country roads. Some motorists do not heed any warning, and do not try to avoid accidents to those driving horses on the roads but dash along regardless of everything. Country roads were built by the farmers and for their needs. If, therefore, the motorist takes possession of the road and wants it kept in shape for his benefit he should be subject to the control of the municipality through which the road runs.—Geo. Jaap, Jr., Lambton Co., Ont.

Milk Record Bull for Natal.—Mr. John Drysdale, of Grabbington, Port of Menteith, has completed the purchase and shipment of a black and white Ayrshire bull, to the order of Mr. J. W. Moor, Moss River, Natal. This bull has been purchased from Mr. J. Connell, Laigh Tarbag, Ochiltree. Like too many other Ayrshire breeders, Mr. Connell had neglected milk records, and only knew a general way how his cows were milking. However, did know that the dam and granddam of this bull were good milkers, and as they are still in his possession, Mr. Drysdale was able to satisfy himself by careful tests, both as to the quantity and the quality of their milk. The dam and granddam are both splendid cows, and Mr. Drysdale purchased this bull out of quite a number offered. His new owner has a large herd of black and white Friesian cattle, and although these are yielding heavy quantities of milk, the butterfat content is low. Mr. Moor's attention was called to the Ayrshire Milk Record results by Mr. Alex. Drysdale, a son of Mr. Drysdale, who has been testing Mr. Moor's cows for him. That gentleman resolved to import an Ayrshire bull which, while preserving the color of the Friesian cattle, would improve the butterfat. The order for the bull was placed with Mr. Drysdale, and the animal is now on his way to Natal. There's money in the milk

records. Let Ayrshire men now keep them.—Scottish Farmer.

Even with fattening hogs it is best to give what they can eat on up clean at one time and at regular intervals.

BURNSIDE AYRSHIRES IMPORTED AND CANADIAN-BRED

Prize winners at the leading shows. I hold the award of merit given by the Board of Directors of World's Fair, St. Louis, to the breeder of largest number of prize-winning Ayrshires at said Exposition. I am leaving shortly for Scotland and will be pleased to receive and attend to orders placed with me.
