ATELNS BEPORTER

BLIND BABIES--AN APPEAL

An Open Letter to the Generously Disposed.

A few weeks ago I came across in the London Spectator an appeal by Sir Arthur Pearson, in behalf of a specially halpless class of the com-

specially halpless class of the com-munity, in which he says: "At Sunshine House, Chorley Wood, we have 25 bables who are being taught to be little human beings, so far as that is possible, from their earliest days until the age of five, when they are transferred to the resi-dential schools for the blind. There are enough poor blind bables in the are enough poor blind babies in the Kingdom to fill six Sunshine Houses. and I want money to enable me to start the other five."

From this it would appear that in England there is room and need for six homes for blind bables and only one in existence. But here, in this favored Canada, nothing has heretofore been done in this direction, except a movement commenced last year by the late Mr. T. Hope Churchill, of Toronto. who, after collecting between one and two thousand dollars, specially deposited in a local bank to the credit of the fund, asked me to aid him in raising a sufficient sum to purchase premises for the proposed home. Having warm sympathy with Mr. Churchill's praiseworthy enter-prise, I promised to give him the necessary assistance, but circumstances prevented me undertaking the work until the present time, and meanwhile death suddenly removed Mr. Church-ill. Now, in order that the money collected may be utilized for the pur-pose for which it was subscribed, a charter (without stock subscription) is being secured so that the incorpor ated company can legally and properly lay claim to the money in the bank. and proceed to carry out the objects for which the charter is sought, viz.; "To provide a refuge for baby and Infant blind, to provide free scientific care, training and maintenance, to save the lives of even a few of the many of such unfortunates who, for of such service, perish every year; and to return these little ones to their parents, at school age, with normal healthy bodies and sound minds." Such, in brief, is the task before

the promoters. Money is urgently re quired to carry it to successful com pletion. Canadians have never been known to turn their backs on any de-serving cause, claiming their aid, and surely this appeal will meet with a generous response. Help now, with-out waiting to be called upon by a collector, so that the close of the year may see "The Blind Bables" Home, Nursery and Kindergarten" in successful operation in the Capital city of Canada. Cheques may be made payable to "Canadian Blind Bables" payable to Home." A All remittances will be promptly acknowledged. C. Blackett Robinson.

188 Dufferin road, Ottawa

CHILDREN OF ALL AGES

Children of all ages-whether it be the new-born babe or the growing child—have to be constantly guarded as to their health. Upon the good health of the little one largely depends his strength and usefulness in after ears. Baby's Own Tablets are th ideal home medicine for children of all They are a gentle but thorough ages. laxative which are absolutely guaran be free from opiates or other harmful drugs and which may be given to the youngest child with perfect safety and beneficial results. Through their action on the bowels and stomach they banish constination and in digestion; break up colds and simple fevers and make teething easy. Mothers, you can make your little ones well and keep them well by just keep-ing a box of the Tablets at hand and by giving an occasional dose to the to keep his little bowels regular and his stomach sweet. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

"Kuals Lipis is very near to one's visualization of Hades," writes William Beebe in the Atlantic Monthly of a jungle river station in Pahang (Federated Malay states). The American adventurer - naturalist de-scribes the burning, fever stricken re-moteness of one of the most inacces-sible parts of the world. Near his rose covered dark bungalow in Kuala Lipis, "close under the lofty jungled heights, deep within a blind, hanging valler, six white men weltered in the liam Beebe in the Atlantic Monthly

Aeignts, deep within a blind, hanging valley, six white men weitered in the stifling heat and planned the impos-sible—the combatting of virulent cholera amorg superstitious Malays." Mr. Beebe draws an impressive contrast between man and Nature in the Behave bitterland "Will mon contrast between man and Nature in the Pahang hinterland—"Wild men of the mountains, Sakais, almost mon-key-like in their life, and wandering lepers with dissolving surfaces which once were faces. And in the same country with all these people whose lives were so pltifully hopeless, threading the bamboos and the tree ferns, were wonderful pheasants, in-describable argus, and green peacocks in flocks." in flocks."

