Water, &c. From 1 to 40 horse power.

March 14, 1884.

I X L FEED MILLS.  
The cheapest, most durable,  
and perfect iron feed mill  
ever invented.

ONTARIO PUMP CO.,

Gentlemen,—In regard to the 16-foot geared Wind Mill I bought of you, I can say  
it more than fills my expectations in every respect. In a fair to good wind I can saw  
wood at the rate of four cords of hard wood per hour, cut once in two. In a stiff wind  
I open the fans just half way and get all the power I require. In regard to your feed  
mill it is just grand. I have ground peas and oats at the rate of a bushel in three and  
a half minutes, and ground it as fine as one would wish for. I can grind fine corn  
meal, also Graham flour. Have ground, since the 15th of February, 325 bushels of  
grain for customers, besides doing my own work with it. One man brought a grist of  
screenings, such as small wheat, mustard, and pussy grass seed, thinking that I could  
not grind it; but I ground it to powder, looking just like ground pepper. Your 13-  
foot geared mill, I think, is quite large enough for any farmer to do his own work.

Yours truly, EDWIN KEELER,  
Maitland P. O.

## Extra Large Apple Trees
