### FIGURE IT OUT FOR YOURSELF

\$12.87—cost of new wheel on average car priced around \$1000 or less.

\$ 5.00—cost of new wheel on a Ford car.

\$ 7.87—the 60% saving secured by the Ford owner.

And this merely indicates the general saving in every item of upkeep in which the Ford possesses a big advantage over any other make of car.

An assembly of Ford spare parts—enough to build the touring car complete—costs only \$40 more than the standard list price of the car, while on the average car priced around \$1000 and less a complete set of spare parts costs \$941 more than the car—over twenty times the Ford excess cost.

And yet tests conducted by one of the most authoritative Government laboratories in the world have shown that the quality of Ford constructive material is actually superior to that in most of the best cars made.