He writes of floating in a govern-ment houseboat down the Pahang whose "banks teemed with bird life of glorious colors, monkeys who laughed in the night. As one wakes from slumber, so came the dawn, gradually, in these tropical lowlands. The glare of the sudden leap of the sun above the horizon was dimmed, delayed, diluted, by the thick morning mist-mist whose grayness I loved to think of as the exact shade of ele-phant's breath." He had himself phant's breath." He had himself struggled through an attack of chol-era and adds, as a detail, that it was necessary to have his Malay servants boil the knives and forks an boir the knives and forks and spoons instead of simply washing them in the river—"With dead cholera victims floating past, children and others, and a hundred cases dying down river out of every two hundred, I dared take no chance

HORRIFIED BY LEPERS.

Once the writer went ashore after beafowl-"and was balancing my ammunition, when a face suddenly ap-peared, more horrible than any beast, more inhuman than the lowest monkey. It was but the memory of a face, and should have belonged to a corpse long since buried; but, instead,

a brief but sharp return of fever, made that forenoon a nerve fashioned mi-

rage. The heat and humidity pressed upon me like material substance. I listened, yet dreaded to hear sounds, listened, yet dreaded to hear sounds, fearing them only less than the end-less silence which framed them. When I squatted on a log, the rhythm of the hosts of advancing leeches (a pest with which the Malay jungle is infested), would sometimes seem to merge inters thousand endless, undu-lating lines of vermin, closing in on all sides, and the feel of their mesurall sides, and the feel of their measur ed loopings on neck or wrist or hat rim was almost unendurable. The windless shush, shush of leaves under their combined movement increas ed, until it became a veritable bellow ing

"I longed to return, but I knew "I longed to return, but I knew I must not. I must not give in to this terror of jungle things which usually aroused only interest. Then came the climax. I had the chance of my life—ten peacocks at close range—and for a while was putting myself togeth-er when I fairly screamed and dronned

for a while was putting myself togeth-er when I fairly screamed and dropped my gun, leaping from the hiding place and climbing ten feet into a tree ten-anted by fireants, in a trembling sweat of fear. A tiny squirrel—one of the little dwarfs scarcely as long as one's hard—had jumned on my back, and I had reacted as from the charge of a buffalo. MEN IN EVENING CLOTHES. There is a graphis description of formal dinner Mr. Bebbe attended in the wilderness of Kuala Lipis, its circumstances typical of the manners and "I shall never forget that entertain -because of its sinceer hospital ity, its discomfort and the eiem tragedy which ever played and flick ered so near the surface. In breath less heat we donned full evening dress and * * * then had to walk through dense reeds to the house of the government agent.

who rode the plains of Alberta, reservations. There are nearly 20,-Saskatchewin and Manitoba 48 years 000 miles of railway in the four plentiful, knows more about "Can- persons and of 225,000,000 acres of grant and santa and plentiful, knows more about "Can-sda's Wcctern Empire" than any other man. He killed and ate the buffalo. narrowly escaped bethe occasion, suggested and built in Alberta the largest irrigation sys-tem in North America, recruited thousands of British and Canadians in the United States during the recent war and not only solunteered for but saw scrvice with the Can-adian Expeditionary Force in Sibert Now the four western provinces cent war and not only solunteered for but saw service with the Can-adian Expeditionary Force in Siberia. Now the four western provinces of Canada have a population of 2,500,000, the buffalo are to be found Canada's share in the great struggle has involved her in financial obliga-

punkah rope, dim jungle sounds, and the rustling of a gecko or snake in the rof. Then I spoke of some cas-ual thing in the outside world, and all leaped hysterically to answer; some one swore at a servant, and again the thread of normal conversation was nended

"They begged us to talk, talk of the coast, of Singapore, of England; but the conversation always settled back cholera. A woman decided-and changed her mind three times in two courses—to clear out to Kuala Lum-pur, then to stick by her husband."

