Questions and Answers.

Condensed advertisements will be inserted under this heading at five cents per word each insertion. Each initial counts for one word and insertion for two words. Names and addresses are figures for any advertisement under this heading. Parties having good pure-bred poultry and eggs for sale will find plenty of customers by using our advertising columns. No advertisement inserted for less than 75 cents.

Veterinary.

Unthrifty Mare.

Mare rising 4 years is out of condition and sweats easily. She has a few pin worms. She eats well, I had her teeth dressed. Her hair seems dry. F. H.

Ans.—It is probable she has other worms than pin worms. Mix 3 ozs. each of powdered sulphate of copper, sulphate of iron and tartar emetic, and 1½ ozs. calomel. Make into 24 powders and give her a powder every morning and night. After the last has been taken give her a purgative of 8 drams aloes and 2 drams ginger. V.

Weak Knees, etc.

1. Mare is getting weak in her knees.
2. Is cracked wheat and barley, or boiled potatoes liable to cause indigestion in a horse? N. N.

Ans.—1. This can be corrected to some extent by standing her in a stall a little lower in front than behind, or in a box-stall with level floor. The use of local applications is ineffective.

2. Any sudden change in food is liable to cause digestive derangement. The wheat and barley is very liable to cause trouble in any case unless fed in very small quarters. Boiled potatoes might also cause the trouble. We have never before heard of feeding them to horses. V.

British Government Sells Its Frozen Meat Stocks.

The British Government has recently announced the sale of its entire frozen beef stock to Vestey Bros. This gigantic deal, which is reported to amount to well over 1,000,000 quarters, is said to comprise the whole of the Government's stocks of frozen beef in that country, Government Australasian beef cargoes on the water, and any Government-owned stocks and killings up to the end of November, 1920.

Considerable criticism has been voiced by English importers, meat agents, and wholesalers respecting this deal, which, they assert, is a digression on the part of the Ministry of Food from its arrangements with the frozen-beef agents. Under their agreement with the Food Ministry these traders became, during the latter part of the war, the avenue for the disposal of Government-purchased meats to the British public on an all-round 2% commission. The trade maintains that under these arrangements it is entitled to a 2 per cent. commission on the vast stocks included in the present transaction.

It is stated on behalf of the Government that the beef stocks as a whole were offered to the trade as a body prior to the sale to Vestey Bros.

It is said that Vestey Bros. control about 2,000 retail frozen-meat shops in the United Kingdom, which will form an outlet for the stocks they have acquired, while their branches and business connections in Europe, America, and the Far East are also available for the disposal of this meat.—U. S. Market Reporter.

Guatemala Organizes Department of Agriculture.

The Government of Guatemala has recognized agriculture as being of sufficient importance in that country to warrant the establishment of a separate department directed by a cabinet officer, according to the American consul at Guatemala City. Guatemala is fundamentally an agricultural country and coffee is the important export crop. As a result of the extremely low prices being quoted for coffee, the demand for extensive Government supervision has become imperative. It is believed that one of the first moves of the new Secretary of Agriculture will be in the direction of diversification of agricultural production and importation of improved live stock.—U. S. Market Reporter.

What Makes Beaver Boarding So Simple and Easy

Only three steps—nailing, painting and paneling—all three easy and pleasant, is what makes the building of walls and ceilings of Beaver Board such a simple operation.

And Beaver Boarding is quick work. The big, flawless panels of this good lumber product cover large spaces, no time is needed for drying, one step follows the other in rapid succession. The reclaiming of an attic is completed in an unbelievably short time. The building of a new house is speeded through to quick completion. The muss and litter that invariably follows a plaster job is entirely eliminated when Beaver Board is used. And Beaver Board is as easy to get as it is to use. Your nearest lumber dealer will deliver it, or you can take it out next trip.

With all these conveniences there is a sureness about the Beaver Board result—provided genuine Beaver Board, with the trademark plainly printed on the back of each panel, is used. Beaver Board will last as long as the building. It cannot crack. It is as permanent as the woodwork and hardwood floors.

Our book, "Beaver Board and Its Uses," fully explains the simple operations and gives many practical and decorative suggestions. Write for a free copy to-day.
