

PRINTED BY REQUEST.

Mix the following by shaking well in a bottle, and take in teaspoonful doses after meals and at bedtime.

Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces. A local druggist is the authority that these simple, harmless ingredients can be obtained at nominal cost from our home druggists.

The mixture is said to cleanse and strengthen the clogged and inactive Kidneys, overcoming Backache, Bladder weakness and Urinary trouble of all kinds, if taken before the stage of Bright's disease.

Those who have tried this say it positively overcomes pain in the back, clears the urine of sediment and regulates urination, especially at night, curing even the worst forms of bladder weakness.

Every man or woman here who feels that the kidneys are not strong or acting in a healthy manner should mix this prescription at home, and give it a trial, as it is said to do wonders for many persons.

The Scranton (Pa.) Times was first to print this remarkable prescription, in October of 1906, since when all the leading newspapers of New York, Boston, Philadelphia, Pittsburg and other cities have made many announcements of it to their readers.

Magistrate.—You say you didn't steal the watch. Then where did you get it? Prisoner.—Bought it, your Worship, Magistrate.—Where? Prisoner.—In Regent Street. Magistrate.—What did it cost? Prisoner.—Really, your Worship, I quite forgot to ask.

Tommy had been punished. "Mamma," he sobbed, "did your mamma whip you when you were little?"

"Yes, when I was naughty."

"And did her mamma whip her when she was little?"

"Yes, Tommy."

"And was she whipped when she was little?"

"Yes."

"Well, who started it, anyway?"

QUESTIONS AND ANSWERS. Miscellaneous.

WORMSEED MUSTARD.

I am sending you under another cover a weed pulled in this locality. Please give name and characteristics.

AN OLD SUBSCRIBER.

Ans.—This is a part of an unusually large specimen of wormseed mustard (Erysimum cheiranthoides), a common, but scarcely ever an obnoxious weed. The specimen lacks developed seed-pod and root. The mustards are similar in so many respects that whole plants, with developed fruit and flowers, should be secured.

J. D.

SEEDING TO GRASS.

What is the best time to sow grass seed? If I could get a crop next year, I will be thankful.

D. B.

Ans.—Sow as early in spring as the ground can be worked into a good state of tilth. No variety of grass or clover grown in Ontario should be depended on for a crop the first year, although sometimes alfalfa, or even red clover, will give a light cutting on rich soil in a favorable season, when sown alone or with a light crop (say, 5 pecks per acre) of barley.

LINE FENCE.

What is the law regarding line fence? It has not been divided yet. Can I put in good shape, new or otherwise, any part of the fence I choose and compel the other party to put up his half? There has been a lot of damage done to my crop, and I want a good fence, and the party don't care in any way. The fence is a poor one.

M. J. R.

Ans.—If you are unable to reach an agreement with your neighbor, the only course open to you is to call on the fence viewers to assign to each of you his proper proportion of the fence.

TREATMENT FOR LUMP JAW.

Cow, due to calve in February, has lump jaw. What is the iodide-of-potassium treatment?

SUBSCRIBER.

Ans.—The treatment consists in giving a dram of potassium iodide three times daily, and gradually increasing the doses until symptoms of iodism begin to appear. These are: Appetite fails, she refuses to drink much, saliva runs from the mouth and tears from the eyes. When any of these symptoms appear, cease giving the drug. In three or four weeks repeat treatment, if necessary.

GRASS FOR LOW-LAND PASTURE.

What kind of a grass would you advise to sow on land flooded back by lake in spring for about a month?

J. H.

Ans.—For land as here described, I would suggest the following mixture for a permanent pasture: Red top, 4 lbs.; orchard grass, 4 lbs.; meadow foxtail, 3 lbs.; Kentucky blue grass, 2 lbs.; timothy, 2 lbs.; alsike clover, 3 lbs.; white clover, 2 lbs. This makes a mixture of 20 pounds of seed per acre, which is somewhat lower than is usually recommended, but the varieties here indicated are all hardy, and, when once well established, should furnish a large quantity of pasture of good quality.

C. A. ZAVITZ.

The London Tribune tells a story of an unsuccessful literary life. A philanthropic visitor asked a resident of the penitentiary, "What brought you here, my friend?"

"Unsuccessful authorship, ma'am," answered the man in cell 444.

"How could there be anything criminal in that? Please explain."

"I was busily engaged on a little work on the national currency, when the secret-service men swooped down on me and caught me with the tools in my hand."

He was a young doctor, and he had been asked to break some sad news to the wife of a man who had been run over by a motor.

"Is my husband really ill?" asked the lady.

"A—er—a little run down," said the budding Treves, hopefully.