If Breath Comes Hard If Nose is Plugged You Have Catarrh

Perhaps you haven't heard of the Most of the fifteen originators were good swimmers, two or three of them in fact holding certificates for helping to save life in the water and without ex-ception each had spent much of hor va-cation time in the vicinity of one and another of the stations of the United States Volunteer Life Saving Corps. The names of the officers and projec-tors given by Miss Mehrtens show that Perhaps you haven't heard of the new remedy—it's so pleasant to use —fills the nose, throat and lungs with a healing balsamic vapor like the air ot the pine woods. It's really a wonderful remedy—utilizes that marvelous antiseptic only found in the Blue Gum tree of Australia. The name of this grand specific is Catarrhozone, and you can't find ite

The name of this grand specific is Catarrhozone, and you can't find its equal on earth for coughs, colds, caeven at the start the league had equal on earth for coughs, colus, ca-tarrh or throat trouble. You see it's no longer necessary to drug the stomach—that spoils digasion—just simply inhale the balasmic essences good material. For instance Miss Florer

countries for their new home, and Col. Dennis believes that 500,000 each year may follow them until these provinces have a total popu-lation of 10,000,000. Canzda, he fur-ther believes, is destined to be "the revesione in the arch of the Derite keystone in the arch of the British Empire."

ample security for many times her war debt, must be made _____ oductive of wealth through development. Between 1905 and 1914 about 2,500,000 people settled in Canada,

2,000,000 people settled in the four western provinces. They let Great Britain, the United States and other

course in first aid to the injured, the half drowned, the stunned, those tak-en with cramp and so on, being given at rooms in East. Thirty-fourth street. The life-saving lectures have been con-ducted like conferences, Miss Mehrtens declared, English and American life-saving methods being compared and discussed and the best points in both selected for practice. nust look to their laurels. Within a few days the National Women's Life Saving League will be an incorporated body. A

discussed and the best points in both selected for practice. "According to the teaching of the Royal society," said she, 'any one knows even a little bit about swimming in another will be to help a purpage in is perfectly well able to help anyone in the water, provided he is she knows how to avoid or break that drowning clutch, the fear of which scares off so many amateur helpers."

League will be an incorporated body. A little more than a year ago when about fifteen young women got together and with some magivings decided to organ-ize the league they did not dream that twelve months later it would have a membership of 190 girls, a huzdred of whom were good swimmers efficiently posted in the art of life saving, that incorporation papers would be all ready to sign, that plans to open local branches in Beston and New Jersey would be under way with the prospect eventually of starting similar branches all over the United States. Most of the fifteen originators were good swimmers, two or three of them in The final life-saving testres off so many amateur kelpers." The final life-saving testure will in-clude life-saving tests given during the first week in June, probably at one of the baths, at which time members who prove their skill will receive certificates that they are qualified to teach life-saving scientifically. More than one hundred girls have taken the lessons, and most of them will qualify for a cer-tificate, the president thinks, although it is not likely that many will take up the work professionally. "Already our example is telling for good in the yablic schools," said the president. "I srough some of our mem-bers who teo ma a land swimming drill has been incuded in the gymnasium work of several of them and more are sure to follow.

sure to follow when about 17 years old swam fro the

some

when about 17 years old swam from the Battery to Coney Island, was made vice-President: Miss Adeline Trapp, who when 16 years old swam through Hell Gate and was the first woman to do it and who before had earned a sil-"Visitors have gone back to other cities and told of our league and its aims, with the result that local branches are now being formed in Boston and New Jersey, which means in turn that before a great while probably every seaport town in the United States will ver medal by fescuing a girl from drowning at Old Mill Fort, was elected secretary. Miss Sadie Marrin and Miss Teresa Daly, slated for treasurer and have a woman's life-saving league. I hope so, anyway." In answer to the common criticism

that no matter, how well a that no matter, how well a woman can swim, she is apt in time of danger to lose her head, Miss Mehrtens produced a sheaf of letters and newspaper clin-pings describing hundreds of rescues ef-fected by women and girls. "On the contrary," she declared, "it is the exception for a girl who learns to swim when very young to lose her head in time of danger in the water. Take the well known case of Dolly Ste-venson, who a few years ago saved a On the roll were Mrs. Clara Bonton, holder of a medal for saving a man

