

## Was Troubled With His Liver For Four Years.

Doctors Gave Him Up.

### MILBURN'S LAXA-LIVER PILLS CURED HIM

Mr. Harry Graves, Junkins, Alta., writes:—"I can not say enough in regard to your wonderful Milburn's Laxa-Liver Pills. For four years I was troubled with my liver, and at times it would get so bad I could not move around. At last the doctors gave me up saying it was impossible for me to get cured."

My father got me four vials of your Milburn's Laxa-Liver Pills, but I told him there was no use trying them and that it was only a waste of money, however I took them and to-day, six months later, I am a well man and weigh twenty-four pounds more than I did. I would advise all liver sufferers to use them."

Milburn's Laxa-Liver Pills are 25 cents a vial, or 5 vials for \$1.00, at all dealers, or will be mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

### LINCOLN LONG-WOOL SHEEP And Shorthorn Cattle.

The Riby Grove Flock and Herd, owned by MR. HENRY DUDDING,

Is the source to which practically all the leading export buyers have resorted from time to time to obtain stud sires and dams, and rams and ewes of unrivalled merit and quality. The record of its show-year success is unequalled, and so are its sale averages. Selections of Sheep and Cattle always for sale.

Some time ago Mr. Balfour was traveling in the north of Britain when his train had a long wait at a wayside station. The ex-Premier got out and walked up and down the platform with a friend. "Isn't this place invigorating?" he said to his companion. "Na, sir," said a porter standing by, "this is Inverary."

### QUESTIONS AND ANSWERS. Miscellaneous.

#### SICK HENS.

I have been losing a number of hens lately. They seem in perfect health, and all at once become paralyzed in the legs. I have two that way now, and they cannot stand up. Their heads and combs are a healthy, red color, and they still eat heartily. We examined them, and could find nothing wrong in any other way. There are no lice on the bodies. When they are that way a few days, the legs seem to turn green in color, and they die about a week after. Hens have been well fed, oats and barley, with water and skim milk for drink, and free run of farm. L. W. H.

Ans.—Fowls which are well fed and have the free run of the farm should not be sick. For all that, there is a cause for the ailment, and in this case it looks very much like a form of enteritis. A complete change of diet should be tried for a while at any rate. Variety in rations is desirable in all cases. A chief cause of enteritis is eating tainted, moldy or filthy food; drinking impure water, or water which has been standing in the sun, and has become putrid, etc. A dessertspoonful of castor oil to each fowl is frequently given. A. G. G.

#### REGISTERING CLYDE FILLIES.

We have a well-bred Clydesdale filly, two years old, with a number of good crosses, and would like to know what is needed to get her registered. How many crosses do we have to have? Do we have to have the dates when this mare, her dam, her grandam, and so on, were foaled? Do we need the names of the men who owned these mares? Please give any other information necessary. J. W.

Ans.—The rules of entry say a mare must have four top crosses of sires recorded in the Clydesdale Studbook of Canada. Applications for registry of four-cross pedigrees must be certified and sworn or affirmed to by the breeder, before an officer authorized to administer oaths. After October 15th, 1908, the owner of the sire of an animal, the pedigree of which is offered for entry, shall certify to service, giving date of service, with name and number of sire. Signature will not be accepted unless such ownership appears on the books of the Clydesdale Association of Canada. In the event of its being impossible to secure such signature, the matter shall be dealt with by the Pedigree Committee. For application forms and further information, address Accountant, Live-stock Records, Department of Agriculture, Ottawa.

#### COST OF DRAINAGE.

I am a farmer, and live in the town of —, in which a part of my farm lies. At a corner of the property, two public roads meet. The water, principally from heavy rains, running along the roadside, runs into this portion of my lot from both streets, and destroys my crops. The municipality has made no provisions to take this surplus water away. A portion of this water runs from above on higher rise of ground on my land to the road, the natural course, and follows the road gutter, then leaves the road and overflows into my field. The Council has not provided any outlet for this water. I have given notice for two years of the condition, and have advised them of legal proceedings against the town for damages. The said Council say I have a right to pay half cost of the drainage. I claim they must furnish an outlet for the street's water, and that I have no legal right to bear any portion of the cost. SUBSCRIBER, Ontario.

Ans.—There is no strict rule of law governing the matter. Each case depends mainly upon its own circumstances. If you cannot come to an agreement with the Council, you may have the matter disposed of by the Engineer appointed by the Council, pursuant to "The Ditches and Watercourses Act" (Revised Statutes of Ontario, 1897, Chap. 285), and we would refer you to the Act as to the steps to be taken to obtain the award. But judging from your own statement of case alone, we are inclined to think that you would do well to fall in with the Council's view of the matter. We cannot see that you are right in your contention.

# Galt Shingles

As a roofing material for your home nothing else can compare with "GALT" Steel Shingles. Light in weight, handsome and dignified in appearance, a roof constructed of them is just as fire-proof as one of slate, in fact more so because steel is also lightning-proof. "GALT" Shingles cost little if any more than wood shingles and they last from two to five times as long without any attention whatever. The British Galt-vaized Steel from which they are made is wear-proof—can't burn, crack, curl up or rust. They last indefinitely. The patented construction of locks or seams is so tight as to exclude even light. You can't force water through "GALT" Shingles with a hose. Our new booklet "Roofing Economy" contains information that every progressive-minded property owner should have. It's free to interested people.