holder of a medal for saving a man from drowning: the Misses McClory, cousins; Miss Rebecca Trapp and Miss Hecklar, off of whom had proved over and over again their power of endur-ance and cool headedness in the water. "The progress we made at the practice meetings," Miss Mehrtens continued, "was remarkable and the interest we venson, who a few years ago saved a little girl of her own age from drawn excited in visitors to the baths and out-siders who learned what we were trying to do was alcost incredible. Coming at ing in Gravesend Bay sixty yards from shore. The drowning child pulled her under once, and when they got to the surface she twisted herself around Dollar to do was alcost incredible. Coming at first out of curiosity one and another would say, 'I should love to do that.' "Come on in and learn,' we would sug-gest, and usually they did. The member-ship climbed fast, although we only ac-cepted candidates who knew a little about swimming or at least were not surface she twisted herself around ly's legs so that if the latter has had first-class training both co-would have lost their lives. I was Dolly's coolness which imples en H about swimming or at least were not timid in the water. One girl I remember every one most.

every one most. "Then there was Mamie Kavanaugh, 12 years old and small at that, who saved a young woman in Jamaica Bay, and Miss Trapp, who was only 14 when she rescued a young woman much larger than berself under circumstances which would have daunted most far more experienced men swimmers. I have at least ten cases on record of rescues by girls of ten to fourteen years of she never had a chance, when taken in hand by one of our members actually lessness and enthusiasm. That is the sort of members we like to get. We ad-

nit no girl to membership under 15 years of age and not then unless she is normally strong and intelligent. by girls of ten to fourteen years of age. Now, is it likely that as these children get older they will be less reliant and quick to act in an emergin life saving. Miss Trap, for instance, is a little bit of a thing who doesn't weigh, I imagine, 100 pounds, but in an emer-gency her quickness, coolness and fear-lessness count far higher than mere pounds would." ency ?

"Here is the case of Mrs. Nickerson, a small woman of fragile appearance who, seeing a small boat upset in a storm off Hoffman Island, was the only pounda would." Referring to the training of the mem-bers of the National Women's Life Say-ing League, the president said that dur-ing the last six months they have had two courses of lectures given by an Englishman who was formerly a teach-er in the Royal Life Saving Society of England, and by a New York physician, the first consisting of lessons in life-saving, taking place Monday and Fri-day evenings at the Treet very third street storm of rounds, which included several men, who promptly took mensures to have ropes thrown from the yacht they were on to the unfortunates in the wat-er. Her bravery on that occasion was

so conspicuous that it earned for her a medal."-N. Y. Sun.

Worms sap the strength and underworms sap the strength and under-mine, the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Asthma is Torture. No one who hasn't gasped for breath in the pow-er of asthma knows what such sufer of asthma knows what such suf-fering is. Thousands do know, how-ever, from experience how immeasur-able is the relief provided by that marvellous preparation, Dr. J. D. Kel-logg's Asthma Remedy. For years it has been relieving and curing the most severe cases. If you are a suf-ferer do not delay a day in securing this remedy from your druggist.

Undesirable Aliens Reach U. S. Via Canada.

Ottawa, Sept. .--Continental immigrants insist on coming to Canada in contravention of the regulations, and such a number of them have been turned back that the Immigration Department has sent sharply-worded cables to the steamship companies, warning them against bringing in such people. They are mostly Poles and Russian Jews.

Russian Jews. The immigration regulations do not ban continentals whose relatives or friends here send them a prepaid ticket, but few of them do so. Instead, they come indirectly and thus are not eligible. All of them planning to stay in Canada are heading for the cities, while the greater number aim to get into the United States by the back door and evade the present. into the United States by the back door and evade the restrictions in vogue there. A large number have been rejected and taken back at the expense of the steamship companies. The situation has come to be such that the Density of the steamship of the different the Department has warned the different lines to conduct such examinations on the other side as will prevent the futile embarkation of ineligibles.

A Ready Weapon Against Pain .-There is nothing equal to Dr. Thomas' Eclectric Oil when well rubbed in. It penetrates the tissues and pain dis-appears before it.
